Review Rules Applicable to Facility

Example Checklists

APPENDIX 1-7. VISUAL REVIEW

D. TREATMENT, STORAGE, AND DISPOSAL FACILITY (TSDF) REQUIREMENTS

Requirements for interim status facilities (40 CFR Part 265) are used for all citations in APPENDIX 1-7.D. For permitted TSDFs, cite the parallel requirement from the facility permit.

D.1. Required Response Equipment

#	v/X/NA	REGULATORY REQUIREMENTS*	COMMENTS
1.		Operates to minimize possibility of emergency-265.31	
2.		Provides an internal communications or alarm system-265.32(a)	
3.		Provides device available for and capable of summoning emergency assistance-265.32(b)	
4.		Provides adequate supply and proper spill control, decontamination and safety equipment (fire blankets, respirators, absorbent, etc.)-265.32(c)	
5.		Provides adequate water supply for fire control equipment-265.32(d)	
6.		Tests and maintains communication and emergency equipment-265.33	
7.		Has device immediately available for and capable of summoning emergency assistance when waste is being handled or only one person is present-265.34	

v - in compliance X – not in compliance NA – not applicable * - please note applicable permit req.

Used Oil Processors and Re-Refiners Guidance

Applicability: Requirements of 40 CFR 279 Subpart F, adopted by reference at 15A NCAC 13A .0118(f), apply to owners and operator of facilities who process used oil.

- Processing means chemical or physical operations designed to produce from used oil, or to make used oil more amendable for production of, fuel oils, lubricants or other used oil-derived products.
- Processing includes but is not limited to: blending used oil with virgin petroleum products, blending used oils to meet the fuel specification, filtration simple distillation, chemical or physical separation and re-refining.

Regulation Citation (40 CFR)	Regulation Summary	In Compliance?		
		Yes	No	N/A
279.51	Notification - Must notify electronically in RCRAInfo as a Used Oil Processor/Re-Refiner and obtain an EPA ID number.			
279.52(a)	Preparedness & Prevention			
279.52(a)(1)	Maintenance and Operation of Facility: Facility must be maintained to minimize the possibility of a release, fire, or explosion.			
279.52(a)(2)	Required Equipment: All facilities must be equipped with below specified equipment unless none of the hazards posed by used oil handled at the facility could require the kind of equipment specified.			
279.52(a)(2)(i)	Facility must have an internal communications or alarm system capable of providing immediate emergency instruction (voice or signal) to facility personnel.			
279.52(a)(2)(ii)	Facility must have a communication device immediately available at the scene of operations capable of summoning outside emergency assistance.			
279.52(a)(2)(iii)	Facility must have portable fire extinguishers, fire control equipment, spill control equipment and decontamination equipment.			

State Specific Requirements – N.C.G.S. 130A-295.05

- North Carolina state requirements for Hazardous Waste Transporters/Transfer Facilities
 - NC Hazardous Waste Transfer Facilities must register (Issued a NCTF Number)
 - NC Hazardous Waste Transfer Facility must report the HW Transporters that use their HWTF
 - Hazardous Waste Transporters must report the HWTF they use in NC

Link to the forms and additional information about HWTF

<https://deq.nc.gov/about/divisions/waste-management/hw/forms>

Low Hanging Violations

- Hazardous waste may remain at a HW Transfer Facility for no more than 10 days
- Hazardous waste transporters must maintain 3 years worth of manifests
- Hazardous waste treatment, storage, and disposal facilities must (simply stated):
 - Label hazardous waste containers
 - Close containers
 - Segregate incompatibles
 - Not store hazardous waste for more than one year
 - Respond to spills

RCRAInfo Web

The Office of Resource Conservation and Recovery (ORCR) has the responsibility for national implementation and oversight of the hazardous waste program authorized by Subtitle C of the Resource Conservation and Recovery Act (RCRA). In most cases, States serve as primary implementers of the program in lieu of the Federal government. However, in some States¹, and for certain aspects of the program, the Environmental Protection Agency (EPA) retains all, or some, program implementation responsibility. In addition, ORCR provides national oversight of the program and supports reporting on national program accomplishments.

[About e-Manifest](#)

[Sites List](#)

You are here: [e-Manifest Overview](#)

e-Manifest Overview

Introduction

EPA established a national system for tracking hazardous waste shipments electronically. This system, known as "e-Manifest", modernizes the nation's cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states. EPA launched e-Manifest on June 30, 2018.

To learn more about e-Manifest, click [here](#). Details regarding the information submitted by the regulated community can be found in the [manifest instructions](#)

e-Manifest Public Data

Per the [Final Rule for the Modification of the Hazardous Waste Manifest System, Electronic Manifests \(One Year Rule\)](#) EPA releases manifest data 90 days after receipt at the receiving facility. Manifest data available via this website includes the manifest tracking number, id and name for all sites reported on the manifest, number and type of containers, waste codes, management methods, and quantity (in tons).

Chemicals of Interest

The Department of Homeland Security (DHS) maintains a list of Chemicals of Interest (COI). In cooperation with DHS this website excludes waste lines from the manifest, including the quantity, that contain COI. This website also excludes the manifest's shipped and received dates for manifests containing COI. These exclusions should be taken into account when using this data.

The entity type can be changed to "Initial Transporter" or "Designated Facility" instead of "Generator".

Saturday requirement, your dates will be adjusted to meet the requirement.

The report will show all valid results for the search criteria provided as it appears on the manifest. That is, a search for a particular Site ID may result in multiple rows if the information for the site (i.e., site name or address) is different between the manifests.

Manifest Waste Shipments - Summary

Criteria Name	Criteria Value
Date Range	04-27-2019 thru 05-27-2019
Date Range Type	Shipped Date
Entity Type	Generator
Location	National
Site Name	ecoflo

The Manifest Waste Shipments - Summary shows summary information for sites with manifests that meet the user selected criteria. The criteria include date range information and how an entity appears on a manifest (e.g. as the generator or other handler).

The summary provides a site's name and address information as well as the number of manifests and the total quantity (in tons) of waste represented on each manifest.

Please note, chemicals listed on the US Department of Homeland Security's Chemicals of Interest (COI), have been removed and are not reflected in the total quantity. In the event a manifest only contains COI, that manifest is excluded from the report.

Hazardous Waste Section

The primary purpose of the Hazardous Waste Section is to prevent and reduce releases of hazardous substances and clean up contaminated sites.

The Hazardous Waste Section ensures the safe management of hazardous waste in North Carolina. The staff applies the adopted federal rules that incorporate the Resource Conservation and Recovery Act requirements and additional state rules. The [Hazardous Waste Section](#) has two branches: [Facility Management Branch](#) and [Compliance Branch](#). In addition, the Section has an administrative support unit, the Financial and Information Management Unit.

SC man dumped tankers of poisonous liquids into Richland creek, indictment alleges

BY JOHN MONK

JANUARY 04, 2019 11:49 AM, UPDATED JANUARY 04, 2019 05:56 PM

A tanker truck driver for a Lexington waste disposal company has been indicted by a federal grand jury for allegedly dumping thousands of gallons of poisonous liquid waste into a rural creek in Lower Richland County near the Wateree River.

Michael Greene, an employee of A&D Environmental, Inc., was charged with “knowingly” and repeatedly dumping liquid waste that contained [toxic metals such as lead, mercury, selenium, cadmium and chromium](#) into Leesburg Branch Creek near Eastover, which is close to the Richland-Sumter county line, the federal indictment said. The charge carries up to three years in prison and a maximum \$250,000 fine.

A&D Environmental told The State Friday Greene is no longer with the company and that if the charges are true, Greene acted without the company’s knowledge.

From the HWS Civil Penalties Website

<p>A&D Environmental Services, Inc. 3149 Lear Dr. Burlington, NC 27215</p>	<p>Failed to:</p> <ul style="list-style-type: none">• not stored waste over 90 days;• have a RCRA storage Permit; and accumulate hazardous waste less than 10 days allowed	<p>\$6,500.00 in penalty</p> <p>\$1,351.52 for investigative and inspection costs</p> <p>\$1,680.00 fee storage facility during the 2018-2019 State fiscal year</p>	<p>Signed June 11, 2019</p>
--	---	---	-----------------------------

7

Look for Warning Flags

Warning Flags

- Complacency
 - Not keeping up with changes (new regulations (e-Manifest) or new technology)
 - No focus customer service
- Constant Change
 - Thriving in Chaos
 - Over expansion
 - Over extended in business (too diverse or too far of a reach)
- Circling the Wagons
 - Major Layoffs
 - Selling of Assets
 - Pension Buyouts

6

High Employee Turnover

High Employee Turnover

- Employee morale plummets with high turnover
- Employees may lack time/experience and training

5

Ask Questions

Ask Questions

- What is your business plan/model?
- Are you hiring? If so, what positions?
- What training do your employees have?
- Tell me about your last emergency incident at the site? How did you respond? How did you follow up?

Incidents Happen. The Response Matters.

Having an incident does not necessarily mean you should not use a hazardous waste transporter; a treatment, storage, and disposal facility; or a vendor.

- Was the incident routine?
- Is there a pattern?
- Was the incident preventable?
- Were they negligent or at fault?
- How did they respond/react?
- How did they follow-up?

4

See What You See

06.29.2011 11:26

06.29.2011 11:18

See What You See

- Is the building maintained?
 - Are there any roof leaks?
- Is equipment operable?
- Is the landscaping maintained?
- Are vehicles maintained?
- Is the safety equipment new/at least up to date?
- Is the facility secure?

3

Be Extra Cautious With Certain Wastes/Materials

06.23.2011 11:37

2

Be Extra Cautious When Using Brokers

Brokers have no Liability

Also be cautious of the lowest bid by any vendor

1

Trust your
Instincts

Self-Confessor Policy

- July 2000 "Enforcement Policy for Self-Reported Violations"
- A facility must meet all 5 conditions and submit the information in writing to be considered for a penalty waiver.
- In all circumstances (even if the 5 conditions are met), recovery of economic benefit may be pursued.
- If the penalty is not waived, the facility is subject to the cost of penalty.

Conditions

- The deficiency was not due to a lack of good faith efforts to understand or comply with applicable environmental, health or safety laws, or a lack of good faith efforts to correct past deficiencies.
- The deficiency was not done knowingly or willfully.
- The deficiency did not cause a significant harm to the environment or risk to public health.

Conditions

- The regulated person or entity voluntarily and promptly notifies the Department of the deficiency before the Department learns of it and completely discloses the deficiency to the Department.

A disclosure is not considered to be "voluntary" if:

- The disclosure is required by law, regulation or permit and if
- Self-monitoring for such deficiency is required of a facility or part of a facility.

Conditions

- The regulated person or entity, upon discovery of the deficiency, takes immediate and effective action under appropriate technical supervision to cease or remediate any continuing violation, avoid repeated violations, and remediate the deficiency or where appropriate, agrees in writing with the Department to take those steps needed to address the deficiency in a manner that is acceptable to the Department.
