Re: Reports on Water Resources Development Funds

Dear Senator Jackson, Representative Dixon, and Representative Gillespie:

The North Carolina General Assembly appropriates funds to the Department of Environmental Quality to provide the state share of the cost of water resources development projects being constructed or maintained across the state. The law appropriating these funds requires the Department to make semi-annual reports on expenditures for this purpose. Included is a table outlining the Water Resources Development Grant projects' projected start and completion dates, and obligated funds covering the first and second quarters of FY 2025-2026. The projected start and completion dates are based on the availability of funds provided by the federal partners. Attachment 1 outlines the State and Local program's projects, partners, award amounts, expenditures, and encumbered funds. Attachment 2 provides the projects, project partners, expenditures, and encumbered funds for the Environmental Quality Improvement Program (EQIP), while Attachment 3 provides this information for grants awarded with funds provided through the Division of Mitigation Services Memorandum of Understanding to award funds through the State and Local Program. Several of the projects are not like the typical Capital Improvement projects as they occur every 3-5 years and have a long-term federal project authorization.

These reports were prepared by the Division of Water Resources in the Department of Environmental Quality. If you have questions about these reports, please contact Kevin Hart at 919-707-3607.

Sincerely,

A handwritten signature in black ink, appearing to read 'Kevin Hart', is written over a light blue textured background.

Kevin Hart
