|-------------|--------------------------------------|---------------------------------|---|-----------|----------------------|--------------------------|-----------------|----------|--|-----------------|---------------|--------------------------------|----------|
|             |                                      |                                 |   |           |                      |                          |                 |          |  | Reliability     | Affordability | Source Protection & Management | Planning |
| 1           | Kings Mountain, Town of              | Joel E. Wood & Associates, PLLC | Rehabilitate and expand the WTP from 8 MGD to 12 MGD including backup power.  | Cleveland | \$12,460,640.00      |                          | \$12,460,640.00 | 3        | 23                                     | 3               | 14            | 3                              | 3        |
| 2           | Kings Mountain, Town of              | Joel E. Wood & Associates, PLLC | Replace the existing 24-inch transmission main and BPS connecting WTP to city distribution grid by 36-inch pipe.  | Cleveland | \$16,162,670.00      |                          | \$16,162,670.00 | 3        | 20                                     | 0               | 14            | 3                              | 3        |
| 3           | Buncombe, County of                  | McGill Associates, P.A.         | Fast-Track Planning Loan for the following: Install approx. 16,750 LF of 8" & 6" waterline and appurtenances; two BPS; and 115 meters to serve 115 homesites whose private wells are contaminated w/trichloroethylene (TCE). All 115 residences are located within a 1-mile radius of an EPA NPL site, the source of contamination. Proposed construction project would connect these residences to the City of Asheville's municipal system. | Buncombe  | \$214,850.00         |                          | \$214,850.00    | 4        | 1                                      | 0               | 0             | 0                              | 1        |
| 4           | Greater Badin Water & Sewer District | Chambers Engineering, PA        | Replace the entire existing Greater Badin Water and Sewer District water distribution system and connect to Stanly County distribution network. Water lines will range from 6 to 12 inches and AMR-type meters will be installed. Project will address known water quality and quantity issues and will not increase capacity.  | Stanley   | \$5,948,630.00       | \$2,400,000.00           | \$3,548,630.00  | 3        | 27/31                                  | 0               | 20/24         | 6                              | 1        |

|               |                        |                       |                        |
