The Five Steps to Successful Composting (At Grifols)

Back in the hands of the employees....

Give away ~150 cubic yards each year.

Step one –
Find
someone to
process your
waste

The screenshot shows the homepage of Full Circle Recycle. The header is green with the company name 'Full Circle Recycle' in large white font. To the right, it says 'Organic Waste Recycling - Raleigh NC' and the phone number '919.365.4401'. Below the header is a navigation menu with two rows of links: 'Home', 'The Organic Recycling System', 'What We Recycle', 'Why Recycle?', 'FAQ's', and 'Cucumber Production' in the first row; and 'About Us', 'Contact Us', and 'Our Location' in the second row. The main content area features a central image titled 'The Recycling Process' showing a globe with green arrows forming a cycle. Below the globe are the labels 'Organic Waste' and 'Greenhouse Heat'. To the right of the image is a 'Welcome to Full Circle Recycle' section with two paragraphs of text.

Welcome to Full Circle Recycle

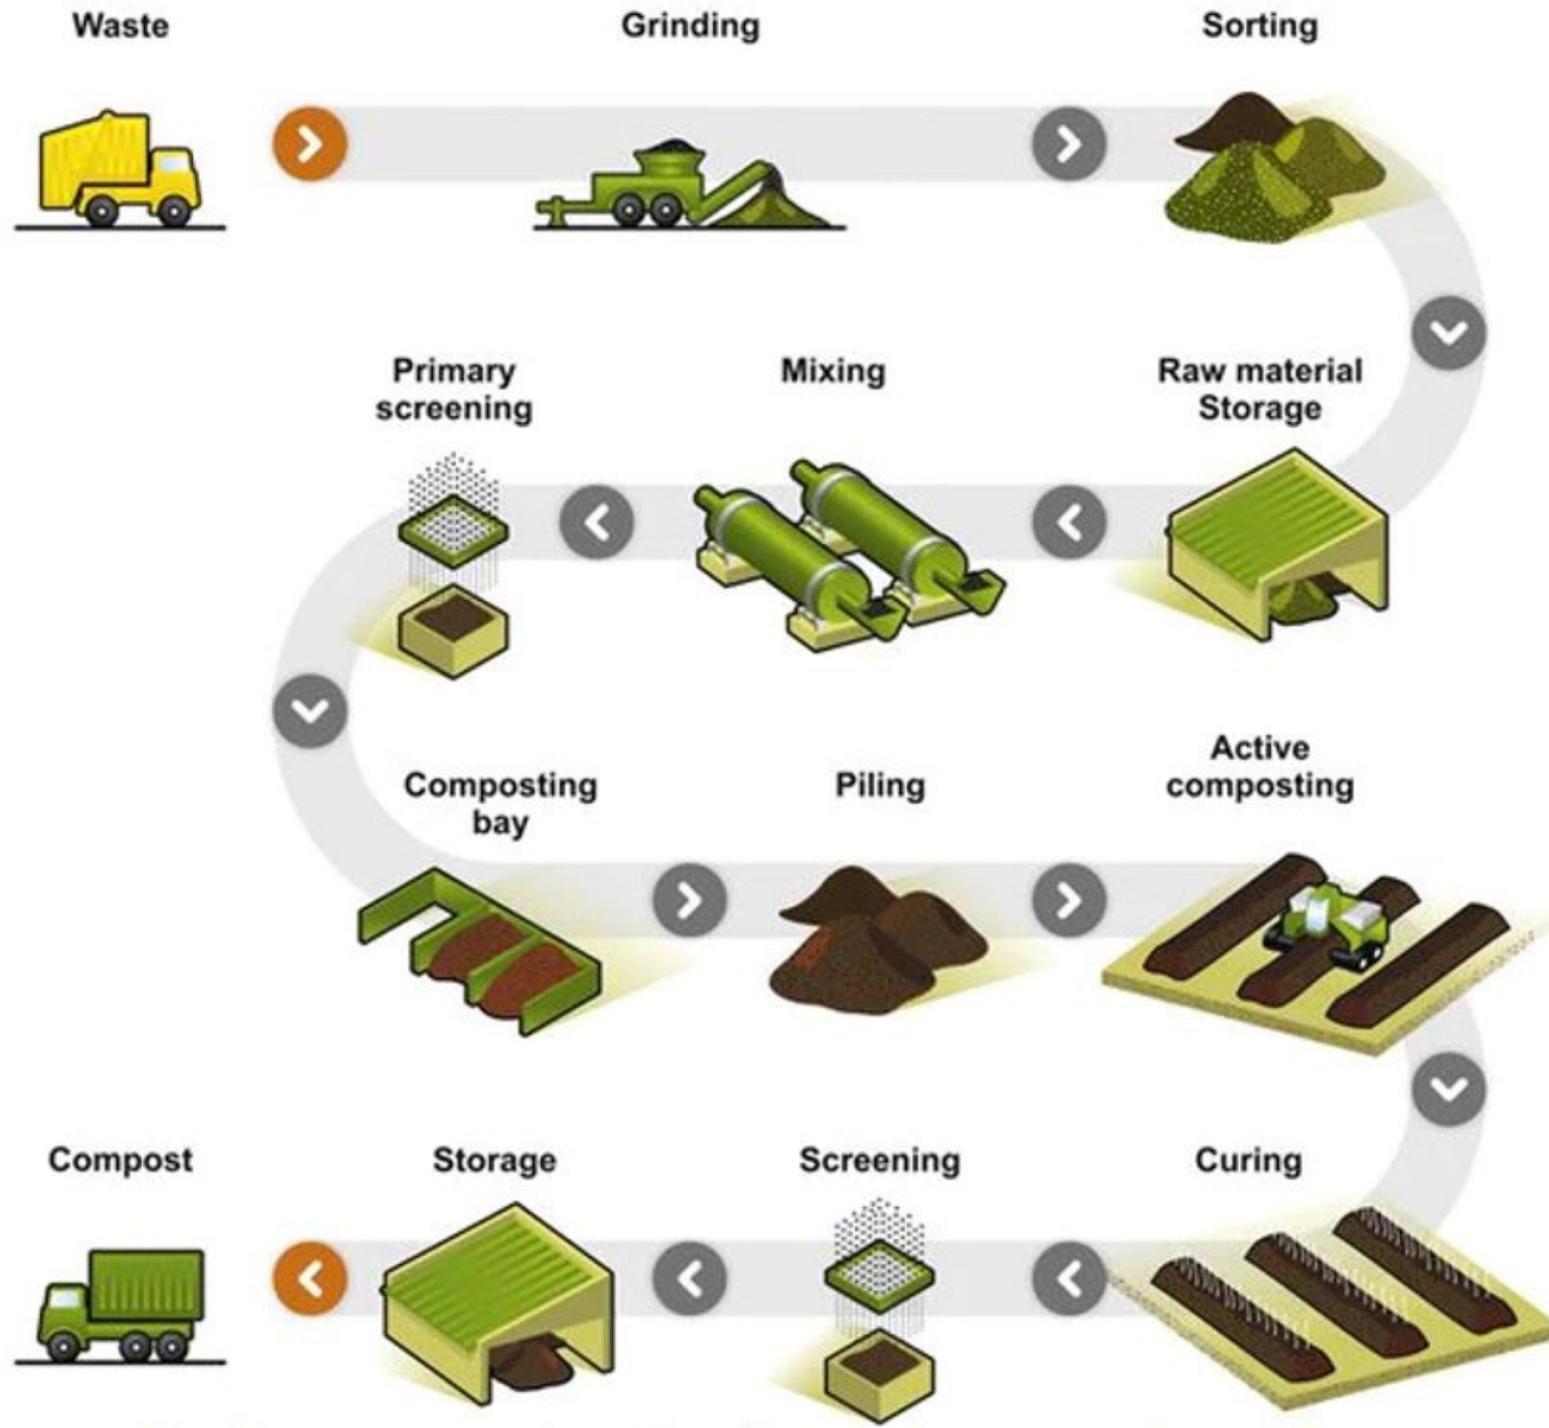

Full Circle Recycle is a family owned and operated, large-scale organic recycling facility. It is located on the Barham's Farm in Zebulon, North Carolina where we have been recycling waste for decades.

As recyclers of organic waste, we accept ALL food waste, such as food waste from restaurants and grocery stores (produce). This does not mean we only recycle waste that was "grown organically" or waste that is "certified organic." ALL food waste is accepted here.

We are equipped to handle commercial recycling of organic waste, utilizing a 750,000 gallon anaerobic digester. Call us today!

Grifols: 79 Building Impact Report

Impact to date:

Date: 10/01/22

41,383 lbs.

diverted from the landfill!

#starvelandfills

10,346 lbs.

compost created!

#buildsoils

Methane avoided

4,304 lbs.

CO₂ equivalent*

107,596 lbs.

Equiv. miles not driven

120,804 miles

Equiv. cars parked for 2 wks

273 cars

Tomato potential

77,593 tomatoes

of compost created

5,173 plants

*In a landfill food waste decomposes in the absence of oxygen and produces methane, which is 25x more powerful as a greenhouse gas than carbon dioxide, yet in the US 95% of food scraps are going to the landfill.

Collection Details:

2022 3,192 lbs.

2021 3,636 lbs.

2020 7,898 lbs.

2019 20,025 lbs.

2018 6,632 lbs.
