Cabarrus County, North Carolina	Region 4	\$ 122,886	14	
Union County, North Carolina	Region 4	\$ 114,368	13	

Note: the following language will appear in IJA contracts:

County unit allocations are calculated based on a formula, including key factors such as climate, households in poverty, and energy burden. This formula mirrors the Department of Energy's allocation of IJA funds to States. The subgrantee may request in writing to have a county's production target adjusted, including an explanation of the rationale for the request and demonstrating a good faith effort in reaching the 'hard-to-reach' population before requesting an adjustment. SEO will need to have data to justify the adjustment. Upon approval from the IJA Program Manager (or designee), changes shall become effective.
