## Section 1. Minimum Requirements

	Yes/No or N/A
1- Does DMS agree with the overall mitigation approach presented? [The Technical Proposal must: A) clearly identify the extent of the proposed easement, B) and buffer zones and C) show all stream channels and concentrated flow paths with stream identifications or ditch designations and subject/non-subject designation].	
2- Does DMS agree with the proposed credit structure(s) described in the proposal? [Are all ROWs or utilities/areas not subject to buffer credit due to infrastructure or property rights clearly identified].	
3- Does DMS agree that there is a high likelihood of success for the proposed work given existing onsite conditions? [Is the soil condition appropriate for proposed plantings, what is the existing hydrology, is the existing vegetation likely to present competition for proposed plantings]?	
4- Does the proposal document compliance with all current NC state buffer rule eligibility requirements?	
An answer of No in this section means the Technical Proposal is rejected. <b>Continue or Reject?</b>	

## Section 2. Functional Uplift Evaluation

Function	Functional Stressor	Functional Uplift Potential					Planning Identified Stressor		
	Check boxes below to identify stressors addressed by proposal.	Complete this section for identified functional stressors <u>ONLY</u> . Select the option that best describes the uplift potential for the majority of the project area.					Check box below if stressor is identified through watershed planning
