

## KURE BEACH TOWN COUNCIL TOWN OF KURE BEACH, NC

### R ESOLUTION R25-12

#### **RESOLUTION URGING ROBUST MITIGATION, LONG-TERM MONITORING, AND ADAPTIVE MANAGEMENT FOR THE WILMINGTON HARBOR 403 PROJECT**

**WHEREAS**, the Town of Kure Beach is located at the confluence of the Cape Fear River and the Atlantic Ocean, a uniquely sensitive estuarine environment that supports diverse wildlife, coastal communities, and natural systems; and

**WHEREAS**, the proposed Wilmington Harbor 403 Project seeks to deepen, widen, or otherwise modify the federal navigation channel, changes that may significantly alter hydrodynamic patterns, sediment transport, and shoreline stability in the Lower Cape Fear River region; and

**WHEREAS**, these alterations have the potential to increase erosion risk to sensitive shorelines, marsh platforms, and riverfront areas, and increase the likelihood of subsidence of adjacent riverbed and shoreline areas into the dredge prism, particularly within and adjacent to the Town of Kure Beach, threatening natural buffers that protect homes, public spaces, cultural resources, and community infrastructure; and

**WHEREAS**, the region's barrier and estuarine islands-including Battery Island, Shell bed Island, and others-play a critical ecological role in supporting fisheries, marsh nurseries, colonial waterbirds, and migratory shorebirds; and

**WHEREAS**, Battery Island in particular is recognized as one of the most significant colonial waterbird nesting sites on the East Coast, and in total all bird nesting islands on the Lower Cape Fear River provide habitat for approximately 30% of North Carolina's nesting coastal waterbird population, and are highly vulnerable to erosion, sea level rise, and habitat loss that may be exacerbated by channel deepening activities; and

**WHEREAS**, the environment surrounding Kure Beach is an essential part of the city's core values, contributing to residents' quality of life, recreational enjoyment, cultural heritage, and long-standing community identity rooted in conservation and stewardship; and

**WHEREAS**, the economic resilience of Kure Beach is directly connected to the integrity of its surrounding natural resources, with tourism, recreation, waterfront businesses, and property values all depending on a healthy, stable coastal environment; and

## KURE BEACH TOWN COUNCIL TOWN OF KURE BEACH, NC

### R ESOLUTION R25-12

**WHEREAS**, any federal navigation project that increases environmental risk must include robust mitigation, long-term monitoring, and adaptive management measures proportionate to both the scale of the project and the sensitivity of the affected ecosystems and communities; and

**WHEREAS**, the billion-dollar Savannah Harbor Expansion Project (SHEP) spent approximately 500 million on mitigation and included funding for post-construction monitoring and adaptive management, ensuring that resources would be available to modify or enhance mitigation if environmental conditions changed unexpectedly; and

**WHEREAS**, the non-federal sponsor for SHEP, acting through the Georgia Ports Authority, agreed to set aside, **in advance**, their cost-shared portion of the monitoring and adaptive management funds in an escrow account upon approval of the project, guaranteeing rapid response capability and honoring the principle that those benefiting from the project must share responsibility for preventing or repairing environmental harm; and

**WHEREAS**, projects such as the Wilmington Harbor 403 effort must match or exceed this level of commitment by establishing a dedicated and adequately funded adaptive management program that extends over the full period of environmental risk, not only the construction phase or initial years of project operation; and

**WHEREAS**, safeguarding Southport's environment, wildlife habitats, and economic well-being requires that mitigation and monitoring measures be both enforceable and financially secure before any project authorization or construction proceeds;

**NOW, THEREFORE, BE IT RESOLVED**, that the Town of Kure Beach formally that the Town of Kure Beach urges state and federal decision-makers, including the U.S. Army Corps of Engineers and the North Carolina General Assembly, to require a **comprehensive, long-term, and fully funded environmental mitigation and adaptive management plan** for the Wilmington Harbor 403 Project, modeled on or exceeding the commitments made in the Savannah Harbor Expansion Project; and

**BE IT FURTHER RESOLVED** that the Town of Kure Beach calls for the establishment of a **dedicated adaptive management fund**, placed in escrow prior to construction and sized proportionally to the project's potential impacts, ensuring that corrective actions, ecological restoration, and shoreline protections can be implemented promptly whenever monitoring indicates environmental degradation; and

**KURE BEACH TOWN COUNCIL  
TOWN OF KURE BEACH, NC**

**R**ESOLUTION R25-12

**BE IT FURTHER RESOLVED** that the Town of Kure Beach urges all agencies and project sponsors to protect Battery Island and the surrounding Cape Fear River islands as irreplaceable ecological assets, ensuring that mitigation measures fully safeguard the habitats supporting 30% of North Carolina's coastal shorebird population; and

**BE IT FINALLY RESOLVED** that copies of this Resolution be forwarded to the North Carolina General Assembly, the North Carolina Congressional Delegation, the U.S. Army Corps of Engineers, the North Carolina Department of Environmental Quality, the Brunswick County delegation, and other relevant agencies, urging their support in ensuring that environmental protection, community values, and economic resilience remain at the forefront of all decisions related to the Wilmington Harbor 403 Project.

**ADOPTED**, this 15<sup>th</sup> day of December 2025.
