Recreational Shellfish Harvest

Shared issue between Hard Clam & Eastern Oyster FMPs

Option 1: Recreational Harvest

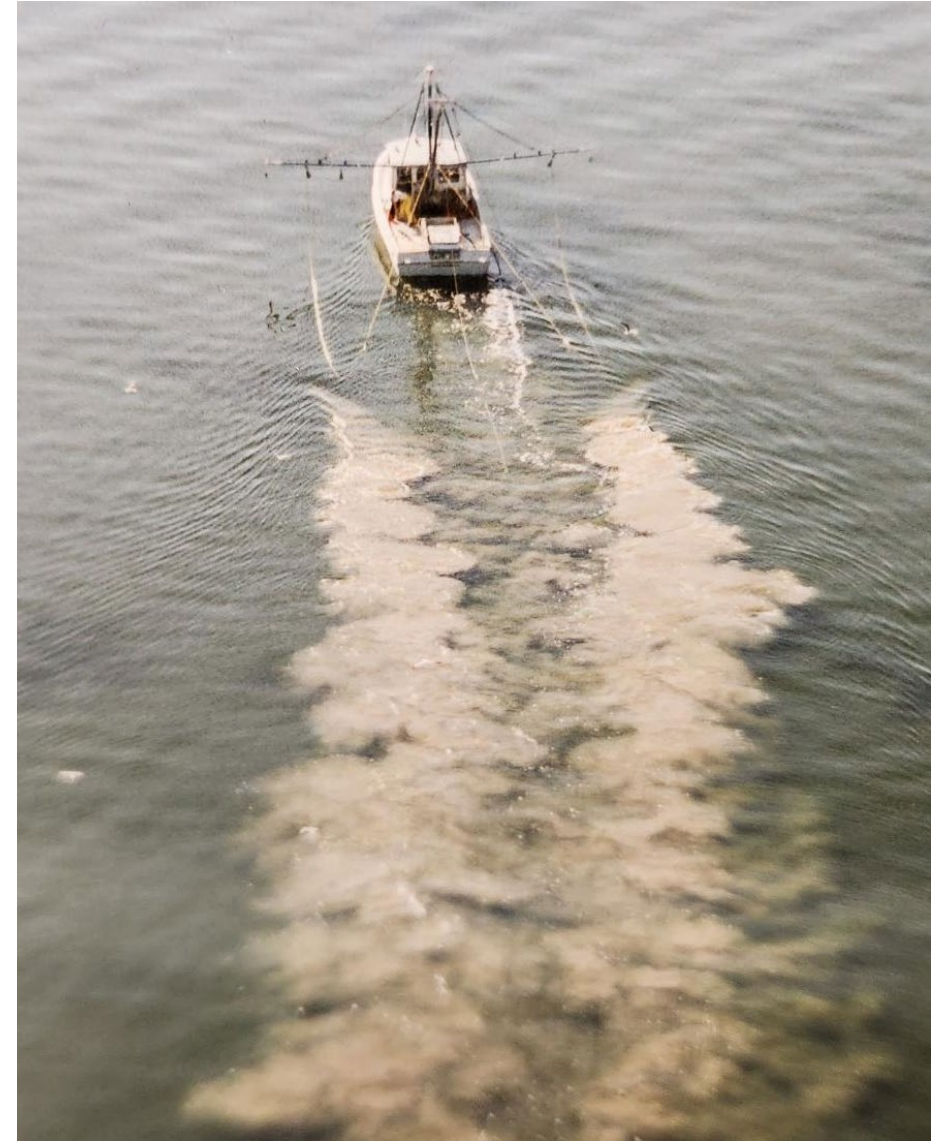

a. Status quo

b. Support the DMF to further explore potential options and develop a solution to estimate recreational shellfish participation and landings, and to establish a mechanism to provide all recreational shellfish harvesters with SSRWQ health and safety information outside of the FMP process.

Mechanical Clam Harvest - Issues and Concerns

- Habitat concerns associated with bottom disturbing mechanical clam harvesting gears
- Participants and trips have declined since the 1990s
 - Lowest levels on record
- State resources
 - Maintenance
 - Monitoring
- Balance between the habitat vs fishery

Management Options & MFC Selections

Option 1: Mechanical Clam Harvest

- a. Status quo
- b. Further limit mechanical clam harvest areas to improve enforceability and protect habitat
- c. Phase out mechanical clam harvest
 - 3-year phase out with contingency triggers prior to 2027
- d. Phase out mechanical clam harvest
 - 3-year phase out with no triggers

Option 2: Mechanical Clam Harvest in Conjunction with Maintenance Dredging

- a. Status quo
