#### NORTH CAROLINA DIVISION OF MARINE FISHERIES

## Annual Fisheries Bulletin

#### 2017 Commercial and Recreational Statistics

License and Statistics Section, PO Box 769, Morehead City, NC 28557

May 2018

Included in this bulletin are the finalized 2017 landings and harvest information from the commercial and recreational fisheries programs, along with the 2013 to 2016 landings for comparison. The bulletin also contains a summary of commercial fishing trips by major gear.

The North Carolina Trip Ticket Program collects commercial fishery landings and effort statistics. This program collects trip level fish dealer reports for all finfish and shellfish landed in the state. Recreational fishery harvest and effort statistics are derived from the Marine Recreational Information Program (MRIP) that conducts recreational angler interviews at public access points and telephone/mail surveys.

A **trip** is defined as the time period beginning when a vessel or fisherman leaves port to conduct fishing activities and ending when that vessel or fisherman returns to land the catch. The duration of a trip can vary from a few hours, as in hand clamming, to several days, as in ocean flounder trawling. An assessment of the number of trips gives an indication of the amount of effort conducted by commercial fishermen within that fishery.

<sup>&</sup>lt;sup>1</sup> Includes long hauls, common seines, and swipe nets

<sup>&</sup>lt;sup>2</sup> A new code to distinguish peeler trawl gear was put into effect in 2010.

<sup>&</sup>lt;sup>3</sup> Includes greenstick trolling, butterfly nets, conch pots, dip nets, purse seines, bay scallop dredges, scallop scoops and trawls, shrimp pots and turtle pots

<sup>&</sup>lt;sup>4</sup> Total trips are not equal to the sum of trips by gear due to multi-gear trips.

#### **Survey Methods**

The survey consists of telephone/mail and on-site angler interviews. Telephone/mail interviews are used to collect data on number of trips, fishing location, and when these trips were made. Information on actual catch (species, number, weight, and length) is collected through on-site angler interviews. Information from both types of interviews is combined to produce estimates of total number and pounds of finfish caught.

#### **Precision of Estimates**

Numbers and pounds presented are estimates, not actual counts; therefore have varying levels of precision.

Coastal recreational fishery statistics are provided through participation in the Marine Recreational Information Program. In North Carolina, this project is supported in part by the U.S. Fish and Wildlife Service through the Sport Fish Restoration Program, Grant F-31.
