MEMORANDUM

TO: ENVIRONMENTAL REVIEW COMMISSION
The Honorable Brent Jackson, Chair
The Honorable Mike Hager, Co-Chair

FROM: Matthew Dockham, Director of Legislative Affairs

SUBJECT: 2015 Dry-Cleaning Solvent Cleanup Program Report

DATE: November 18, 2015

Pursuant to G.S. § 143-215.104U, the Secretary shall present an annual report to the Environmental Review Commission that shall include at least the following:

- (1) A list of all dry-cleaning solvent contamination reported to the Department.
- (2) A list of all facilities and abandoned sites certified by the Commission and the status of contamination associated with each facility or abandoned site.
- (3) An estimate of the cost of assessment and remediation required in connection with facilities or abandoned sites certified by the Commission and an estimate of assessment and remediation costs expected to be paid from the Fund.
- (4) A statement of receipts and disbursements for the Fund.
- (5) A statement of all claims against the Fund, including claims paid, claims denied, pending claims, anticipated claims, and any other obligations.
- (6) The adequacy of the Fund to carry out the purposes of this Part together with any recommendations as to measures that may be necessary to assure the continued solvency of the Fund.

Please consider the attached as the formal submission of this report. If you have any questions or need additional information, please contact me by phone at (919) 707-8618 or via e-mail at matthew.dockham@ncdenr.gov.

DRY-CLEANING SOLVENT CLEANUP ACT 2015 ANNUAL REPORT

Executive Summary

As required by the Dry-Cleaning Solvent Cleanup Act (DSCA) of 1997 and amendments (G.S. 143-215.104A *et seq.*), this report provides an annual update on activities conducted in the DSCA program in fiscal year FY 2014-15. The DSCA of 1997 and its amendments created a fund for assessment and cleanup of dry-cleaning solvent environmental contamination at dry-cleaning and wholesale distribution facilities and also authorized the program to develop and enforce rules relating to the prevention of dry-cleaning solvent releases at operating facilities.

Since the start of the DSCA program, 422 sites with known or suspected dry-cleaning solvent contamination have been reported to the N.C. Department of Environment and Natural Resources' (DEQ) Division of Waste Management (DWM). Of these, 361 have been certified into the DSCA Program.

During FY 2014-15, the DSCA program continued to make significant progress in all aspects of program implementation. The following fiscal year accomplishments are noted for site remediation, protection of human health, and prevention of future releases:

- Nine sites were issued No Further Action (NFA) Notices, with 33 sites identified as ready for NFA status.
- Seven residences were provided with temporary clean water supplies, and three of these were connected to municipal water (at four DSCA sites).
- One business was provided with a sub-slab vapor control system due to migration of contaminant vapors into a building.
- Conducted soil cleanups at six sites and initiated groundwater remediation at one site.
- Conducted 354 full compliance inspections at 339 active dry-cleaners.
- Eleven outreach visits were performed to educate and assist new business owners/operators with environmental compliance.
- Delivered 380 compliance calendars to assist with record-keeping requirements.

The DSCA Fund continues to be solvent, with a fund balance of approximately \$6.1 million and encumbered funds totaling \$3.1 million. The decrease in the fund balance over last year is attributed to an increase in expenditures to address the increased number of sites, to assess vapor intrusion and mitigate as needed, and to continue to assess and remediate certified sites to ensure the protection of human health. As the fund balance decreases, control measures are being implemented to help ensure that funds are available to address sites that pose greater potential risks. The program is using its resources efficiently, and expenditures are being closely monitored to ensure adequate funding is maintained. Based on an average site cleanup cost of \$330,000, it will take approximately \$120 million to address the 361 sites that have been certified in the program.

Program Activity

The General Assembly enacted DSCA to: 1) clean up contamination from dry-cleaning solvents at both retail dry-cleaners and wholesale solvent distribution sites and 2) protect human health and the environment by preventing future dry-cleaning solvent contamination. DEQ made significant progress during fiscal year FY 2014-15 in implementing the cleanup and compliance components of DSCA.

Site Cleanups

During the past fiscal year, DWM focused on assessment and remediation of sites with contamination from dry-cleaning solvents. DWM continued to implement initiatives to ensure protection of human health by mitigating vapor intrusion (indoor air pollution from solvent contamination in the soil or groundwater) and providing clean water supplies to residents and businesses. During FY 2014-15, DWM staff and the program's five independent contractors performed the following activities:

- screened sites for imminent hazards such as threatened water supply wells and vapor intrusion into buildings
- abated indoor vapor hazards from contaminated soils and groundwater
- provided temporary and permanent clean water supplies
- conducted comprehensive site assessments delineating extent of contamination
- remediated contaminated soil
- remediated contaminated groundwater
- evaluated site risks and prepared sites for closure

Sites in the Program

Table 1 provides current statistics for sites certified into the DSCA program. A site becomes certified when a petitioner enters into an assessment and remediation agreement with DWM. A list of certified sites, along with current site status, is shown in Appendix A.

Rules that establish a risk-based approach to assessing and cleaning up certified sites in the DSCA Program became effective on Oct. 1, 2007. These rules and associated guidance allow program staff to determine the risk posed to human health and the environment at each site and, if necessary, to calculate the appropriate cleanup levels for soil and groundwater.

During FY 2014-15, DWM issued No Further Action (NFA) Notices for nine contaminated dry-cleaning sites in the DSCA Program, bringing the total to 51 DSCA sites that have been given NFA status since the risk-based rules became effective in October 2007. DWM is recommending no further action at an additional 33 DSCA sites ("Sites Pending Closure" in Table 1). The program anticipates issuing 8-12 NFA Notices in the coming fiscal year. Preparing a site for No Further Action involves complete assessment of the extent and magnitude of contamination, evaluation of the risks posed by the contaminants, mitigation of any unacceptable risks, site remediation as needed, ensuring stability of the groundwater contaminant plume, preparation of a risk management plan, public involvement, and

recording of notices to ensure that site conditions remain protective. In accordance with DSCA statutes, the program provides the proposed risk management plan and associated notices to the appropriate local governments (counties and municipalities), and announces the availability of the plan to the public through local newspapers, direct mailings to property owners on or adjacent to the contamination site, and by posting a notice at the site.

Table 1. Cumulative DSCA Site Statistics (through June 30, 2015)

Certification Status	Number	Percent of Total
Contaminated Sites	422	---
Sites Certified	361	85.5 %
Sites Determined Ineligible	4	1 %
Sites not Certified	57	13.5 %
<i>Site Status</i>		
Sites Certified	361	---
Certified Sites in Assessment/Remediation	277	77 %
Certified Sites Pending Closure	33	9 %
Certified Sites Closed	51	14 %
<i>Site Classification of Certified Sites</i>		
Abandoned	234	65 %
Wholesale Distribution	2	0.5 %
Operating	125	34.5 %
<i>Size Distribution of Operating Sites</i>		
Small Size (1-4 employees)	62	49.5 %
Medium Size (5 - 9 employees)	37	29.5 %
Large Size (> 10 employees)	26	21 %

Table 2 provides a summary of actions undertaken to address direct threats to human health and the environment. During FY 2014-15, DWM provided temporary clean water to seven residences and completed municipal water connection for three of those residences. The program is working with owners and municipalities to provide public water supplies to the other four residences. In total, DWM has provided municipal water to 59 residences and 11 businesses that have had their water supply wells impacted or threatened by dry-cleaning solvent contamination from 17 DSCA sites.

Addressing indoor air pollution from tetrachloroethylene (PERC) releases continues to be a high priority, since many DSCA sites have occupied structures on or adjacent to PERC contamination. The program has identified a number of buildings where soil and/or groundwater contamination has produced unacceptably high concentrations of PERC vapor in indoor air that required mitigation. During FY2014-15, DWM installed vapor mitigation systems at one business to control unacceptable vapors caused by releases at one DSCA site. Since 2006, DWM has installed vapor control measures at 59 businesses and 13 residences as a result of dry-cleaning solvent contamination from 46 DSCA sites.

Many DSCA sites require soil and groundwater cleanup to protect human health and the environment. In order to remove contaminant sources that threaten indoor air in buildings and cause further degradation of groundwater, DWM conducted soil remedies (such as excavation, treatment, and soil-vapor extraction) at six DSCA sites. During FY2014-15, the program monitored the effectiveness of groundwater remedies at 20 DSCA sites, maintained groundwater remediation systems at two sites, and initiated groundwater remediation at one site. Over the life of the DSCA Program, DWM has implemented 85 soil cleanup actions at 77 DSCA sites, and conducted 59 groundwater cleanup actions at 46 DSCA sites.

Table 2. DSCA Site Cleanup Statistics

Accomplishments	FY 2014-15	Cumulative
<i>Water Supply Provided</i>		
Municipal Water Supplied - residences	3	59
Municipal Water Supplied - businesses	-	11
Temporary Water Supplied - residences	7	31
Temporary Water Supplied - businesses	-	6
# of DSCA sites involved	4	17
<i>Vapor Intrusion (VI) Mitigated</i>		
VI Control System Installed - residences	-	13
VI Control System Installed - businesses	1	59
# of DSCA sites involved	1	46
<i>Remediations Implemented</i>		
# of DSCA Soil Remediations Implemented	6	85
# of DSCA sites involved	6	77
# of DSCA Groundwater Remediations Implemented	1	59
# of DSCA sites involved	1	46

Site Prioritization System

DSCA requires that site cleanup disbursements be made on higher priority sites first. Recent information obtained from the program’s vapor intrusion investigations indicates that this type of direct human exposure is occurring at a number of DSCA sites. To ensure that this particular health concern receives appropriate attention, the program has revised its prioritization method to include potential indoor air threats. Due to the growing number of DSCA sites and the complex nature of assessing and remediating PERC contamination, the DSCA program continues to evaluate and implement cost efficient measures to help ensure solvency of the Fund.

Vapor Intrusion Guidance

Among states with dry-cleaning programs, the NC DSCA Program has continued to work at the forefront in addressing vapor intrusion (VI) issues at dry-cleaning solvent-contaminated sites. Due to the volatility of PERC, one of the most common dry-cleaning solvents, the potential for vapor intrusion exists at many dry-cleaning sites. The DSCA program has shared

its large library of North Carolina vapor intrusion data with EPA to supplement data they use to establish attenuation factors and screening levels

Investigation of Potential New Sites

An amendment to DSCA that went into effect in 2007 allows the program to spend up to one percent of the DSCA fund balance each year to identify active and abandoned dry-cleaning sites that the program believes may be contaminated. If dry-cleaning solvent contamination is found, the potential responsible party is given the choice of entering the program as a petitioner or allowing the site to be addressed under the Inactive Hazardous Sites program. If they choose the latter, the responsible party may be required to reimburse the DSCA Program for all of the investigation costs. Since 2007, the program has initiated limited investigations at 83 sites with potential dry-cleaning solvent contamination. Fifty-seven of those sites have petitioned and been certified into the DSCA Program.

The program partners with other agencies to identify new sites across the state. Data provided by DEQ's Inactive Hazardous Sites, Underground Storage Tank, Brownfields, Public Water Supply, and municipal environmental programs reveal monitoring wells and supply wells with contaminants that may have originated from dry-cleaning operations. The DSCA staff compare the locations of contaminated wells to the locations of more than 2,000 active and abandoned dry-cleaning facilities to help identify sites where the one percent investigative allowance may help locate a contaminant source.

Identified Contamination Sites

A total of 422 sites known or suspected to be contaminated by dry-cleaning solvents have been reported to the Department. To date, DSCA has certified 361 of these sites into the program, as noted in Table 1. Appendix A lists, by county, the sites with known or suspected dry-cleaning solvent contamination reported to the Department, and the sites certified in the program. During FY 2014-15, DSCA certified 12 new sites into the program, and one of these was identified as a contaminant source with the program's one percent investigation allowance. As noted above, the program anticipates that additional contamination sites will be identified using the one percent investigative allowance in FY 2014-15.

DSCA Contracts

The program currently manages five contracts with state-lead environmental engineering firms, with a total end-of-fiscal year encumbrance of approximately \$3.1 million pending. The contracts establish terms and conditions under which qualified environmental engineering firms assess and remediate contaminated dry-cleaning sites in the DSCA program.

Customer Service Initiatives

During FY 2014-15, the program continued to promote the DEQ mission of excellent customer service by making public records more accessible, providing easy access to DSCA site locations, engaging communities affected by dry-cleaning solvent contamination, and sharing

program updates with interested stakeholders on a regular basis. The program uses its website to host a wide variety of information including, but not limited to maps, public records access, forms, rules and statutes, updates on sites of interest, stakeholder meeting information, and staff contact information.

Public Records

Improving the accessibility to public records has been a high priority for all DWM programs. To date, all of the DSCA cleanup program's current and legacy records have been digitized, and the frequently requested document types have been uploaded to the CARA document management system. CARA is available to the general public through DEQ's and DWM's websites and allows users the ability to search and download public records.

Site Location Information

The availability of site location information is not only important to the general public, but also to many decision makers, including property buyers and sellers, lenders, municipalities, and state and local environmental programs. The program continues to maintain location data on a web-based map viewer on the DWM portal. In addition, the program has been consistently supported and been involved in the development of DWM's Ground Water Decision Support System (GWDSS), which is capable of managing a wide variety of environmental and locational data.

Information Sessions and Presentations

During FY2014-15, the DSCA program held public information sessions for two sites in Durham, one site in Burlington, and one site in Wilmington. These sessions were held to provide the interested citizens with site specific information about assessment and remediation activities conducted at DSCA sites in their community. DSCA staff also made presentations at the Air & Waste Management Associations Vapor Intrusion Conference, the Association of State and Territorial Solid Waste Management Officials, and the Manufacturing Alliance's Health and Safety School. The program's outreach efforts focus on educating local citizens on vapor intrusion, explaining assessment and cleanup goals, and addressing questions and concerns, and have been well-received.

Stakeholder Meetings

The DWM continues to encourage stakeholder involvement in the DSCA program. The existing stakeholder group is comprised of representatives from the dry-cleaning industry, environmental organizations, attorneys, environmental consultants, and the public. Program representatives hold semi-annual meetings to report on accomplishments and initiatives, to solicit feedback on topics that affect the program, and to present remediation projects of interest to the attendees.

Facility Compliance

The Environmental Management Commission has been authorized under the Dry-Cleaning Solvent Cleanup Act to develop rules that operating dry-cleaning facilities must follow to prevent environmental contamination by dry-cleaning solvents. Currently, the DSCA Program has five inspectors performing outreach visits, inspections, and enforcement at dry-cleaning facilities and wholesale distribution facilities across the state.

In addition to the program's Minimum Management Practices (MMP) regulations, enforcement authority is delegated to the DWM for violations of applicable air quality rules, and the Hazardous Waste Section has granted authority to the DSCA Compliance Program to inspect dry-cleaners for compliance with the Resource Conservation and Recovery Act (RCRA) Hazardous Waste regulations. This allows one program in DEQ to ensure compliance with all environmental regulatory requirements and gives dry cleaners and the public a single DEQ point-of-contact for compliance questions or concerns.

Educational Assistance Visits

During FY 2014-15, DWM inspectors conducted eleven educational assistance visits at active dry-cleaning facilities. To date, DSCA inspectors performed 764 educational outreach visits at active dry-cleaners, many of which had not previously been inspected by a DEQ program. This outreach trains owners and operators regarding the MMPs, hazardous waste, and air quality regulations. Inspectors also use these visits to thoroughly document all compliance issues that are observed.

Inspections and Enforcement

DSCA conducts unannounced, full compliance inspections at dry-cleaning facilities and wholesale distribution facilities to ensure that dry-cleaning facilities are compliant with all applicable regulations. In setting inspection priorities, the program considers multiple factors including, but not limited to facility specific compliance history, business owner/operator changes, emerging solvents or equipment, and regulatory changes at the federal, state, or municipal level. During FY 2014-15, DSCA conducted 354 full inspections at 339 active dry-cleaning facilities. Violations identified included failure to install spill containment under dry-cleaning machines and waste solvent storage areas, failure to seal waste solvent containers, failure to inspect dry-cleaning equipment, and failure to record and maintain National Emission Standards for Hazardous Air Pollutants (NESHAP) recordkeeping logs. Using DEQ's tiered approach to enforcement, DWM issued civil penalties to three dry-cleaning facilities for on-going violations, resulting in penalties totaling \$15,355.00.

To be eligible to participate in the DSCA cleanup program, all operating dry-cleaning facilities and wholesale distribution facilities must be compliant with the DSCA MMPs. DSCA staff inspect active facilities seeking entry into the cleanup program and those that are already certified to ensure that DSCA cleanup funds are being used at facilities where owners and operators are diligent about preventing dry-cleaning solvent releases.

Additional Compliance Outreach

The DSCA compliance program continues to evaluate and implement program enhancements to improve compliance rates among the regulated community.

Since 2007, the DSCA program has produced a PERC compliance calendar that provides all applicable rules, recordkeeping, guidance and reference information in one document for the convenience of facility owners and operators. The calendars include instructions in Spanish and Korean. The program mailed or hand-delivered 380 PERC compliance calendars to PERC dry-cleaning facilities across the state for the 2015 calendar year. The calendar has received positive reviews from both dry-cleaners in North Carolina and industry officials in other states, where it has been praised for its comprehensive scope and functionality.

At the beginning of FY 2014-15 the program hired an inspector who speaks Korean fluently and translates outreach materials and regulations to better serve our regulated community. Reducing language and cultural barriers is expected to improve education and compliance among Korean-speaking owners and operators of dry-cleaning facilities. The Korean-speaking members of the dry-cleaning community have responded very positively to the new inspector, and during the next fiscal year we anticipate observing improved compliance rates. The program continues to evaluate ways to better enable compliance among all the dry-cleaners and wholesale distribution facilities in North Carolina.

Program Financial Status and Projections

Fund Receipts and Disbursements

The primary funding sources for the dry-cleaning solvent cleanup fund are a tax on dry-cleaning solvents, the state portion of the current sales tax on dry-cleaning, and co-payments from petitioners participating in the cleanup program. Disbursements consist primarily of payments to the program's independent contractors for site assessment and remediation, reimbursements to petitioners for past-cost claims and program administration costs.

DSCA Fund through FY 2014-15

	<u>FY 2014-15</u>	<u>Duration of Program (through 6/30/15)</u>
<u>Receipts</u>		
Solvent Tax Revenue	\$ 235,437.18	\$ 11,469,501.35
Sales Tax Revenue	7,778,988.80	95,461,758.58
Petitioner Payments	163,971.93	1,384,766.95
Miscellaneous (file copying)	15.00	386.93
Rebate	0	28,794.34
Interest	<u>3,293.40</u>	<u>7,522,262.17</u>
Total	\$ 8,181,706.31	\$ 115,867,470.32
<u>Disbursements</u>		
Dept. of Revenue ¹	\$ 0	\$ 57,272.02
Petitioner Reimbursements	0	1,963,991.89
Contracts	9,452,666.44	84,635,082.97
Well Permit Fees	52,640.00	292,530.00
Hazardous Waste Fees	124,099.50	1,237,003.41
Transfer to Inactive Haz Sites	0	400,000.00
Transfer to Green Square Project	0	1,291,035.00
Transfer – Budget Shortfall	0	6,475,812.93
DEQ Administration	<u>1,310,027.46</u>	<u>13,435,953.13</u>
Total	\$ 10,939,433.40	\$ 109,788,681.35
	Fund Balance	\$ 6,078,788.97
	Funds Encumbered in Contracts	\$ 3,155,544.83

¹ Represents the actual amount charged by the Department of Revenue for its expenses. The Department of Revenue is authorized by DSCA to charge no more than \$125,000 per year.

Estimated Future Assessment and Remediation Expenditures

During FY 2014-15, fund expenditures directly related to implementation of DSCA decreased from the previous fiscal year (see DSCA-Related Disbursements in Table 3 and Figure 1). As the fund balance decreases, the program continues to implement control measures to help ensure that funds are available to address sites that pose greater potential risks. DSCA closely monitors program expenditures to ensure adequate funding is maintained to assess all sites, perform mitigation and remediation activities when needed, and move sites toward closure. Site work expenditures have reduced the fund balance from its peak of \$37.6 million in 2008 to \$6.1 million in 2015. For FY2014-15, solvent tax receipts, sales and use tax receipts, and account interest were lower than the prior fiscal year, but petitioner payments were greater such that the total receipts for FY 2014-15 were approximately the same as for FY2013-14. Fund receipts for the past six years have been relatively stable, ranging between approximately \$8- 9 million per year. During FY2014-15, legislative changes to the DSCA statutes re-directed the interest from the DSCA Fund back into the General Fund.

Table 3: Historic DSCA Fund Statistics

Fiscal Year	Receipts	Total Disbursements	DSCA-Related Disbursements	Fund Balance
2004	9,487,233.94	489,024.96	489,024.96	13,547,987.50
2005	9,660,612.84	1,806,911.93	1,806,911.93	21,401,688.41
2006	9,913,615.29	2,126,835.62	2,126,835.62	29,188,468.08
2007	10,687,669.06	4,184,051.63	4,184,051.63	35,692,085.50
2008	10,307,477.83	8,413,240.75	8,413,240.75	37,586,322.59
2009*	9,513,473.12	22,818,089.84	14,803,890.84	24,281,705.87
2010*	8,147,167.40	16,812,337.01	16,808,702.01	15,658,644.76
2011*	8,627,803.92	11,371,154.52	11,222,140.59	12,915,294.16
2012	9,124,256.44	8,208,478.47	8,208,478.47	13,859,866.72
2013	8,580,621.94	9,835,705.15	9,835,705.15	12,604,783.26
2014	8,190,699.90	11,958,967.35	11,958,967.35	8,836,516.06
2015	8,181,706.31	10,939,433.40	10,939,433.40	6,078,788.97

* Difference in Total Disbursements and DSCA-Related disbursements due to Non-DSCA related fund transfers

Figure 1: DSCA Fund Trends

Based on national estimates of total average costs to clean up contaminated dry-cleaning sites, the program can project the estimated costs to address the sites currently certified in the DSCA program. Using an estimated average total cleanup cost of \$330,000 per site, it will take approximately \$120 million (not including DEQ’s administrative costs) to address the 361 sites that have been certified in the program. Based on data from the N. C. Department of Labor, there are at least 2,000 active and abandoned dry-cleaning facilities in the state. Investigations

performed across the nation indicate that contamination is present in about 75 percent of all dry-cleaning operations.

DSCA Administrative Costs

According to DSCA, up to 20 percent of annual revenues deposited into the fund may be used by DEQ and the North Carolina Attorney General's Office to administer the program. The decline in annual receipts since 2008, combined with the growth of the program, had resulted in the administrative costs-to-revenue ratio increasing to a peak of 16.7 percent in FY 2009-10 and FY 2010-11. The current administrative cost-to-revenue ratio is at 16.0 percent, and is expected to increase slightly as revenues from interest and solvent taxes continue to slowly decline.

Actions to Ensure Fund Solvency

From 2008 until 2011, the increased expenditures on site cleanups had substantially reduced the fund balance (Figure 1). During FY 2013-14 and FY 2014-15, the program experienced an increase in the number of sites petitioning into the cleanup program, along with an increase in vapor intrusion-related assessment and mitigation. The Fund balance is currently at \$6.1 million, and as demonstrated during previous years, the program continues to closely monitor and adjust expenditures to ensure that funds are available to address sites certified in the DSCA program through a prioritization strategy to help ensure that sites requiring remediation are addressed in priority order while maintaining fund solvency.

As noted above, total collections for fiscal 2014-15 were approximately \$8.2 million. The fund has a balance of approximately \$6.1 million, with monies encumbered or pending encumbrance totaling \$3.1 million. The DSCA Fund is solvent.

DSCA Site Status Definitions

- Certified:** The DSCA program has entered into an agreement with a petitioner and is in the process of assigning a state-hired, independent environmental contractor to conduct a prioritization assessment.
- Assessment:** The DSCA program's independent environmental contractor is determining the extent of soil and groundwater contamination at the site.
- Monitoring:** The DSCA program's independent environmental contractor is monitoring the levels of contaminants in the groundwater at the site.
- Remediation:** The DSCA program's independent environmental contractor is performing cleanup at the site.
- Interim Action:** Site conditions are favorable for source removal or for conducting a pilot study for remediation.
- Emergency:** The DSCA program has determined there is an immediate need for corrective action to abate a potential hazard to human health or the environment.
- On Hold:** Please contact the site's project manager for more details.
- Closure:** The extent of contamination is defined and considered stable. The DSCA Program is developing and implementing a risk management plan to protect human health and the environment from remaining contamination.
