Prepare for periodic rule review June 2027

- 13 quarterly meetings left
- What is the process?
 - Rules review committee schedule meetings
 - Partition the review process
 - Develop recommendations
 - Submit to Rules Review Commission
 - in timely manner

Triassic Basins of North Carolina

State Lands Project

Goal is to inventory and classify the NC State Lands occurring within the boundaries of the Triassic Basin.

Product will include:

Triassic Basins Boundaries

Oil and gas wells located within the boundaries

Coal Mines within the boundaries

Total number of state land acres within each basin

Classification of state lands by Department

Identify environmentally sensitive areas

Identify areas that may be suitable for Oil and Gas or Coalbed Methane operations
