

# Geoscience Education and Outreach

STEP Internship 2026

Location: Raleigh, NC

Division of Energy, Mineral & Land Resources

## Project/Initiative Objective

Assisting the Education and Outreach geologist with the creation of an education workspace in the Archdale building.

## Major Task to be Performed

The intern will assist with setting up display cases with geologic specimens for an education space. Work will include identifying rock, mineral, and fossil specimens, organizing specimens, and creating posters and displays for the education space. The intern will also assist the Education and Outreach geologist with outreach events and, as time permits, assist with development of online resources for the NC Geological Survey.

## Final Product or Outcome Anticipated

The intern will have helped to create a new education space for the North Carolina Geological Survey.

## Desired Knowledge and Skills

Geology/Earth Science knowledge. Rock/mineral identification a plus, not critical. Creativity. Ability to work independently. An interest in education is a plus!

## Academic Major(s) desired:

Geology, Earth Science, Environmental Science

## Travel Required

Yes
