

Figure 6. Length frequency (fork length, inches) of striped mullet collected from Program 915 in Pamlico Sound, Pamlico, Pungo, Neuse and New rivers from August-December (juveniles excluded), 2008–2022. Sampling was not conducted in 2020. Bubbles represent fish at length and the bubble size is proportional to the number of fish at that length.

Figure 7. Striped mullet length at age based on all age samples collected, 1996–2022. Blue circles represent the mean size at a given age while the grey squares represent the minimum and maximum observed size for each age.
