#### Nutrient Criteria Development for Albemarle Sound: Phase I Proceedings

Jim Hawhee N.C. Division of Water Resources 1 November 2017

## **Phase I Proceedings Document**

- Phase I proceedings summarized by DWR
- Target audience: SAC/CIC
- Document includes:
  - Executive summary
  - Overview of meetings (topics discussed)
  - Overview of supporting materials
  - Prioritized research recommendations and status
  - Appendices include meeting minutes, reports, and research proposals.

### Phase I Summary

- Open, APNEP-facilitated workgroup
- 9 meetings from 2014 to 2016
- Parameters considered: pH, DO, clarity, TSS, turbidity, phytoplankton and cyanotoxins, chlorophyll a, nitrogen, and phosphorus
- Original slate of supporting projects undertaken in 2015-2016

## **Phase I Supporting Projects**

- Remote sensing evaluation (NASA)
- Data classification and analysis (Tetra Tech)
- National law and policy review (Sea Grant)

# Phase I Supporting Projects

- Literature compilation (Tetra Tech)
- USGS Albemarle Sound initiatives
- DWR supplementary data analyses
- Criteria development case studies

### Phase I Summary, Continued

- Workgroup fact-finding in early 2016
- Member-generated criteria proposals evaluated by workgroup in late 2016
- Where limitations were evident, further research was proposed and ranked

## Prioritized Research for Phase II

- Additional algal toxin surveys
  - Status: some surveys underway
- Clarity optical model
  - Status: not underway, TSS data now being collected for calibration purposes
- Evaluate and summarize historical clarity data
  - Status: preliminary evaluation by DWR staff

## Prioritized Research for Phase II

- Nutrient bioassays
  - Status: grant proposal submitted but not funded
- Quantify historical SAV coverage
  - Status: APNEP mapping efforts largely complete, further evaluation of SAV habitat potential not underway
- Evaluate correlations between oxygen-sensitive fish species, habitat utility and seasonality.
  - Existing NOAA resources, but may require further evaluation

## What's next?

- Advancement of ongoing research and data evaluation efforts
- Consideration of criteria by SAC and CIC in Phase II
- Potential areas for discussion:
  - Application and implications of a clarity standard?
  - Chlorophyll *a* as a seasonal average?
  - N & P criteria: whether and how to set?
  - Bioconfirmation approach?
