

# **North Carolina Department of Environmental Quality**

## **Division of Mitigation Services**

### **Legislative Annual Report**

**November 1, 2024**

This report is submitted to meet the requirements of §143-214.13.

North Carolina Department of Environmental Quality | Division of Mitigation Services  
217 West Jones Street | 1652 Mail Service Center | Raleigh, North Carolina 27699-1652  
919.707.8976

## NC Division of Mitigation Services

The North Carolina Division of Mitigation Services (DMS) is a nationally recognized Department of Environmental Quality (DEQ) initiative that restores and protects wetlands and waterways for future generations while offsetting unavoidable environmental impacts from development. DMS supports environmentally responsible economic development through the procurement of high-quality restoration projects that satisfy mitigation requirements. From the mountains to the coast, DMS has been involved in over 850 projects since its inception that have protected more than four-million feet of stream and 80,700 acres of natural areas.

Protecting North Carolina's natural resources is critical to maintaining the state's quality of life, its economic growth and the health and well-being of its residents. DMS works to ensure that cost-effective mitigation alternatives succeed to benefit the state's water resources.

DMS offers four In-Lieu Fee mitigation programs designed to assist private and public entities in meeting state and federal compensatory mitigation and nutrient offset requirements. DMS maximizes mitigation investments to restore streams, wetlands and riparian buffer areas using a watershed approach by working with state and local partners, willing landowners, and private vendors. The N.C. Department of Transportation (NCDOT) and other developers voluntarily use DMS to move projects forward in a timely and cost-effective manner.

In the fiscal year (FY) 2023-2024, the DMS:

- Assisted the NCDOT in obtaining permits for 52 transportation projects by providing 22,728 stream mitigation credits and 32.230 wetland mitigation credits
- Assisted customers with 178 development projects in the Statewide Stream and Wetland, Riparian Buffer, and Nutrient Offset In-Lieu Fee (ILF) Programs by providing:
  - 20,623.300 stream credits,
  - 97.491 wetland credits,
  - 683,345.000 credits of buffer mitigation (equivalent to 15.69 acres of buffer restoration)
  - 1,201.940 pounds of Nitrogen reduction, and
  - 5,480.930 pounds of Phosphorus reduction.
- The Phosphorus mitigation demand continues to increase while the nitrogen demand continues to decrease over previous fiscal years in the Neuse and Tar-Pamlico River basins.
- Further developed the Natural Infrastructure Flood Mitigation Program (NIFMP) as follows:
  - Contracted with Ecosystem Planning and Restoration, PLLC (EPR) for a hydrologic and hydraulic model quantifying the effect of buffer, stream and wetland restoration on flood attenuation in the Stoney Creek watershed (Neuse River basin). This work will be used to evaluate projects for performance and for project selection in the project procurement process.
  - First two projects in the Stoney Creek Pilot Project are in development, and
  - Awarded additional contract to map and model Carolina Bays for flood mitigation

potential.

- The conceptual plan for the Stoney Creek Pilot project was reviewed by DMS and finalized in July 2023. The first project from this initiative, a stormwater wetland and detention basin, was designed and approved and a second project, a detention pond, was reviewed in August 2024.

## **Natural Infrastructure Flood Mitigation Program**

In 2020, the NC General Assembly created the Natural Infrastructure Flood Mitigation Program (NIFMP) in DMS as part of SL-2079. The session law incorporated flood storage capacity enhancement projects into the activities of and purposes of DMS. The program's purpose is to use natural infrastructure to mitigate flooding in small, targeted watersheds using the DMS full delivery procurement methods. Since the creation of this program, DMS obtained a Community Development Block Grant from the North Carolina Office of Resilience and Recovery to fund the development of the program's goals, complete modeling to study the effect of restoration on flood attenuation, and analyses to determine the best nature infrastructure solutions for North Carolina.

Funding for flood storage projects and flood storage capacity planning was included in the 2021 Appropriations Act. DMS received \$3.5 million in appropriations to create one or more pilot projects addressing chronic flooding in the Stoney Creek watershed impacting businesses, roadways, and access to emergency services in Wayne County and Goldsboro. DMS received \$5 million additional funding during the fiscal year to expand the work in the Stoney Creek watershed.

The Stoney Creek Pilot Project serves as the basis for expanding natural infrastructure flood mitigation projects to additional watersheds and scaling solutions to enhance community resiliency across North Carolina. The NIFMP also seeks to mitigate flooding using natural infrastructure and constructed systems that mimic natural processes.

DMS contracted with Ecosystem Planning and Restoration, PLLC (EPR) to develop hydrologic and hydraulic model quantifying the effect of buffer, stream and wetland restoration on flood attenuation and to develop and design projects. The modeling is complete and the first project, a stormwater wetland and detention basin in the Stoney Creek watershed, has been approved. DMS is working with the landowner to finalize the conservation easement required for implementation. EPR has completed the draft design of the project and has started working on a second project in the watershed, a detention pond.

DMS staff are continuing to review literature on natural infrastructure and nature-based solutions suitable for different areas of the state (coastal, piedmont and mountain). Additional modeling and studies were contracted with Resource Environmental Solutions (RES) to inventory, map and model Carolina Bays to determine restoration and flood mitigation potential.

## **NC Flood Resiliency Blueprint**

The 2021 Appropriations Act provided \$20 million for DMS to develop a Statewide Flood Resiliency Blueprint (NC Session Law 2021-180). The Blueprint is a statewide flood resilience planning effort to serve as the backbone of North Carolina's flood resiliency planning and project decision-making to result in actionable projects. The goal is to make North Carolina more resilient to flooding disasters, by not only limiting the extent and severity of flooding but by building systems that allow communities to recover more quickly and limit future risk. A key outcome is the development of a decision support tool targeted towards local, state, and regional stakeholders and decision-makers, that is interactive, easy to understand and use, and dynamic over time. The tool will help local governments develop, evaluate, and prioritize resilience actions as well as plan and marshal funding to implement those priorities. The Blueprint's goals are to:

- Identify sources and types of flooding.
- Account for existing resilience efforts, programs, and funding sources.
- Inventory data & identify data gaps.
- Develop visualization and decision-making tools that quantify and map flood risk, match appropriate resilience tools and tactics to areas of risk, match available funding sources to specific actions, and prioritize specific actions.
- Make recommendations for statewide implementation, including governance and decision-making structures, future blueprint iteration management, watershed-scale stakeholder engagement, and stewardship of projects that receive state funding.

Phase I of this initiative involved nine months of research and analysis, community outreach, stakeholder engagement and feedback, which produced the Draft Blueprint, Neuse River Basin Flood Resiliency Action Strategy. The draft document was published in March 2024, containing over 30 technical documents describing the analysis results and recommendations from the Gap Analysis. The Blueprint team included over 150 subject matter experts from Federal, State, County, Municipal, and Tribal governments; non-governmental organizations; and universities.

Phase II is underway and focuses on developing a web-based decision support tool known as the North Carolina Flood Resiliency Blueprint Tool (Blueprint Tool). The Blueprint Tool will be publicly accessible, data- and model-driven, GIS-enabled web application designed to aid flood planning and implementation statewide. The Blueprint Tool was beta-tested over a two-week period in April / May 2024. An additional round of testing with over 200 stakeholders was initiated in September 2024.

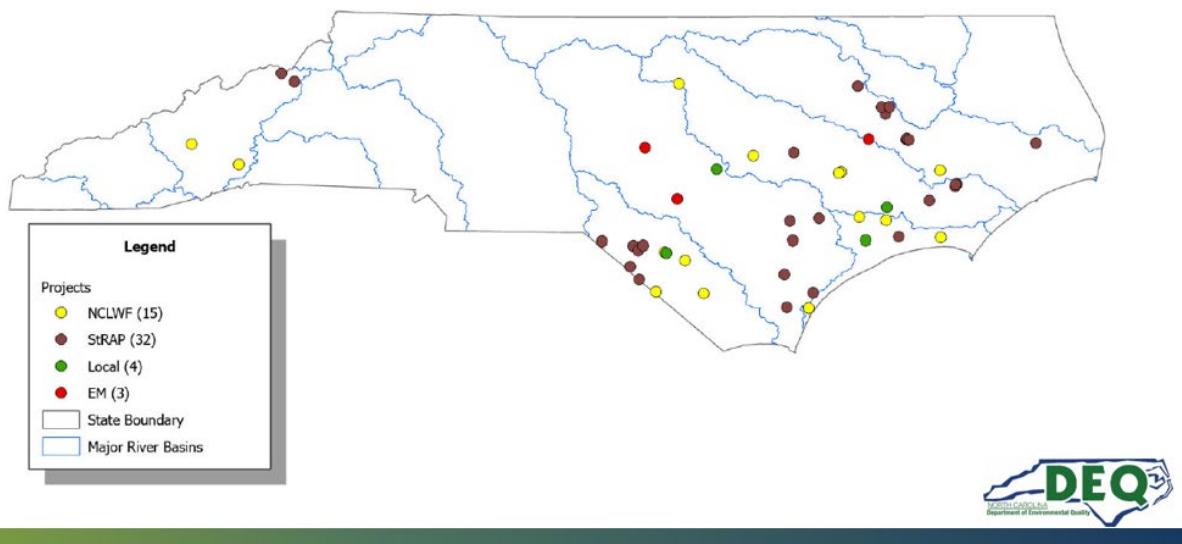

Phase III will apply the Blueprint, the Blueprint Tool (Phase II) and lessons learned from the Neuse River Draft Flood Resiliency Blueprint (Phase I) to the additional river basins specified in legislation. The five additional targeted river basins are Cape Fear, Yadkin, Tar-Pamlico, White Oak and French Broad. DMS's Blueprint Team will work with state and local stakeholders in those areas to implement the Blueprint and Blueprint Tool to develop river-basin-specific action strategies that contain data-driven prioritized structural and non-structural flood resiliency projects for each river basin. Phase III contracts were recently awarded, and a project kick-off meeting is scheduled for November 4, 2024.

DEQ received \$96,000,000.00 to implement flood resiliency projects in specified river basins once the draft Blueprint was completed in December 2023. DEQ has used the Blueprint to identify potential flood resiliency projects that can be implemented before the specific river basin action strategies are completed. The most efficient way to quickly implement flood resiliency projects is to partner with entities (state and local) that already have projects that meet the Blueprint prioritization criteria but are unfunded or underfunded. This allows DEQ to implement more projects more quickly and at a lower cost while developing new projects, capacity, and infrastructure within the Blueprint team. To date, the Blueprint has partnered to implement 54 projects worth over \$40,000,000.00 for just over \$23,000,000.00. Project types include culvert upgrades, pond capacity upgrades, stream restoration, and stream debris removal. Partnership project summaries and a map with the location of the projects are below.

<b>Partner / Source</b>	<b>Amount</b>	<b>Individual Projects</b>
Department of Agriculture - StRAP 2023	\$ 4,721,991.00	32
Department of Natural and Cultural Resources – Land Water Fund (21-23)	\$ 9,047,404.00	15
Direct Funding Local Gov - NCORR Identified Projects	\$ 3,679,476.00	4
NC Emergency Management - 2023 Disaster Relief and Mitigation Fund	\$ 3,910,000.00	3

### *Implementation Strategy – Committed Funds*

Examples of the Blueprint-based project selection criteria include:

- Ability to reduce risk to human life
- Ability to reduce flood impact on critical community infrastructure (e.g., emergency facilities, evacuation routes, and utilities)
- Ability to reduce flood damage to other infrastructure, homes, businesses, etc.
- Whether the projects had been identified in a Hazard Mitigation or other Resilience Planning efforts
- Whether the projects are in a high-risk area
- Likelihood of reducing flood risk to underserved communities
- Whether the projects serve additional public benefit (e.g., parks, trails, etc.)
- Whether the project clearly had a flood resiliency benefit, even without additional data collection, modeling and analysis
- Stakeholder support

Other projects are in development. They will be implemented through DMS Request for Proposals and project management and state, local, private, public, and nonprofit partnerships.

### **Statewide Stream and Wetland Mitigation Losses and Gains**

G.S. §143-214.13 requires DMS to document statewide wetland losses and gains and compensatory mitigation performed under G.S. §143-214.8 through G.S. §143-214.12. The data in **Table 1** below have been provided by the Division of Water Resources (DWR) and reflect permitting by the DEQ. The remainder of this report documents DMS compensatory mitigation.

**Table 1. Permitted Stream, Wetland, and Buffer – Losses and Gains\***

<b>DWR Fiscal Year 7/1/2023 through 6/30/2024</b>	
<b>Streams (Linear Feet)</b>	<b>YTD</b>
Lost from Permitting	30,177.00
Gained from permitting (mitigation)	22,763.00
<b>Wetlands (Acres)</b>	<b>YTD</b>
Lost from Permitting	60.20
Gained from permitting (mitigation)	46.00
<b>Riparian Buffers (Acres)</b>	<b>YTD</b>
Lost from Permitting	19.423
Gained from permitting (mitigation)	9.436

\*Data is from the DWR database. Due to permit processes, mitigation and impacts may not (usually do not) occur in the same quarter. Data may include impacts to resources that do not require mitigation (under required thresholds, for example). Due to versions and revisions,

different versions of the same project may occur in the same reporting period, causing a double calculation of impacts. As of May 4, 2017, the stream mitigation threshold requirements changed. Only impacts 300 linear feet or greater of perennial stream require mitigation. As of June 15, 2020, the wetland mitigation threshold requirements changed. Impacts 0.10 acre or greater of wetlands require mitigation. Mitigation required by the U.S. Army Corps of Engineers applicable to permitted impacts is not tracked by DWR.

### **Property Inventory**

During the 2023-2024 fiscal year, the State Property Office closed 27 conservation easement transactions totaling more than 418 acres associated with DMS's projects. A complete listing of the properties closed this fiscal year is shown in **Appendix A-1**.

Since the program's inception, more than 80,700 acres of conservation land or conservation easements have been acquired by DMS and its partners. A complete inventory of all properties associated with DMS projects acquired to date is presented in **Appendix A-2**.

### **Accounting of Receipts and Disbursements of the Ecosystem Restoration Fund**

The Ecosystem Restoration Fund is the account for the Statewide Stream and Wetland ILF Program. This program has two main accounts, Fund 205451 (formerly 2981) and Fund 205201 (formerly 2937). **Table 2** below shows the program financials for the 2023-2024 fiscal year.

**Table 2. Statewide Stream and Wetland ILF Financials**

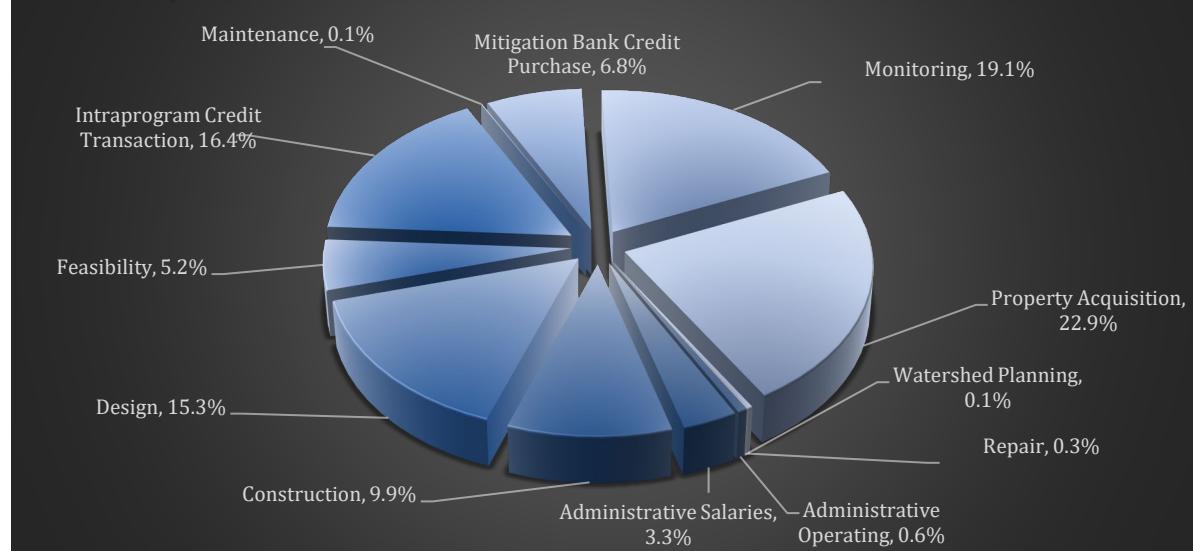

<b>Beginning Cash</b>	<b>\$108,829,086.46</b>
Revenues	\$30,805,327.65
Expenditures	\$16,147,238.16
Long Term Investments Pool (Pensions)	\$500,000.00
Equity Index Fund	\$2,500,246.18
Bond Index Fund	\$156,047.19
<b>Ending Cash and Cash Equivalents</b>	<b>\$126,643,469.32</b>

In fiscal year 2023-2024, DMS accepted 120 new customer ILF payments into the Statewide Stream and Wetland Program, totaling \$22,742,152.50. These 120 customer payments represent 105 development projects, 20,623.300 stream credits and 97.491 wetland credits. **Appendix B** provides Statewide Stream and Wetland Program fiscal year 2023-2024 receipts and requirements.

**Figure 1** below summarizes the Ecosystem Restoration Fund expenditures by payment type for the Statewide Stream and Wetland Program. A detailed breakdown of the expenditures is in

**Appendix C. Figure 1. Statewide Stream and Wetland ILF Expenditures by Payment Type**  
**\$16.147 Million Total Fiscal 2023-2024**

### **Mitigation Bank Credit Costs**

Reporting requirements of G.S. §143-214.13 require DMS to compare project costs with private mitigation bank rates. For this analysis, DMS used the actual submitted prices for mitigation bank credits from requests for bids in the last fiscal year. **Table 3** shows the range in prices for mitigation bank credits in 2023-2024 fiscal year. A complete list of purchased bank credits during 2023-2024 is listed in **Appendix D**.

**Table 3. Mitigation Bank Prices in 2023-2024**

MITIGATION TYPE	RANGE OF BANK PRICES PER CREDIT
Stream Mitigation Credits	\$520.00 to \$787.00
Riparian Wetland Mitigation Credits	\$50,000.00 to \$125,000.00
Non-Riparian Wetland Mitigation Credits	\$55,000.00 to \$80,000.00
Coastal Marsh Mitigation Credits	None Submitted
Riparian Buffer Mitigation Credits	\$0.89 to \$4.95
Nitrogen Offset Credits	\$9.25 to \$180.00
Phosphorus Offset Credits	\$1.25 to \$660.00

## **DMS Mitigation Costs**

Recent DMS credit costs were summarized by analyzing full delivery contracts and mitigation bank purchases that DMS awarded over the last three fiscal years. **Table 4.** includes project contracts, administration, overhead, and other costs required to complete these projects. The mitigation bank rates from the annual IFB requests for the last three years are also summarized. Note that DMS did not contract for any coastal marsh wetland projects in the last three years.

**Table 4. Recent DMS Program Rates and Credit Costs**

MITIGATION TYPE	DMS PROGRAM RATES*	RANGE OF BANK PRICES PER CREDIT
Stream Mitigation	\$603.87 - \$740.09	\$425.00 to \$787.00
Freshwater Wetland	\$67,442.06 - \$152,707.36	\$41,419.00 to \$125,000.00
Coastal Marsh Wetland	\$560,000	None Submitted
Riparian Buffer	\$1.03 – 6.16	\$0.85 - \$4.95
Nutrient Offset – Nitrogen	\$9.83 – \$133.96	\$9.24 - \$180.00
Nutrient Offset – Phosphorus	\$138.78 - \$640.31	\$1.25 - \$675.00

\* DMS In-Lieu Fee Program mitigation rates are set using the Actual Cost Method, which is a full cost accounting method and may result in premium rates in high-cost watersheds.
