

# Post Construction Stormwater Program Initiative

STEP Internship 2026

Location: Wilmington, NC  
Division of Energy, Mineral & Land Resources

## Project/Initiative Objective

The Post-Construction Stormwater Program protects North Carolina's surface water from water quality impacts due to stormwater runoff. This office has a number of permits spanning three decades with incorrect data that need to be updated or corrected.

## Major Task to be Preformed

Conduct review of permit files. Research the history of construction at the site. Update the database with correct location information, including GPS coordinates, for the site.

## Final Product or Outcome Anticipated

Improve location data associated with permits.

## Desired knowledge and Skills

Ability to work in Word & Excel, navigate a database and project files, and stay organized.

## Academic Major(s) desired:

Environmental science programs or related engineering

## Travel Required

No
