1 Introduction

Environmental justice (EJ) is the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income, with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies (US EPA). This evaluation examines the demographic and environmental conditions in Northampton County, as well as census tracts, and the one-mile and two-mile radius around the property boundary of the Enviva Pellets Northampton, LLC facility. Finally, the demographics of the entire state of North Carolina are also considered as they compare to both the county and local census tract and radius settings.

Enviva Pellets Northampton, LLC (Enviva) was initially permitted to construct a wood pellets manufacturing plant in Northampton, North Carolina under the authorization of North Carolina Division of Air Quality (NC DAQ) permit 10203R05 issued on March 3, 2017. Enviva has applied for a permit modification to install air pollution control devices and increase facility production.

An EJ Snapshot was conducted at the beginning of this application process. The Snapshot was distributed to interested community members (if known) and posted to the DEQ website with the relevant permit application. The primary goal of the Snapshot was to encourage comments and suggestions from the surrounding community, industry, and environmental groups throughout the comment period. Public comments received were considered in the preparation of this full EJ Report.

2 Environmental Justice Evaluation

The North Carolina Department of Environmental Quality (NCDEQ) has assessed the potential impact on communities surrounding the proposed facility operation by reducing emission sources through implementation of control technology. The assessment of potential impacts included:

- Modeled emissions rates
- Permit modification application submitted by Enviva Pellets Northampton, LLC
- Study of area demographics [determined by utilizing the US EPA Environmental Justice tool (EJSCREEN) <u>https://ejscreen.epa.gov/mapper/ and current, available census data.</u> <u>http://factfinder.census.gov/faces/nav/jsf/pages/index.xhtml</u>]
- Comparison of local area demographics to both county and statewide census data
- County health assessment
- Surrounding sensitive receptors
- Local industrial sites (using the NCDEQ Community Mapping System <u>https://ncdenr.maps.arcgis.com/apps/webappviewer/index.html?id=1eb0fbe2bcfb4cccb3</u> <u>cc212af8a0b8c8).</u>
- Comparison of area demographics to project county and state census data
- A confirmation site visit to ensure accuracy of current available census data

• Communication with public and public officials in neighboring communities

3 Project Proposal

Enviva Pellets Northampton, LLC (Enviva) operates a wood pellets manufacturing plant in Northampton County, North Carolina under the authorization of North Carolina Division of Air Quality (NC DAQ) permit 10203R05 issued on March 3, 2017. Enviva applied for a permit modification to install air pollution control devices and increase facility production.

The wood pellet manufacturing process description is detailed in the permit modification application and is summarized as follows:

- Trucks deliver pre-chipped wood, unchipped logs, or purchased chips and bark to the site, where they are sorted into "green" (i.e. wet) wood or bark fuel storage piles.
- Whole logs are sent through the electric-powered rotary drum de-barker and then the electric chipper.
- Chipped wood is processed in five green wood hammermills to further reduce the size. Hammermill exhaust is controlled by an existing wet electrostatic precipitator (WESP). Enviva proposes to vent the exhaust from the WESP to a new natural gas/propane-fired regenerative thermal oxidizer (RTO-1) to control Particulate Matter (PM), Volatile Organic Compounds (VOC), and Hazardous Air Pollutant (HAP) emissions.
- From the hammermills, the green wood material moves to an existing rotary dryer system to reduce wood moisture content. The dryer heat is provided by an existing 175.3 million BTU per hour furnace fueled with bark and wood chips. The existing dryer/furnace exhaust vents through the same WESP/proposed RTO-1 control system as the green hammermills.
- Enviva proposes adding an additional rotary dryer system with a proposed 180 million BTU per hour furnace. The proposed dryer/furnace will exhaust to a new, separate WESP/RTO (RTO-2) control system.
- Once dry, the wood material is handled, screened, and sent to the eight dry
 hammermills to further reduce the size. Emissions from the dry hammermills are
 currently controlled by existing cyclones in series with three existing bagfilters. After the
 bagfilters, the exhaust vents to a proposed wet scrubber in series with a proposed
 natural gas/propane-fired regenerative catalytic/thermal oxidizer (RCO-1).
- Trucks deliver dry shavings that are handled, conveyed, stored, and/or screened. The dry shavings are processed by the existing dry hammermills or by two proposed dry shavings hammermills. The proposed dry shavings hammermills emissions will exhaust to the same proposed wet scrubber in series with the RCO-1 as the dry hammermills.

- After the dry hammermills, the wood material is formed into pellets by pellet presses and moved by conveyor to be cooled in the six pellet coolers. Emissions from the pellet press system and pellet press conveyors are vented through the existing cooler aspiration cyclones and to a new proposed wet scrubber in series with a regenerative catalytic/thermal oxidizer (RCO -2).
- The finished pellets are transferred from the coolers and handled into bins. From the bins, the pellets are sent to the loadout area and gravity fed into trucks or railcars.

Appendix A provides a systematic overview of the pellet manufacturing process at Enviva Pellets Northampton, LLC after permit modification.

Proposed changes to the facility per this modification:

- Increase permitted production rate from 535,260 ODT per year to 781,255 oven-dried tons (ODT) per year by upgrading pellet dyes with a new prototype;
- Increase the amount of softwood processed from 30% to a maximum of 80%;
- For the existing Dryer (ES-DRYER-1), add a regenerative thermal oxidizer (CD-RTO-1) after the existing wet electrostatic precipitator (CD-WESP-1) for VOC, HAP and PM emissions control;
- Install a new direct-fired wood dryer (ES-DRYER-2) equipped with a new wet electrostatic precipitator (CD-WESP-2) in series with a regenerative thermal oxidizer (CD-RTO-2);
- Add a new dryer bypass stack (ES-DRYBYP-2) and furnace bypass stack (ES-FURNACEBYP-2) for malfunctions and low load startups, shutdowns, and idling operations;
- Remove two existing Green Wood Hammermills (previously referred to as wood rechippers) and construct five new Green Hammermills (ES-GWH-1 through ES-GWH-5) and route the exhaust to the existing wet electrostatic precipitator (CD-WESP-1) in series with a new regenerative thermal oxidizer (CD-RTO-1). The Green Hammermills will have the capability to be exhausted to CD-WESP-2 and CD-RTO-2 when CD-WESP-1 and CD-RTO-1 are shut down;
- Existing Dry Wood Handling (ES-DWH-1 and ES-DWH-2) will exhaust to new bagfilters (CD-DWH-BF-1 and CD-DWH-BF-2);
- Install Dry Shaving Material Handling (ES-DRYSHAVE-1), Dry Shavings Reception (ES-DSR-1) with associated bagfilter (CD-DSR-BF), and a Dry Shavings Silo (ES-DSS) with associated bagfilter (CD-DSS-BF);
- Install two new Dry Shavings Hammermills (ES-DSHM-1 and ES-DSHM-2) for dry shavings and route the exhaust to a new wet scrubber (CD-WS-1) in series with a new

regenerative catalytic oxidizer (CD-RCO-1) that can also operate as a regenerative thermal oxidizer;

- Existing Dry Hammermills (ES-HM-1 through 8) will exhaust from the existing bagfilters to a new wet scrubber (CD-WS-1) in series with a new regenerative catalytic oxidizer (CD-RCO-1);
- Route exhaust from the existing dust control system to a new wet scrubber (CD-WS-1) and regenerative catalytic oxidizer (CD-RCO-1) that can also operate as an RTO; and
- Exhaust from the Pellet Presses and Pellet Coolers cyclones will be routed to a new wet scrubber (CD-WS-2) in series with a new regenerative catalytic oxidizer (CD-RCO-2) that can also operate as a regenerative thermal oxidizer.

Emissions Scenario	CO (tpy)	NOx (tpy)	PM (tpy)	PM10 (tpy)	PM _{2.5} (tpy)	SO2 (tpy)	VOC (tpy)	CO₂e (tpy)	Total HAPs (tpy)

Table 3-1. Changes in Potential to Emit

4 Geographic Area

The Enviva facility is located at 830 Lebanon Church Rd, Garysburg, NC 27831 (Northampton County). The highest off-site ambient air impacts from the Enviva Northampton dispersion modeling occur at the plant fence line. The location and magnitude of the maximum modeled toxic impact (0.028 ug/m3 for benzene) rapidly decrease with distance away from the facility, with predicted concentrations at a 1-mile radius about an order of magnitude less than the maximum concentration. The fence line level of benzene is 24% of the Allowable Ambient Limit (AAL). All other Toxic Air Pollutants (TAP) modeled were under 10% of the AAL. Based on these air modeling results, a two-mile radius was used for analyzing the demographics and socioeconomics (Figure 1). To understand potential maximum impact, a one-mile radius was also analyzed for comparison purposes. Any differences between the two allow for greater detail and understanding of the demographic data closest to the property.

EUSCREEN 2018

Figure 1. Facility location within two-mile radius.

Northampton County is designated as a Tier 1 county by NC Department of Commerce. The tier designation process assigns each county to a designation of Tier 1 (most distressed), Tier Two, or Tier Three (least distressed). By law, the designation of tiers requires that 40 Tier One, 40 Tier Two, and 20 Tier Three counties are assigned each year. Northampton County has been designated as Tier 1 for at least the last four consecutive years. The two-mile radius used in this analysis is wholly within Northampton County, and is encompassed by census tracts 9204.01 and 9203 (Figure 2). Census tracts are small, relatively permanent statistical subdivisions of a county with a unique numeric code (US Census Bureau). The two census tracts do not encompass any Federal or State American Indian Reservation, Off-Reservation Trust Land, Statistical Area, Designated Tribal Area, or Native Regional Corporation. However, this does not mean that Native American or Alaska Native persons do not live within census tracts 9204.01 and 9203.

Figure 2. Census tracts surrounding facility location.

5 Regional and Local Settings

The following sections on race and ethnicity, age and sex, disability, poverty, household income, and Limited English Proficiency (LEP) populations are based on US Census Bureau data, first at a state and county level (regional setting), and then at a census tract and project radius level (local setting). The surrounding census tracts included will be any census tract that overlaps into the two-mile radius. Demographics of Northampton county will be compared to the local level data to identify any disparities surrounding the project area. Using standard environmental justice guidelines from the EPA and NEPA documentation, the following conditions will be flagged as potential communities of concern:

- 1. 10% or more in comparison to the county average
- 2. 50% or more minority
- 3. 5% or more in comparison to the county average for poverty

For example, if a census tract has 35% of the population classified as low income but the county consists of 30% low income, the census tract would exceed the county average by 16.7% and thus be flagged as a potential area of concern. For this report, census data from 2010 and census data estimates from 2011-2015 and 2012-2016 were used. 2010 Census Bureau data is real data gathered every ten years, whereas the estimates from the more recent years are modeled based on the real data. For the data gathered from the 2012-2016 and 2011-2015 estimates, the margin of error (MOE) has been included. This value is a measure of the possible variation of the estimate around the population value (US Census Bureau). The Census Bureau standard for the MOE is at the 90% confidence level and may be any number between 0 and the MOE value in either direction (indicated by +/-).

5.1 Race and Ethnicity

Regional Setting

According to the 2010 US Census Data QT-P3, Race and Hispanic Origin: 2010; 2010 Census Summary File 1 report, North Carolina's population totaled 9,535,483 individuals (Table 5-1). The three most common racial groups across the state were White (68.5%), Black or African-American (21.5%) and Hispanic or Latino (of any race) at 8.4%.

Northampton County had a total population of 22,099 individuals (Table 5-1). The two most common racial groups within the county were Black or African American (58.4%), and White (39.2%). The Black or African American population (58.4%) was greater than 10% different when compared to the state (21.5%).

All **bolded** and orange highlighted cells indicate a difference that is greater than 10% when compared to the State.

Local Setting

According to the 2010 US Census Data QT-P3, Race and Hispanic Origin: 2010; 2010 Census Summary File 1 report, the largest population within Census Tract 9203 was Black or African America, with a population of 4,448 (73.5%) (Table 5-2). The next largest populations were White (25.2%), Two or More Races (.6%), and Hispanic or Latino (.6%). Black or African American populations were greater than 10% different when compared to both county and state populations at 73.5% for the census tract compared to 58.4% in Northampton County and 21.5% for the state population.

The largest population within Census Tract 9204.01 was Black, with a population of 2,846 (65.1%). The next largest populations were White (32.1%), Hispanic or Latino (1.5%), and Some Other Race (1.1%). Census Tract 9204.01 showed a greater than 10% difference when compared to both county and state populations for Black or African American at 65.1% for the census tract compared to 58.4% in Northampton County and 21.5% for the state population.

Within the one-mile radius, EJSCREEN identified a total population of 694 (Table 5-2). The largest population was Black or African American with a total of 506 individuals (73%), followed by White with 170 individuals (25%). The Black or African American population within the one-mile radius was greater than 10% when compared to the county and the state. Within the two-

mile radius, EJSCREEN identified a total population of 2,246 (Table 5-2). The largest population within the two-mile radius was Black or African American, with a total of 1,486 individuals (66% of the total population), followed by White (32.0%). The Black or African American population within the two-mile radius was greater than 10% when compared to the county and the state.

All bolded and blue highlighted cells indicate a difference that is greater than 10% when compared to the County and State.

5.2 Age and Sex

Regional Setting

According to the US Census Bureau, QT-P1, Age Groups and Sex: 2010 Census Summary File 1, North Carolina had a total population of 9,535,483 individuals. The largest percentage of the total state population (63.1%) was between the ages of 18 and 64, with an overall median age of 36 for males and 38.7 for females (Table 5-3).

Northampton County had a total population of 22,099 individuals. The largest percentage of the total county population (59.6%) was between the ages of 18 and 64, with a median age of 42.7 for males and 47.6 for females (Table 5-3). The 65 years and older population (19.6%) was greater than 10% of the state average for both sexes and for both male and female.

	North Carolina

the State

Local Setting

According to the US Census Bureau, QT-P1, Age Groups and Sex: 2010 Census Summary File 1, census tracts 9203 and 9204.01 had a total population of 6,055 and 4,370, respectively. The largest percentage of the population for Census Tract 9203 (62.3%) was between the ages of 18 and 64, with a median age of 40.9 for males and 48.4 for females (Table 5-4). The 65 years and older population (18.9%) was greater than 10% the state average. The largest percentage of the population for Census Tract 9204.01 (60%) was between the ages of 18 and 64, with a median age of 40.4 for males and 43.5 for females (Table 5-4). The 65 years and older population (16.4%) was greater than 10% the state average.

Within the one-mile radius, EJSCREEN identified a total of 694 individuals (Table 5-5). The largest percentage of the population of the one-mile radius is 18+ with 77% which is over 10% greater than both the county and state average. Within the two-mile radius, EJSCREEN identified a total population of 845 individuals (Table 5-5). The largest percentage of the population for the two-mile radius was 18+ at 77%. This was greater than both the county and state average. For both buffer areas, the 65 years and older average was over 10% greater than the state.

5.3 Disability

Regional Setting

According to the 2012-2016 American Community Survey 5-Year Estimates, Table S1810 from the US Census Bureau, the state of North Carolina had an estimated total population of 9,745,671 noninstitutionalized citizens. Of those individuals, an estimated 13.7% (MOE +/- 0.1%) had a disability. The largest population of disabled civilians were 65 years and over (37.0%, MOE +/- 0.4%). The second largest population was the 18 to 64-year-old population at 11.7% (MOE +/- 0.1%). By race, American Indian and Alaskan Native had the highest estimated disability rate of 17.8% (MOE +/- 0.7%). Black or African-American, White, and Two or More Races were the next three highest population estimates with disabilities in North Carolina, at 15.2% (MOE +/-0.2%, 14.5% (MOE +/- 0.1%), and 12.1% (MOE +/- 0.6%), respectively (Table 5-6).

	T	otal	With a	Disability	Percent with a Disability		
Subject	Estimate	Margin of Error +/-	Estimate	Margin of Error +/-	Estimate	Margin of Error +/-	
Total civilian noninstitutionalized population	9,745,671	1,984	1,331,570	9,030	13.7	0.1

Table 5-6. Regional Setting- North Carolina Disability Rates

Northampton County had an estimated total population of 19,846 noninstitutionalized citizens. Of those individuals, an estimated 23.4% (MOE +/- 1.9%) had a disability. The total population with disabilities in Northampton County was more than 10% different than the state level of 13.7%. The largest population of disabled civilians were 65 years and older (43.2%, MOE +/- 5.9%). The second largest population was the 18 to 64-year population at 20.5% (MOE +/-

3.1%). All population groups, with the exception of Under 5 years, had a disability percent estimate that was more than 10% of the state level. By race, American Indian and Alaska Native had the highest estimated disability rate of 53.4% (MOE +/- 37%). Asian, Two or More Races, and Black or African American were the next highest groups with rates of 34.1% (MOE +/- 38.8%), 32.9% (MOE 38.8%), and 24.2% (MOE 2.6%). All of the race or origin populations with the exception Native Hawaiian and Other Pacific Islander, Some other Race, and Hispanic or Latino had a disability percent estimate that was more than 10% of the state level (Table 5-7).

Table 5-7. Regional Setting- Northampton County Disability

Local Setting

According to the 2012-2016 American Community Survey 5-Year Estimates, S1810 from the US Census Bureau, Census Tracts 9203 and 9204.01 had a total civilian noninstitutionalized population of 5,183 and 4,376, respectively (Table 5-8). The largest percentage of the total Census Tract 9203 population with a disability (43.5%, MOE +/- 14.6%) was the population 65 years and over. The second largest was at 17.5% (MOE +/- 14.9%) for the 18 to 64-year age range. All population groups except for Under 5 Years had a greater than 10% difference when compared to the state. The White population had the highest estimated disability rate by race at 28.1% (MOE +/- 4.8%) which was greater than 10% different from the state and county population. The Black or African-American population had an estimated disability rate of 20.3% (MOE +/-8.0%) and was greater than 10% the state average.

The largest percentage of the total Census Tract 9204.01 population with a disability (54.1%, MOE +/- 13.3%) was the population 65 years and over. The second largest was at 17.6% (MOE +/- 5.5%) for the 18 to 64-year age range. Two or more races had the largest population by disability of a race or origin group at 86.6% (MOE +/-6.6%) followed by Black or African American at 24.0% (MOE +/-5.8%) and American Indian and Alaska Native at 21.1% (MOE +/- 34.7%). Almost all populations had a difference that was greater than 10% when compared to the state. EJSCREEN does not provide data on disability, so was not included for the one and two-mile radius.

5.4 Poverty

Regional Setting

According to the Census Table S1701, Poverty Status in the Past 12 Months, 2012-2016 American Community Survey 5-Year Estimates, from the US Census Bureau, North Carolina had an estimated population of 9,783,738, with 16.1% (MOE +/- 0.2%) below the poverty level (Table 5-9). Across all subjects, Some Other Race had the highest percent living below the poverty level at 32.0% (MOE +/- 1.4%). The next three subjects with the highest poverty level were American Indian and Alaska Native (28.1%, MOE +/- 1.5%), followed by Hispanic or Latin at 30.1% (MOE +/- .8%), American Indian and Alaska Native at 26.2% (MOE +/- 1.5%), and Black or African-American at 24.9% (MOE +/- .4%). The age group with the highest population below poverty was under 18 (22.9%, MOE +/- 0.4%), followed by 18 to 64 (15.3%, MOE +/- 0.2%).

Table 5-10. Poverty Status - Northampton County

Local Setting

According to the Census Table S1701, Poverty Status in the Past 12 Months, 2013-2017 American Community Survey 5-Year Estimates, from the US Census Bureau, Census Tracts 9203 and 9204.01 had estimated populations of 5,063, with 29.4% (MOE +/- 7.9%) and 4,093, with 26.2% (MOE +/- 7.4%) below the poverty level, respectively (Table 5-11), with this percentage greater than 5% more than both the county and the state for Census Tract 9203, and the state for 9204.01. In Census Tract 9203, the largest percentage of Poverty Status for Age was under 18 years (43.5%, MOE +/-16.3%) followed by 29.2% (MOE+/-8%) for 16 to 64 years. All age groups had a percentage rate that was greater than 5% when compared to the state, and the 16-64, and 65+ groups also were greater than 5% when compared to the county. Poverty status for both Males and Females were also greater than 5% different than the state average with the male percent being larger than the county average as well (31% MOE +/-9.5%). The largest racial group experiencing poverty in Census Tract 9203 was Black or African American at 35.2% (MOE +/- 9.6), which is over 5% different when compared to the state average (Table 5-11).

In Census Tract 9201.01 all age groups have a greater than 5% difference when compared to the state, and the 65 years and older group had a greater than 5% difference compared to the state and county average at 23.2%. All racial and origin groups in Census Tract 9204.01 were greater than 5% of the state average except for Asian alone and Native Hawaiian and other Pacific Islander Alone (for which there was no data). Some other race, two or more races, and Hispanic or Latino origin also had a greater than 5% difference when compared to the county.

5.5 Household Income

Regional Setting

The following table (Table 5-12) was compiled using data from the Census Table S1901, Income in the Past 12 Months (in 2016 Inflation-Adjusted Dollars) 2012-2016 American Community Survey 5-Year Estimates for North Carolina. The North Carolina household income range with the highest percent was for \$50,000 to \$74,999, at 18.0%. The median household income was \$48,256 and the mean income was \$67,367. The household income range for Northampton County with the highest percent was \$15,000 to \$24,999 at 16.3%. The median income was \$31,543 and the mean income was \$43,843. All income ranges less than \$35,000 had percentages that were more than 10% higher than the state ranges.

Source: US Census, 2012-2016 ACS 5-Year Estimates

Local Setting

According to the Census Table S1901, Income in the Past 12 Months (in 2016 Inflation-Adjusted Dollars) 2012-2016 American Community Survey 5-Year Estimates, Census Tract 9203 had a median income of \$29,945 and a mean income of \$37,739. All income groups below \$35,000 were greater than 10% when compared to the state, and the \$25,000 to \$34,999 income group was greater than 10% when compared to both the county and the state. The greatest population falls into the \$15,000 to \$24,999 income group. Census Tract 9204.01 had a median income of \$29,953 and a mean income of \$44,814. All income groups below \$35,000 were greater than 10% when compared to the state, and the \$10,000 to \$14,999 income group difference was greater than 10% when compared to both the county and the state. The greatest population falls into the \$15,000 to \$24,999 income group.

An EJSCREEN analysis of a one-mile and two-mile buffer surrounding the Northampton site showed that the greatest percent (28%) in the one-mile buffer fell in the \$15,000-25,000 income group followed by the \$15,000-\$25,000 group (27%). The highest percent in the two-mile buffer area fell in the \$15,000-\$25,000 income group (24%), and the \$25,000-\$50,000 group (24%).

Table 5-13. Household Income– Project Radius

Per Capita Income

Per capita income is the mean income computed for every man, woman, and child in a particular group including those living in group quarters. It is derived by dividing the aggregate income of a particular group by the total population in that group (US Census Bureau). Per Capita Income data was obtained through the Census Table B19301, Per Capita Income in the Past 12 Months (In 2017 Inflation-Adjusted Dollars), 2013-2017 American Community Survey 5-Year Estimates. The North Carolina per capita income estimate was \$28,123. The Northampton County estimate is \$19,126, and the estimates in the two census tracts were \$16,184 (9203) and \$18,641 (9204.01). Both the county and the two census tracts had a significantly lower Per Capita Income compared to the state (Table 5-14).

The EJSCREEN analysis also provided per capita income estimates for both a one-mile and two-mile buffer surrounding the Enviva Northampton site. The one-mile buffer area had an estimate of \$18,257 while the two-mile buffer had an estimate of \$17,434. Both of these are significantly lower than the state, but comparable to the county and the two census tracts.

Location	Subject		Per Capita Income in Last 12 Months (Dollars)
North Carolina	Dor Conito Incomo	Estimate	28,123
North Carolina	Per Capita Income	Margin of Error +/-	130
Northampton County	Der Capita Incomo	Estimate	19,126

6 Limited English Proficiency (LEP)

The following table (Table 6-1) was completed using data from Census Table B16001, Language Spoken at Home by Ability to Speak English for the population 5 years and over, 2011-2015 American Community Survey 5-Year Estimates for Northampton County and Census Tracts 9203 and 9204.01. Per the Safe Harbor Guidelines, if an LEP Group is identified during the prepermit issuance process, written translations of vital documents for each eligible LEP language group that constitutes five percent or includes 1,000 members (whichever is less) of the population of persons eligible to be served or likely to be affected or encountered will be prepared. If there are fewer than 50 persons in a language group that reaches the five percent trigger, then DEQ will not translate vital written materials, but will provide written notice in the primary language of the LEP language group of the right to receive competent oral interpretation of those written materials, free of cost. The safe harbor provisions apply to the translation of written documents only. Safe harbor guidelines are per the EPA guidance for LEP persons, and followed by DEQ when deemed appropriate. Across both census tracts, Spanish or Spanish Creole is the major language spoken besides English, with an estimated 112 individuals identified who "speak English less than very well" (Table 6-1). All languages other than Spanish or Spanish Creole are not included because the value of speaking English less than "very well" was lower than the margin of error.

	Northampton County		Census Tract 9203		Census Tract 9204.01		
1. LANGUAGE SPOKEN AT HOME	Estimate	Margin of Error	Estimate	Margin of Error	Estimate	Margin of Error

7 Local Industrial Sites

Within the 2-mile radius of the Enviva facility, there are a total of 38 facility permits or incident reports (as of September 24, 2019), not including the existing permits for the Enviva Northampton facility (Figure 5). Of those 38 within the 2-mile radius;

- 5 are NPDES stormwater permits
- 3 are air quality permitted facilities
- 17 are underground storage tank incidents
- 5 are above ground storage tank incidents; and
- 4 are land use restrictions or notices

The other 3 air quality permits are for Gaston Cooperative Inc., Rightmyer Machine Rentals, Inc., and the Rose Brothers Paving Co Inc- Gaston Asphalt Plant.

8 Local Sensitive Receptors

The Environmental Protection Agency suggests that sensitive receptors include, but are not limited to, hospitals, schools, daycare facilities, elderly housing and convalescent facilities. These are areas where the occupants are more susceptible to the adverse effects of exposure to toxic chemicals, pesticides, and other pollutants. Extra care must be taken when dealing with contaminants and pollutants in close proximity to areas recognized as sensitive receptors. For instance, children and the elderly may have a higher risk of developing asthma from elevated levels of certain air pollutants than a healthy individual aged between 18 and 64.

Within the two-mile project radius, the following potential sensitive receptors were identified (Figure 4):

- Gaston College Preparatory School
- Lebanon Church
- First Evangelical Methodist Church
- Dwight Hall Recreation Park
- Gaston Church of Christ
- Grace Baptist Church
- Hampton Manor Assisted Living Facility

Just outside of the two-mile radius, the following sensitive receptors were identified:

- Gaston Elementary and Middle School
- Northampton County High School
- Shilo United Methodist Church
- Cool Spring Missionary Baptist Church
- Oak Grove Baptist Church
- Long Park green space

Figure 6. Sensitive receptors surrounding the Enviva facility

9 Health

The University of Wisconsin Population Health Institute, in collaboration with the Robert Wood Johnson Foundation, calculated a County Health Rankings system for all the States in the United States (<u>www.countyhealthrankings.org</u>). This ranking is based on health outcomes (such as lifespan and self-reported health status) and health factors (such as environmental, social and economic conditions). According to this 2019 report, out of all 100 counties in North Carolina (with 1 indicating the healthiest), Northampton County ranks 92nd in health factors and 96th in health outcomes (Figure 7).

Figure 7. County health rankings for North Carolina, provided by the University of Wisconsin Public Health Institute.

According to the NC DEQ Community Mapping System Environmental Justice Tool, all causes of death (per 100,000 deaths) identified showed a higher rate across Northampton County than the state, except for heart disease and stroke (Table 9-1). Preterm birth rates for the Northampton County (12.9) were also higher than the state average (10). However, total asthma hospitalizations for the county (28) were lower than the state average (90).

Cause of Death	Northampton County	North Carolina
Cancer	188.7	169.1
Heart Disease	157.3	163.7
Stroke	41.2	43.1
Cardiovascular Disease	226.2	221.9
Diabetes	43.7	22.8
Source: NCDEQ 2019 EJ Tool		

Table 9-1. Health Assessment - Causes of Death (Northampton County)

10 Field Reconnaissance

DEQ staff visited the Enviva Northampton facility area on August 9, 2019, to provide information to local entities regarding the Enviva Northampton facility permit modification application and associated public hearing. During this visit, staff confirmed the general accuracy of the census data and identified land use activities within the 2-mile radius of the facility. Across Northampton County DEQ staff visited 20 entities including businesses, churches, schools, post offices, and government offices.

11 Conclusion

Environmental justice is the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income, with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies (US EPA). This report examined the demographic and environmental conditions in North Carolina, Northampton County, census tracts 9203 and 9204.01, and the one-mile and two-mile radius around the Enviva Northampton facility. Emission control plans outlined in the permit modification application and county level health data were also included.

Enviva Northampton, LLC has applied for a Title V permit from DAQ. The facility has already obtained a PSD permit and is in operation. The recent application modification has been submitted to now include greater emission control measures and an increase in production.

It is important to keep in mind that based on the available data, the following limitations of this report: census data is from 2010 and may be outdated; the more recent census data through 2016 are estimates; EJSCREEN does not provide all of the data categories that were used in this analysis so the census tract and county data cannot be compared to the radius used surrounding the facility boundary for all criteria; census tracts can still be large areas and do not allow for exact locations of each population; some of the census tracts slightly overlap with the two-mile radius; and the Department cannot determine which populations are in that small amount of overlap around the facility.

The Department assessed the available demographic and socioeconomic data of the communities surrounding the Enviva Northampton, LLC facility in regard to its permit application for enhanced emission controls. The racial composition of the immediate area shows a significantly larger proportion of Black or African American residents (73% in one-mile buffer, 66% in two-mile buffer) when compared to the county and the state. The census tracts and county also show a higher proportion of Black or African American residents when compared to the state. In addition, disability estimates for almost every population group at the census tract level are significantly higher than the state, and in many cases, the county rates as well. Poverty status is high, with 29.4% of individuals in Census Tract 9203 experiencing poverty and 26.2% of individuals in Census Tract 9204.01 experiencing poverty, as compared to 25.4% in Northampton County and 16.8% statewide. Household income analysis found that in both census tracts, as well as Northampton County, there are significantly more people in the bottom four income brackets when compared to the state. Analysis of the one-mile buffer area around the facility showed that the majority of households have an income below \$25,000. For per capita

income, the state average is \$26,779, whereas the one-mile buffer area average is \$18,257 and the two-mile buffer area average is \$17,434. From a health perspective, out of all 100 counties in North Carolina (with 1 indicating the healthiest), Northampton County ranks 92nd in health factors and 96th in health outcomes and demonstrates a higher rate of all causes of death than the state as a whole, except for heart disease and stroke. Additional outreach and engagement was conducted throughout the permitting process with interested parties, with a focus on the communities identified in this Report.

The North Carolina Department of Environmental Quality (NCDEQ) makes these documents available on an "as is" basis. All warranties and representations of any kind with regard to said documents are disclaimed, including the implied warranties of merchantability and fitness for a particular use. Under no circumstances will the NCDEQ, or any of its officers or employees be liable for any consequential, incidental, special or exemplary damages even if apprised of the likelihood of such damages occurring. The NCDEQ does not warrant the documents against deficiencies of any kind. The use of any of these documents for work which is under contract with the NCDEQ, does not relieve the contractor from any obligations assumed by the contract or from complete and proper fulfillment of the terms of the contract, nor does it entitle the contractor to compensation for damages or loss which could be attributed to such use.

DISABILITY CHARACTERISTICS

2012-2016 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Tell us what you think. Provide feedback to help make American Community Survey data more useful for you.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	North Carolina

Population 75 years and over	80	+/-49	27.7%	+/-15.5				

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2012-2016 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2012-2016 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
 An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of

sample cases is too small.

When information is missing or inconsistent, the Census Bureau logically assigns an acceptable value using the response to a related question or questions. If a logical assignment is not possible, data are filled using a statistical process called allocation, which uses a similar individual or household to provide a donor value. The "Allocated" section is the number of respondents who received an allocated value for a particular subject.

While the 2012-2016 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

While the 2013-2017 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2013-2017 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
 An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of

sample cases is too small.

Methodological changes to data collection in 2013 may have affected language data for 2013. Users should be aware of these changes when using multi-year data containing data from 2013. For more information, see: Language User Note.

While the 2011-2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2011-2015 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
 An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
