* Statistics are based upon Annual Reclamation Reports submitted by each mine operator and validated by LQS regional office field staff. As validations are continually being entered into our statewide computer database from which these statistics are derived, these figures should be considered approximate.

** This acreage includes mined land that has been reclaimed, as well as undisturbed land that has been released from permit. This acreage does not reflect acreage where reclamation is in progress.

**TOTAL NUMBER OF MINES ON INVENTORY
FOR 2024**

ACTIVE	INACTIVE	RELEASED	TOTAL
717	32	1563	2337

Date Data was Retrieved: February 26, 2026

Below is a brief description of how the numbers for each column were calculated:

Number of Permits

Active and Inactive Permits (Issued before 1/1/(Year selected+1)) plus released permits released on or after 1/1/(Year Selected+1).

New Acres Affected

Total of all acres affected for the year selected.

Total Acres Reclaimed

Total of all acres reclaimed for year selected.

Total Acres Affected/Unreclaimed

All current affected/unreclaimed acres for active and inactive mines for year selected where the permit issue date is before 1/1/(Year Selected+1). If an active or inactive mine does not have acreage data for the year selected get the acreage from most recent acreage information for that mine. Also get the acreage for released mines if the release date is on or after 1/1/(Year Selected+1) (Use previous data for those that don't have acreage data for the year selected).

Total Acres Bonded

Total acres bonded for active and inactive mines where the issue date of the permit is less than 1/1/(Year Selected+1) plus bonded acres for released mines where the release date is on or after 1/1/(Year Selected+1).

Total Acres Permitted

Total permit acres for active and inactive mines where the issue date is before 1/1/(Year selected+1) plus permitted acres for release mines that were released on or after 1/1/(Year Selected+1).
