

**PUBLIC MEMORANDUM
DEPARTMENT OF ENVIRONMENTAL QUALITY
DIVISION OF WATER RESOURCES**

The Division of Water Resources has received a request by the Division of Waste Management to establish an interim maximum allowable concentration (IMAC) in groundwater for tetrahydrofuran (THF). This interim concentration will aid in the evaluation of site conditions and in setting health protective groundwater remediation levels at regulated sites. In accordance with 15A NCAC 02L .0202(c), the data supporting the request have been reviewed by the DWR Planning Section, the Division of Waste Management and the Department of Health and Human Services, Division of Public Health's Occupational & Environmental Epidemiology Branch. The intent to establish this IMAC was published in the December 1, 2020 issue of the NC Register with the opportunity for any interested party to submit a comment within a 30-day period.

The following interim maximum allowable concentration is hereby established for Class GA and GSA groundwaters effective February 1, 2021:

<u>Substance</u>	<u>CAS Number</u>	<u>Concentration</u>
Tetrahydrofuran (THF)	109-99-9	2,000 µg/L

For more information or questions, please contact Bridget Shelton at bridget.shelton@ncdenr.gov or 919-707-9022.

S. Daniel Smith
Director, Division of Water Resources
