Dear Mr. Gallagher:

S&ME, Inc. (S&ME) is submitting this report summarizing the results of the Remedial Investigation activities conducted at the above-referenced site in Charlotte, North Carolina. S&ME completed this investigation in general conformance with S&ME Proposal No. 215952B, Revision 1 dated March 28, 2024, for Task Order 807FP and under the terms of Contract Number N42621-B, dated January 4, 2022, between NCDEQ and S&ME.

Please call us at 919-872-2660 with any questions or comments.

Sincerely,

S&ME, Inc.

1.0 Summary of Current Scope of Services

S&ME, Inc. has completed the First Phase Remedial Investigation (RI) at the Southside Park Landfill in Charlotte, North Carolina. Our services were performed in general conformance with S&ME Proposal No. 215952B, Revision 1 dated March 28, 2024, for Task Order 807FP, which included the following tasks:

- Preparation of an RI Work Plan and Cost Estimate;
- Historical Use Research;
- Water source survey;
- Property lines and zoning;
- Sensitive environments survey;
- Description of local geologic and hydrogeologic conditions;
- Geophysical Survey;
- Above Ground Vapor Survey;
- Report preparation.

S&ME's services were performed in general accordance with the North Carolina Department of Environmental Quality (NCDEQ), Inactive Hazardous Sites Program guidance documents: *Guidelines for Assessment and Cleanup of Contaminated Sites*, *Guidelines for Addressing Pre-Regulatory Landfills and Dumps* and S&ME's approved *Standard Operating Procedures and Quality Assurance (SOP/QA) Manual*, previously approved by NCDEQ.

2.0 Site and Project Description

Background information about the site was provided by NCDEQ and accessed through Laserfiche.

Southside Park Landfill opened during the 1920s and closed in the mid-1950s according to the Site Summary Report conducted by Schnabel Engineering South, P.C. Southside Park is located on top of the original disposal area. The ground surface of the park area slopes relatively upward toward the north. A comparison of the topography from the 1907 USGS 7.5-minute topographic quadrangle map (20 foot contours) with the 2009 topographic map from NCDOT (20 foot contours), indicates that disposal material has filled in the northern part of the Disposal Area up to 10 feet and material has been removed on the western and eastern parts of the Disposal Area up to 10 feet. The central branch of the unnamed perennial stream has been shifted to the west along the southern perimeter of the Disposal Area, and the eastern branch of the unnamed perennial stream (shown on the 1907 topographic map) has been filled in with disposal material up to 10 feet.

The Disposal Area was covered with grass, a parking lot, patches of bare ground, tall grasses, deciduous trees approximately three to ten inches in diameter, and vines. The majority of the Disposal Area is covered by the Southside Park, which consists of a playground, soccer fields, and parking lot. Exposed debris was observed in and around the unnamed perennial stream near the southwestern and northwestern perimeters of the Disposal Area above the culvert and in small areas along the perennial stream. The disposal material consisted of tires, scrap metal, glass and plastic bottles, clothing, rusted

container, mattress, bricks and broken concrete. A steep 5- to 10-foot-high slope was observed near the unnamed perennial stream above the culvert.

Photographs taken during the assessment are included as **Appendix I**. GPS coordinates of select site features including the waste disposal area (WDA) entrance, site features and estimated WDA boundary are included in **Appendix II**. Historical reports referenced such as the Schnabel Engineering South, P.C. report are found in **Appendix III**.

3.0 Land Use

The project area (site) encompasses 13 parcels totaling approximately 22.9 acres located at 2645 Toomey Avenue, Charlotte, North Carolina (**Figure 1**). The site is used as Southside Park, which consists of a playground, soccer fields, two basketball courts, and parking lot. The surrounding land is zoned as residential and commercial. It is used as residential homes, highways, a golf course, and office buildings. A complete zoning and land use map is shown on **Figure 2A and 2B**. **Figure 3** includes a site map of the property.

4.0 Local Geologic, Hydrogeologic and Soil Conditions

According to the *Geologic Map of North Carolina*, dated 1985, the Southside Park LF is in the Piedmont Physiographic Province. More specifically, the site is located over granitic rock that contains hornblende from the Paleozoic Era and Ordovician-Devonian Period.

The source of groundwater in Mecklenburg County is precipitation in the form of rain. A portion of the precipitation infiltrates into the ground and moves under the influence of gravity to the water table. Mecklenburg County is an uplifted plain moderately dissected by streams. Based upon a review of topographic maps, groundwater at the site is anticipated to generally flow to the northwest.

According to the online Natural Resources Conservation Service (NRCS) National Cooperative Soil Survey (Web Soil Survey) data for Mecklenburg County, generally the site is classified as Cecil-Urban land complex with 2 to 8 percent slopes (CuB) on the central and eastern portions, and Cecil sandy clay with 2 to 8 percent slopes (CeB2) on the western portion. The Cecil-Urban land complex soil type is well drained with moderately high to high (0.57 to 1.98 in/hr.) saturated hydraulic conductivities (Ksat). Cecil-Urban land complex soils are derived from parent material of spoils with depths to groundwater of more than 80 inches below the ground surface (bgs). The Cecil sandy clay soil type is well drained with moderately high to high (0.57 to 1.98 in/hr.) saturated hydraulic conductivity (Ksat).

5.0 Geophysical Delineation of Horizontal Extent of Waste

5.1 Description of Geophysical Surveying Methods

On December 15, 2023, S&ME completed an FDEM survey within the requested area to identify and estimate the extent of the existing landfill (**Figure 5**). A brief description of the geophysical technique is presented in the following paragraphs. The geophysics survey was only conducted on the parcels owned by Mecklenburg County. Parcel No. 14501416 is owned by the City of Charlotte who did not authorize the geophysical survey on their property. The full geophysical survey report is included in **Appendix IV**.

5.1.1 Frequency Domain Electromagnetics (FDEM)

FDEM measures subsurface conductivity as lateral changes in conductivity of the subsurface typically indicate lateral changes in the subsurface materials (e.g., generally more conductive buried landfill material/debris compared to surrounding soils). FDEM measurements are collected by inducing (from a transmitter) a frequency-varying magnetic field and measuring (with a receiver) the amplitude and phase shift of an induced secondary magnetic field. The secondary magnetic field is created by subsurface conductive materials behaving as an inductor as the primary magnetic field passed through them. Both the conductivity and in-phase components of the electromagnetic field are recorded as a weighted average based on the dipole center distance (separation between the transmitter and receiver) and orientation (vertical versus horizontal) of the FDEM instrument. The "terrain" conductivity phase component, which is also referred to as the quadrature phase component, is measured in milliSiemens per meter (mS/m) and provides a measurement of conductivity. The in-phase mode, measured in parts per thousand (ppt), is responsive to metallic objects/materials.

We used a GF Instruments CMD Explorer electromagnetic conductivity meter in general accordance with ASTM D6639 "Standard Guide for Using the Frequency Domain Electromagnetic Method for Subsurface Investigations." The CMD Explorer system utilizes three separate dipole center distances effectively providing three separate weighted bulk average exploration depths of 7, 14, and 22 feet in the vertical dipole mode. FDEM data profiles were generally acquired along perpendicular lines spaced approximately 100 feet or less between each transect using a sub-meter GPS as positioning support (Figure 2). Data path locations were generally based on access.

The CMD data transfer software was used to download and interpolate data, and Golden Software's Surfer® was used to grid and plot the data (Figures 3 through 14). Presenting multiple bulk average ranges for the FDEM data allows for an additional qualitative assessment associated with subsurface material contrasts at depth. The FDEM data has been presented in two plots (Plots A and B) to provide both opaque and semi-transparent overlays on aerial images, respectively. The semi-transparent view allows for spatial comparison between the FDEM data and site features present in the aerial.

5.1.2 Results

The following summarizes the results of the geophysical services:

Remedial Investigation Report: First Phase Activities Southside Park Landfill

2645 Toomey Ave., Charlotte, Mecklenburg County, North Carolina
NCDEQ ID No. NONCD0000807, Task Order 807FP
S&ME Project No. 215952

- FDEM terrain conductivity responses for the 7, 14, and 22 feet weighted bulk average exploration depths generally range between about 0 and 100 mS/m (Figures 3 through 8), and the in-phase component of the FDEM data responses generally range between about -15 and 15 ppt (Figures 9 through 14).
- Based on experience, typical terrain conductivities of buried landfill waste materials are greater than about 20 mS/m, whereas typical background conductivity values are typically less than 20 mS/m. As such, it appears that lateral variations in subsurface materials consistent with possible buried waste materials can be identified in the conductivity data sets collected within the surveyed area. In addition, there may be two general waste areas (East and West) separated by a slight break as indicated by a change in conductivity within the overall interpreted limits.
- Approximate interpreted landfill extents within the surveyed areas are presented in the figures. The interpreted extents of possible landfill material were also provided separately at approximate 25-foot increments in a digital spreadsheet format.
- Several isolated areas/targets associated with buried metallic features (in-phase responses) that are unrelated to known surficial targets such as reinforced concrete, fences, benches, soccer goals, trash cans, etc. can also be identified in the FDEM data sets. Based on the limited number of in-phase responses identified within the interpreted waste limits, it appears that buried metal at this site is likely relatively small.

6.0 Historical Use Research

S&ME conducted research to summarize historical data pertaining to the subject property and surrounding properties. Historical research included the review of the following documents:

- Review of Mecklenburg County GIS online records for ownership.
- S&ME also ordered an EDR Radius Map Report with GeoCheck, which provides the following information: Regulatory Database searches, physical settings of the subject property, soil map, and public well search.
- The EDR Aerial Photo Decade Package.
- EDR Historical Topo Map Report with QuadMatch™.
- The EDR-City Directory Image Report.
- Certified Sanborn® Map Report.
- Site Summary Report by Schnabel Engineering South, P.C. dated July 21, 2010

Reviewed historical documents are included in **Appendix III**.

6.1 List of Owners and Operators

The subject property includes thirteen parcels. The parcel address and owner information are listed in the table below.

Table-1 Ownership Information

Mecklenburg County PIN (Parcel Identification Number)	Acres	Date of Ownership	Owners Name and address	Parcel Address
14501415	10.8	09/29/1997	Mecklenburg County 600 E 4 Street 11th Floor Charlotte, NC, 28202	645 Remount Road
14501321	0.139	11/17/1998		2608 Baltimore Avenue
14501308	0.450			N/A
14501307	0.263			
14501305	0.260			
14501304	0.129			
14501303	0.127			
14501302	0.772			
14501319	0.131			
14501320	0.136			
14501301	0.156			
14501322	0.733			
14501416	6.96	03/01/1990	City of Charlotte 600 East 4 Street, Charlotte NC, 28202	N/A

6.2 Type of Waste Received

During the Historical Use Research, S&ME recovered documents pertaining to the existence of a trash incinerator and records of multiple 55-gallon drums containing lead and chromium were found in the basement of the incinerator before being disabled in 1990. The landfill operated from the 1920's until its closure in the 1950's reported in the by Schnabel Engineering South, P.C. dated July 21, 2010 (**Appendix III**). S&ME personnel found waste in multiple soil borings that were conducted during 807RI-1 and 2 which included bricks, ceramic, plastics, and other debris. There was also exposed debris was observed in and around the unnamed perennial stream near the southwestern and northwestern perimeters of the Disposal Area above the culvert and in small areas along the perennial stream. The disposal material consisted of tires, scrap metal, glass and plastic bottles, clothing, rusted container, mattress, bricks, and broken concrete.

**Remedial Investigation Report: First Phase Activities
Southside Park Landfill**

NCDEQ ID No. NONCD0000807, Task Order 807FP
S&ME Project No. 215952

6.3 Historic Use Information on the Subject Property and Adjacent Properties

S&ME reviewed historical use information from EDR as part of this First Phase Remediation Investigation. The following documents were reviewed.

- Aerial photographs for the years: 1938, 1943, 1948, 1951, 1956, 1965, 1968, 1976, 1983, 1988, 1993, 1996, 1998, 2006, 2009, 2012, 2016, and 2020.
- Topographic maps for the years: 1905, 1907, 1942, 1948, 1949, 1980, 1988, 1996, 2013, 2016, 2019, and 2022.
- City Directories between 1921, 1925, 1931, 1937, 1944, 1949, 1953, 1959, 1964, 1969, 1974, 1975, 1979, 1984, 1989, 1991, 1992, 1994, 1995, 1999, 2000, 2005, 2010, 2014, 2017, and 2020.
- Historical Sanborn Fire Insurance Maps were not available for the subject property.

Table-2 Historical Use Summary Table (Subject Property)

Listing/Observed Feature	Years Found for This Listing	Source(s)
The subject property is shown as cleared land with a stream transecting through the center of the property. Structures are present along the southeastern boundary.	1907, 1948, 1949	Topographic Maps
The subject property appears to be primarily cleared land with a stream near the center of the property. Two structures are depicted, one on the northern corner and one in the southern portion of the property.	1938, 1943, 1948, 1951	Aerial Photographs
The City Directory lists 501 Remount Road as Southside Recreation Park	1969, 1974, 1979, 1984, 1989, 1994	City Directory
The subject property is mostly cleared, and landfill activities are observed. Cleared pads are observed in the northern and eastern portion of the property. Additional structures are present in the southeastern portion of the property.	1956, 1965, 1968, 1976	Aerial Photographs
The subject property is mostly cleared, and landfill activities are observed. An additional cleared pad is shown along the northwestern boundary. There are several unpaved paths throughout the property.	1983, 1988, 1993	Aerial Photographs
The eastern portion of the subject property is cleared and there are wooded areas along the southern property boundary. There are several paths transecting through the subject property. Landfill activities are not observed.	1996, 1998, 2006, 2009, 2012, 2016, 2020	Aerial Photographs

Table-3 Historical Use Summary Table (Adjacent Properties)

Listing/Observed Feature	Years Found for This Listing	Source(s)
The adjoining properties are undeveloped land with light residential development to the north and east. A road is observed to the north.	1905, 1907	Topographic Maps
Additional roads are present on the adjoining properties. The adjoining properties to the south are mostly residential. Adjoining properties to the north are commercial properties.	1942, 1948, 1949	Topographic Maps
The adjoining properties to the northeast are cleared agricultural land. Residential properties are present southeast of the subject property.	1938, 1943, 1948	Aerial Photographs
The adjoining properties are developed with residential and commercial properties including a golf course northwest of the subject property. A highway is present northwest of the subject property.	1980, 1988, 1996, 2013, 2016, 2019, 2022	Topographic Maps
A multi-family residential development is shown northeast and south of the subject property. A highway is constructed northwest of the subject property some time before 1976. The adjoining properties are heavily developed beginning in	1951, 1956, 1968, 1976, 1983, 1988, 1993, 1996, 1998, 2006, 2009, 2012, 2016, 2020	Aerial Photographs

6.4 Street Address

The street address in connection with the subject property is 2645 Toomey Avenue, Charlotte, NC according to Mecklenburg County tax records.

6.5 Records of Industrial Waste

S&ME did not find records indicating disposal of industrial waste on the subject property during the historical use research.

6.6 Known or Suspected Areas of Hazardous Substance Disposal

S&ME did not find records indicating suspected area of hazardous substance disposal on the subject property.

6.7 Non-Financial Encumbrances

S&ME did not find records of easement, rights-of-way, or leases during review of tax records and deeds.

7.0 Water Source Survey

S&ME personnel conducted a water source survey to identify wells, springs, and surface water intakes, used as water sources, within 1,000 feet from the waste disposal area. Water source information was obtained from the Mecklenburg County Property Ownership and Land Records System (POLARIS) website and Mecklenburg County Groundwater and Wastewater Services (GWS) website, and from a visual inspection of the site vicinity. Evidence of municipal water connections, including water meter vaults and fire hydrants, were observed along near the residences along Toomey Avenue, Remount Road, Brookhill Road, Miller Street, Chicago Avenue, Fairwood Avenue, Griffith Street, Baltimore Avenue, Benjamin Street, Norfolk Avenue, and the surrounding area. No water supply wells were observed during visual reconnaissance. Properties within the 1,000 feet of the subject property are zoned as Neighborhood 1, Neighborhood 2, Office, Light Industrial, Urban Residential, Business, Mixed Use, and Transit Oriented.

The Mecklenburg County GWS maintains the Monitoring Well Registration and Subsurface Investigation Permitting System (M.A.P.S.) website, a database of Subsurface Investigation Permits (SIPs). Mecklenburg County requires that a SIP be obtained prior to the commencement of well drilling within Mecklenburg County. The following addresses located within 1,000 of the subject property were identified in the SIP database:

- 2645 Toomey Avenue
- 2315 Toomey Avenue
- Vacant Land – Southeast intersection of Toomey Avenue and Remount Road
- Remount Road Property – No address given but depicted at 2617 Remount Road
- 2625 Norfolk Avenue
- 2535 South Tryon Street
- 2519 South Tryon Street

No water supply wells were observed at the addresses with associated SIPs during the water source survey visual reconnaissance.

Two tributaries, originating from south and east of the subject property, merge together on the subject property and flow from the southern corner of the subject property towards the northwest and under Interstate 77 (I-77) before draining into Irwin Creek. The locations of the tributaries are illustrated on **Figure 4**.

8.0 Sensitive Environments Survey

S&ME contacted State and Federal agencies requesting information about documented sensitive environments within 500 feet of the waste disposal area. Refer to **Table 4** for agency-related information. Agency correspondence is included in **Appendix V**. In accordance with the approved Work Plan, agency inquiries with no response within 30 days were considered a negative response and noted as NR (no response) on **Table 4**. Responses were received from the NC Division of Parks and Recreation – Natural Heritage Program, North Carolina Department of Natural and Cultural Resources, North Carolina Division of Forest Resources, United States Army Corps of Engineers, and NC Division of Water Resources. The

North Carolina Department of Natural and Cultural Resources did not identify any historic resources which would be affected by the project.

Refer to each agency's comments in **Table 4** and the correspondence included in **Appendix V** for a more detailed description.

9.0 Above Ground Vapor Survey

9.1 Field Screening Methods

On April 16-18, 2024, S&ME completed the above ground survey by collecting 241 (plus four background quality control) individual vapor screening readings from a 100-foot grid pattern over the WDA.

The above ground vapor survey was conducted by using portable meters to collect the following parameters at each above ground sampling location:

- Landfill Gas Meter – GEM5000 PLUS (or equivalent) for:
 - ◆ Methane: 0-100%, +/- 0.5% to 1.5% accuracy
 - ◆ hydrogen sulfide: 0-500 parts per million-volume (ppm-v), with +/- 10 ppm-v accuracy
 - ◆ carbon dioxide: 0-100%, +/- 0.5% to 1.5% accuracy
 - ◆ oxygen: 0-25%, +/- 1.0% accuracy
 - ◆ barometric pressure: +/- 14.7 inches mercury from calibration pressure, +/- 1% inches mercury accuracy
- Photo-Ionization Detector (PID) MiniRAE 3000 for total VOCs: 0-15,000 parts per million – volume in air (ppm-v), with +/- 0.1 ppm-v resolution over range of 0 to 999.9 ppm-v and +/- 1 ppm-v resolution over range of 1,000 to 15,000 ppm-v.

Each of the meters listed above has an internal pump, which was used to draw air samples from approximately six inches above the ground surface through the portable meters. Prior to and following the above ground screenings, S&ME collected readings from four ambient air, background locations. Upon completion of the above ground vapor screening, S&ME collected two duplicate quality control readings. Stable readings were recorded at each sample location.

A thermohygrometer was used throughout the screening event to measure ambient air for humidity and temperature.

9.2 Field Screening Results

Above Ground Vapor Results were as follows:

Methane

Methane was not detected at any of the above ground screening locations or in the ambient air background screening locations.

Remedial Investigation Report: First Phase Activities

Southside Park Landfill

2645 Toomey Ave., Charlotte, Mecklenburg County, North Carolina

NCDEQ ID No. NONCD0000807, Task Order 807FP

S&ME Project No. 215952

Hydrogen Sulfide

Hydrogen Sulfide was not detected at any of the above ground screening locations or in in the ambient air background screening locations.

Volatile Organic Compounds

VOCs were not detected at any of the above ground screening locations or in in the ambient air background screening locations.

The above ground vapor survey readings are included in the field documents in **Appendix VI**.

10.0 Sole Use Statement

This report is solely intended for use by NCDEQ for the services that were performed in accordance with S&ME's Proposal No. 215952B, Revision 1 dated March 28, 2024, as authorized by NCDEQ Task Order 807FP.

Sensitive Environments Agency Contact Information
Southside Park LF
Charlotte, Mecklenburg County, North Carolina
NCDEQ ID No. NONCD0000807 - Task Order 2900FP
S&ME Project No. 807FP

Agency	Name	Email Address	Documented Sensitive Environment	Date of Agency Response	Comments
NC Division of Parks and Recreation - Natural Heritage Program	Ms. Misty Buchanan	natural.heritage@ncdcr.gov	No	5/1/2024	There are no documented element occurrences (of medium to very high accuracy) that intersect with the project area. Please note, however, that although the NCNHP database does not show records for rare species within the project area, it does not necessarily mean that they are not present; it may simply mean that the area has not been surveyed. The use of Natural Heritage Program data should not be substituted for actual field surveys if needed, particularly if the project area contains suitable habitat for rare species. If rare species are found, the NCNHP would appreciate receiving this information so that we may update our database
National Park Service	Ms. Anita Barnett	Anita_Barnett@nps.gov	NR	--	--
United States Forest Service	Ms. Heather Luczak	Lauren.Onofrio@usda.gov	No	4/30/2024	There are no Designated and Proposed Federal Wilderness and Natural Areas, National Preserves and Forests, nor Federal Land Designated for the Protection of Natural Ecosystems located within 500 feet of 2645 Toomey Ave., Charlotte, Mecklenburg County, North Carolina
North Carolina Division of Water Resources	Ms. Nora Deamer	Nora.Deamer@ncdenr.gov	Yes	4/29/2024	In reviewing the informaton on the property located on or adjacent to 2645 Toomey Ave., Charlotte, Mecklenburg County, North Carolina, and the surround area, I have determined that this area is classified as "Environmentally Sensitive" or "State-Designated Areas for Protection or Maintenance of Aquatic Life". It is imperative that any activity taking place at this locaton eliminate runoff that would further degrade the fragile systems that surrounds this area. There is a need to reduce the stormwater volume, nutrients, sediment, and bacteria loading from this site. It is also imperative to address any groundwater contaminaton that could be contributng pollutants in base flow to these streams.
North Carolina Division of Forest Resources	Mr. Craig Clarke	Craig.Clarke@ncagr.gov	NR	--	--
United States Fish and Wildlife Service	Mr. Pete Benjamin	Pete_Benjamin@fws.gov	Yes	6/10/2024	Michaux's sumar (<i>Rhus michauxii</i>) = E Schweinitz's sunflower (<i>Helianthus schweinitzii</i>) =E Smooth coneflower (<i>Echinacea laevigata</i>) = T Tricolored bat (<i>Perimyotis subflavus</i>) = PE E = endangered, PE = proposed endangered, and T = threatened. We encourage use of the Service's Information for Planning and Consultation system (IPAC, https://ipac.ecosphere.fws.gov/) which identifies proposed and listed species, and proposed and designated critical habitat, that may occur within the proposed project action area. Only those species official species list generated by IPAC need analysis during project review.
North Carolina Department of Cultural Resources	Ms. Renee Gledhill-Earley	environmental.review@dncr.nc.gov	No	5/9/2024	We have conducted a review of the project and are aware of no historic resources which would be affected by the project. Therefore, we have no comment on the project as proposed. These comments are made in accord with G.S. 121-12(a) and Executive Order XVI.
North Carolina Division of Coastal Management	Mr. Mike Lopazanski	Mike.Lopazanski@ncdenr.gov	NR	--	--
North Carolina Wildlife Resources Commission	Mr. David Cox	David.Cox@ncwildlife.com	NR	--	--

Subject: Southside Park Landfill (NONCD0000807), Charlotte, Mecklenburg County, NC
Attachments: NONCD0000807_PRLF_20100803_Adjacent Property Owner - LF Encroachment Letter.pdf

Mr. Hahn,

Attached is a letter regarding the Southside Park Landfill that was sent to you on August 3, 2010 but was returned as undeliverable.

I was unable to find another mailing address for you on the Mecklenburg County website so I am sending the letter via email.

Thanks,
Bruce

Re: Southside Park Landfill
Toomey Avenue
Charlotte, Mecklenburg County, NC
ID # NONCD0000807

Dear Mr. Hahn:

On June 30, 2010, the above referenced property was inspected by a State contractor (Schnabel Engineering South, P.C.) to determine if it had previously been used as a landfill and to identify any associated potential hazards to the public and environment. That inspection confirmed the presence of a landfill on that property. A portion of the disposal area appears to extend onto property Mecklenburg County owns located at Toomey Avenue (PIN 14501415).

A report was submitted to the North Carolina Division of Waste Management by the contractor identifying the above referenced property's past use as a landfill and included general information about the property and vicinity. A copy of that report is available at your request. No immediate hazard was observed associated with the landfill area. The property will remain as part of the State's inventory of pre-regulatory landfills and continue to be part of public record. Your property is also included in the report.

To address properties such as this, the General Assembly of North Carolina ratified Senate Bill 1492 that creates a program whereby the State will assess and remedy the environmental hazards at these old pre-regulatory landfills. Under Senate Bill 1492, as long as owners fully cooperate with the state in its performance of this work and monies are available, the owner will not have to conduct the work at their expense. A state-wide disposal tax was established by Senate Bill 1492. Fifty percent of the proceeds go to conducting this work. Cooperation with investigation and implementation of control and mitigation measures may include, but are not limited to, granting access to the site, allowing installation of various monitoring wells (groundwater) and probes (landfill gas), allowing installation and maintenance of improvements to the landfill cap, allowing installation of security measures, agreeing to record and implement land-use restrictions, and providing access to any records regarding the old landfill.

Prior to the passage of this law, owners and operators of the landfill property and other responsible parties were obligated to fund any required assessment and cleanup work to address the public health and environmental hazards posed by these properties.

Your cooperation for investigation and remediation activities would be very much appreciated.

We ask that our office be notified prior to any redevelopment plans so that public health or the environment is not adversely affected. If you have any questions, please call me at (919) 508-8463.

Sincerely,

Bruce E. Lefler, Jr., Hydrogeologist

Charlotte, NC 28202-2816

Re: Southside Park Landfill
Toomey Avenue
Charlotte, Mecklenburg County, NC
ID # NONCD0000807

Dear Mr. Pierotti:

On June 30, 2010, two City of Charlotte properties (PINs 14501416 and 14501802) were inspected by a State contractor (Schnabel Engineering South, P.C.) to determine if they had previously been used as a landfill and to identify any potential hazards if a landfill was present. That inspection confirmed the presence of a landfill.

A report was submitted to the North Carolina Division of Waste Management by the contractor identifying the property's past use as a landfill and included general information about the properties and vicinity. A copy of the report is available at your request. No immediate hazard was observed associated with the landfill area although the waste disposal area may extend onto a northern adjacent property (PIN 14501415) owned by Mecklenburg County. The properties will remain as part of the Division's inventory of pre-regulatory landfills and continue to be part of public record.

To address properties such as these, the General Assembly of North Carolina ratified Senate Bill 1492 that creates a program whereby the State will investigate and remedy the environmental hazards at these old pre-regulatory landfills. Under Senate Bill 1492, as long as owners fully cooperate with the State in its performance of this work and monies are available, the owner will not have to conduct the work at their expense. A state-wide disposal tax was established by Senate Bill 1492. Fifty percent of the proceeds go to conducting this work. Cooperation with investigation and implementation of control and mitigation measures may include, but are not limited to, granting access to the site, allowing installation of various monitoring wells (groundwater) and probes (landfill gas), allowing installation and maintenance of improvements to the landfill cap, allowing installation of security measures, agreeing to record and implement land-use restrictions, and providing access to any records regarding the old landfill.

Prior to the passage of this law, owners and operators of the landfill property and other responsible parties were obligated to fund any required assessment and cleanup work to address the public health and environmental hazards posed by these properties.

Your cooperation for investigation and remediation activities will be appreciated.

Thank you for your cooperation in allowing access to these properties. We ask that our office be notified prior to any redevelopment plans so that public health or the environment is not adversely affected. If you have any questions, please call me at (919) 508-8463.

Sincerely,

Re: Southside Park Landfill
Toomey Avenue
Charlotte, Mecklenburg County, NC
ID # NONCD0000807

Dear Mr. Hahn:

On June 30, 2010, the above referenced property was inspected by a State contractor (Schnabel Engineering South, P.C.) to determine if it had previously been used as a landfill and to identify any associated potential hazards to the public and environment. That inspection confirmed the presence of a landfill on that property. A portion of the disposal area appears to extend onto property Mecklenburg County owns located at Toomey Avenue (PIN 14501415).

A report was submitted to the North Carolina Division of Waste Management by the contractor identifying the above referenced property's past use as a landfill and included general information about the property and vicinity. A copy of that report is available at your request. No immediate hazard was observed associated with the landfill area. The property will remain as part of the State's inventory of pre-regulatory landfills and continue to be part of public record. Your property is also included in the report.

To address properties such as this, the General Assembly of North Carolina ratified Senate Bill 1492 that creates a program whereby the State will assess and remedy the environmental hazards at these old pre-regulatory landfills. Under Senate Bill 1492, as long as owners fully cooperate with the state in its performance of this work and monies are available, the owner will not have to conduct the work at their expense. A state-wide disposal tax was established by Senate Bill 1492. Fifty percent of the proceeds go to conducting this work. Cooperation with investigation and implementation of control and mitigation measures may include, but are not limited to, granting access to the site, allowing installation of various monitoring wells (groundwater) and probes (landfill gas), allowing installation and maintenance of improvements to the landfill cap, allowing installation of security measures, agreeing to record and implement land-use restrictions, and providing access to any records regarding the old landfill.

Prior to the passage of this law, owners and operators of the landfill property and other responsible parties were obligated to fund any required assessment and cleanup work to address the public health and environmental hazards posed by these properties.

Your cooperation for investigation and remediation activities would be very much appreciated.

We ask that our office be notified prior to any redevelopment plans so that public health or the environment is not adversely affected. If you have any questions, please call me at (919) 508-8463.

Sincerely,

Handwritten signature of Bruce E. Lefler, Jr. in cursive script.

SITE LOCATION RESEARCH SUMMARY

ID NUMBER: NONCD 0000807
SITE NAME(S): Southside Park Landfill
LOCATION: 2645 Toomey Avenue, Charlotte, NC 28217
COUNTY: Mecklenburg

LANDFILL SIZE: 16.9 acres (Disposal Area enclosed by GPS points obtained during site visit)
PROPERTY SIZE: 22.9 acres (from Mecklenburg County GIS)
DATE OPENED: Approximately 1920s (data obtained from Mr. Keith Carpenter, City Engineer, City of Charlotte Engineering and Property Management)
DATE CLOSED: Approximately mid-1950s (data obtained from Phase I Environmental Site Assessment, City of Charlotte, November 7, 2008)

CURRENT OWNER: City of Charlotte
CURRENT OWNER CONTACT: Mr. Doug L. Pierotti
CURRENT OWNER ADDRESS: 600 East 4th Street, Charlotte, NC 28202-2816
CURRENT OWNER TELEPHONE NUMBER: 704-432-5212
TAX PARCEL No./PIN No.: 14501416
DEED REFERENCE: Not Listed
PROPERTY SIZE: 7.0 acres (from Mecklenburg County GIS)

The Disposal Area appears to extend onto the following tax parcel:

PARCEL 1

CURRENT OWNER: Mecklenburg County and
Real Estate/Finance Department
CURRENT OWNER CONTACT: Mr. Mark Hahn
CURRENT OWNER ADDRESS: 600 East 4th Street, Charlotte, NC 28202-2816
CURRENT OWNER TELEPHONE NUMBER: 704-336-5483
TAX PARCEL No./PIN No.: 14501415
DEED REFERENCE: Not Listed
PROPERTY SIZE: 10.8 acres (from Mecklenburg County GIS)

PARCEL 2

CURRENT OWNER: City of Charlotte
CURRENT OWNER CONTACT: Mr. Doug L. Pierotti
CURRENT OWNER ADDRESS: 600 East 4th Street, Charlotte, NC 28202-2816
CURRENT OWNER TELEPHONE NUMBER: 704-432-5212
TAX PARCEL No./PIN No.: 14501802
DEED REFERENCE: Not Listed
PROPERTY SIZE: 5.1 acres (from Mecklenburg County GIS)

COORDINATES: (at site entrance Parcel 14501416 from handheld GPS)
State Plane Coordinates (NAD83, meters): Northing: 163355 Easting: 438913.
Latitude: N35° 12' 29.0" Longitude: W80° 52' 29.6"

AREAS OF NOTE

1. Waste appears to extend beyond the property boundary of the Site on the northwestern border, extending onto tax parcel 14501802 owned by City of Charlotte.
2. Residences, Charlotte Humane Society, Bethlehem Center of Charlotte, Christian Service Methodist Church, the Housing Authority of Charlotte, Revolution Park/Golf Course, and office buildings are located within 1,000 feet of the Disposal Area.
3. There is evidence of human activity on the Disposal Area as indicated by a parking lot, playground, soccer fields, basketball court, picnic shelter, and recent dumping of trash.
4. The Disposal Area is being used for the Southside Park.
5. Potential landfill gas migration pathways observed on the Disposal Area include holes, underground utilities, stormwater drains, underground culvert, a sewer line manhole, and the Charlotte Humane Society.
6. An unnamed perennial surface water feature is located on the Disposal Area. The unnamed perennial stream flows to the northwest along the southern perimeter and through the central portion of the Disposal Area. Two drainages were observed on the southwestern part and northeastern part of the Disposal Area.
7. An undulation in the topography was observed on the concrete pathway in the eastern portion of the Disposal Area north of the soccer fields.
8. Holes were observed along the steep slope near the unnamed perennial stream on the southern part of the Disposal Area.
9. A slope failure was observed on the northwestern part of the Disposal Area above the culvert for the unnamed perennial stream.
10. Exposed debris observed on the Disposal Area consisted of tires, scrap metal, glass and plastic bottles, clothing, rusted container, mattress, bricks, and broken concrete. According to interviews and a Phase I Environmental Site Assessment performed by the City of Charlotte, ash from the incinerator located on Site was buried on the Disposal Area. Ash debris was not observed during the site visit.
11. Historical records, documented in the Phase I Environmental Site Assessment report, indicated that 55-gallon drums of hazardous waste (lead and chromium) were discovered in the basement of the incinerator after the operations at the incinerator ceased.

SITE SUMMARY

1.0 SITE CONDITIONS

This section discusses the observed conditions on the Site, as defined as the properties (Tax Parcels #14501416, 14501415, and 14501802) on which the Disposal Area is located. The Disposal Area is defined as the area observed or reported to have been used for waste placement or burial. The Disposal Area perimeter location is approximate and is based on visual observations made at the time of the site visit and interpretation of aerial photographs. The site visit was conducted on June 30, 2010. Photographs illustrating site conditions are included in Appendix D.

The Site is located in Mecklenburg County, near Charlotte, NC. Driving directions to the Site from the intersection of Interstate 77 and West Boulevard (exit 9) are as follows:

1. Take West Boulevard (exit 9) off of Interstate 77 and continue south onto Barringer Drive (exit 9A).
2. Drive south of Barringer Drive for 0.7 miles and turn left onto Remount Road.
3. Drive approximately 0.5 miles on Remount Road and turn right onto Toomey Avenue.
The parking lot for Southside Park will be on the left side of the road.

1.1 On-site Structures

Structures located on the Site and Disposal Area includes a parking lot, basketball court and picnic shelter. The picnic shelter is an open beam structure on slab located near the northern perimeter of the Disposal Area. The Charlotte Humane Society is located adjacent to the Disposal Area on Tax Parcel 14501802. The Charlotte Humane Society consists of three enclosed buildings on slab and a parking lot.

1.2 Current Site Usage

According to Mr. Doug Pierotti, City Engineer for the City of Charlotte, the Site is used for the Southside Park. Observed evidence of recent human activity included the parking lot, basketball court, soccer fields, picnic shelter, playground, and recent dumping of disposal debris.

1.3 On-Site Water Supply Wells and Intakes

No on-site water supply wells or water meters were observed on the Site during the site visit. A fire hydrant was observed on the western boundary of the Site during the site visit (Figure 2).

1.4 Surface Water Features

An unnamed perennial stream is located along the southern perimeter and through the central portion of the Disposal Area. The bed of the unnamed perennial stream is approximately ten feet in width, sandy, with flowing water, and contained disposal debris consisting of plastic, glass, metal, and bricks at the time of the site visit.

Two drainages were observed on the Disposal Area. The western drainage was surrounded by tall grasses and recent dumping was observed near and within the tall grass at the time of the site visit. The eastern drainage is located along a walking path to the north of the soccer fields. Recent dumping was not observed within this drainage at the time of the site visit. Both drainages were dry at the time of the site visit.

1.5 Disposal Area

Access to the Disposal Area is from a parking lot along Toomey Avenue (Photo 1). The Disposal Area occupies 16.9 acres based on the estimated Disposal Area perimeter shown on Figures 1 through 3.

The ground surface of the Disposal Area slopes relatively uniformly toward the north. A comparison of the topography from the 1907 USGS 7.5 minute topographic quadrangle map (20 foot contours) with the 2009 topographic map from NCDOT (20 foot contours), indicates that disposal material has filled in the northern part of the Disposal Area up to 10 feet and material has been removed on the western and eastern parts of the Disposal Area up to 10 feet. The central branch of the unnamed perennial stream has been shifted to the west along the southern perimeter of the Disposal Area, and the eastern branch of the unnamed perennial stream (shown on the 1907 topographic map) has been filled in with disposal material up to 10 feet.

A comparison of the topography from the 1967 USGS 7.5 minute topographic quadrangle map (10 foot contours, based on 1965 aerial photography) with the 2009 topographic map from the NCDOT (20 foot contours), indicates the southern part of the Disposal Area on the eastern half of the Site, near the unnamed perennial stream, has been lowered up to 10 feet to a relatively level surface. The estimated years of landfill operation were from the 1920s to the mid-1950s, so the 1967 USGS map may have represented the land surface at the end of the disposal period. The LiDAR Shaded Relief Map (Figure 5) shows that the eastern and northern portions of the Disposal Area have been leveled and the eastern branch of the 1907 unnamed perennial stream has been filled in and cut off by Remount Road.

The depth of waste is estimated based on a comparison of topographic maps of different vintages constructed using different methods. Differences between elevations on the maps may reflect actual elevation changes or may be apparent differences due to the different map making methods. The elevation comparisons are approximate and differences in scale and methods of mapping are not sufficient to evaluate some changes in topography.

GPS coordinates were taken of the Disposal Area perimeter. The approximate Disposal Area perimeter is illustrated on the figures and on aerial photographs in Appendix E. A table of GPS coordinates for the Site entrance and the Disposal Area perimeter is presented in Table 1. The Disposal Area perimeter location is approximate and is based on visual observations made at the

time of the site visit and interpretation of aerial photographs. Figures 4 and 5 show LiDAR shaded relief superimposed on the Disposal Area.

1.6 Disposal Area Conditions

The Disposal Area was covered with grass, a parking lot, patches of bare ground, tall grasses, deciduous trees approximately three to ten inches in diameter, and vines. The majority of the Disposal Area is covered by the Southside Park, which consists of a playground, soccer fields, and parking lot. Exposed debris was observed in and around the unnamed perennial stream near the southwestern and northwestern perimeters of the Disposal Area above the culvert and in small areas along the perennial stream. The disposal material consisted of tires, scrap metal, glass and plastic bottles, clothing, rusted container, mattress, bricks and broken concrete. A steep 5 to 10 foot high slope was observed near the unnamed perennial stream above the culvert. Disposal material was observed protruding out of this slope at the time of the site visit (Photos 13 and 14).

The observed Disposal Area is on multiple tax parcels, Parcel Numbers 14501416, 14501415, and 14501802. The eastern and western perimeters of the Disposal Area were difficult to identify so the limits of the Disposal Area and Site are considered to be the same. The northern and southern perimeters were visually evident by the Disposal material along the unnamed perennial stream. The northwestern perimeter of the Disposal Area appears to extend onto Parcel No. 14501802, the Charlotte Humane Society. Coordinates of points on the estimated perimeter of the Disposal Area are listed on Table 1.

An undulation in the topography was observed on the concrete pathway in the eastern portion of the Disposal Area north of the soccer fields at the time of the site visit (Photo 10). Holes were observed along the steep slope near the unnamed perennial stream on the southern part of the Disposal Area (Photo 7). A slope failure was observed on the northwestern part of the Disposal Area above the culvert (Photo 17). No notable erosion, depressions, hummocky topography, offensive odors, or stained or discolored soils were observed during the site visit.

1.7 Evidence of Human Activity

During the site visit evidence of recent dumping of miscellaneous trash (cans, plastic and glass bottles, and clothing) was observed near the unnamed perennial stream at the time of the site visit (Photos 3 and 16).

1.8 Potential Landfill Gas Migration Pathways

There were visible or evident potential gas migration pathways observed on the Disposal Area and Site.

Potential gas migration pathways located on the Disposal Area and Site were:

- Underground electric line: along the northern and eastern perimeter of the Disposal Area and Site.
- Stormwater drain: along the southeastern perimeter of the Disposal Area and Site.
- Holes on the slope near the unnamed perennial stream.
- Underground culvert: trends northwest to southeast through the center of the Disposal Area.
- Sewer line: a sewer line manhole was located near and within the unnamed perennial stream on the south central part and northwestern part of the Disposal Area.
- Charlotte Humane Society: located to the west of the Disposal Area.

1.9 Physical Barriers

Site access is provided by a parking lot off of Toomey Avenue. Physical barriers to the Site and Disposal Area were not observed on Southside Park. The steep slopes where the slope failure is located was difficult to walk on the northwestern part of the Disposal Area (across the street from Southside Park).

1.10 Other Pertinent Information

Some history of the Site was obtained during conversations with persons familiar with the Site.

The information obtained indicates that:

- Mr. Doug Pierotti, City Engineer for the City of Charlotte, gave verbal permission to access property owned by the City of Charlotte.
- Mr. Pierotti stated that the County of Mecklenburg and the City of Charlotte own the landfill property.
- Mr. Pierotti stated that ash was placed in the landfill from the incinerator that was located on the Site. He said that disposal material was not placed on Site after January 1, 1983.
- Mr. Pierotti stated that the City of Charlotte performed an in-house report on the property: *Limited Phase I Environmental Site Assessment of Southside Park formerly the "Shuman Avenue" Incinerator*, dated November 7, 2008. An electronic version of the report is provided in Appendix F, Supporting Documentation.
- According to the Phase I ESA report, the City and County parcels was a former municipal waste incinerator and ash landfill. The operational dates are believed to be from the 1920s through the mid 1950s. The approximate limit of ash burial is in the northwest portion of the block; bounded by the on-site creek and creek/storm drainage line on the County parcel.
- Historical records, documented in the Phase I ESA report, also indicated that 55-gallon drums of hazardous waste (lead and chromium) were discovered in the basement of the incinerator long after the operations at the incinerator ceased. Seven soil borings were conducted in 1989, requested by City Engineering; however, no hazardous waste disposal manifest or soils testing results have been located in the archived Southside Park files.
- Mr. Pierotti stated that the property is currently used as a public park with basketball courts.
- Mr. Pierotti stated that the residences near the Southside Park are on municipal water.

- Mr. Joe Hack, Contracted Operations Core Process Manager of the Mecklenburg County Solid Waste Management, stated that the landfill was located on Toomey Avenue and is owned by Mecklenburg County. Mr. Hack did not know the contents placed in the landfill or landfill operation dates.
- Mr. Keith Carpenter, City Engineer for the City of Charlotte, stated that the landfill began operation in the 1920s. Mr. Carpenter did not know the termination date of landfill, but stated that the incinerator was disassembled in the early 1990s.
- Mr. Carpenter stated that ash from the buried debris was buried in the landfill.
- Mr. Mark Hahn, Director for the Mecklenburg County Real Estate Services, provided verbal permission to access the property owned by Mecklenburg County.
- Mr. Hahn stated that the limits of the landfill are within the property boundaries of the Southside Park.

Notes from conversations with people familiar with the site are included in Appendix C. The information obtained from these conversations has not been verified or confirmed.

2.0 VICINITY CONDITIONS

This section describes the observed general conditions in the vicinity of the Site, as defined by an area within 1,000 feet of the perimeter of the Disposal Area. Photographs illustrating vicinity conditions are included in Appendix D.

2.1 Structures Located on Adjacent Properties

Structures described in this section are located on adjacent properties that have a shared property boundary with the Site.

Several houses on multiple tax parcels are located to the northeast, southwest, south, and southeast of the Site and Disposal Area. The Charlotte Humane Society is located to the north and west of the Site on Tax Parcel 14501802. These structures are shown on Figure 2 and on aerial photographs in Appendix E.

2.2 Water Supply Wells and Intakes

Water supply wells or well houses were not observed at residences along Toomey Avenue and Remount Road within a 1,000-foot radius of the Disposal Area. Water meters were observed in the yards of several of the residences within 1,000 feet of the Site. Fire hydrants were observed within 1,000 feet of the Site. According to Mr. Doug Pierotti, City Engineer for the City of Charlotte, the area within 1,000 feet of the Disposal Area perimeter is served by a public water supply.

No public water supply wells or intakes were listed on the NCDENR Public Water Supply Section's database (as of January 2010) within two miles of the Disposal Area.

2.3 Current Land Usage

Property in the vicinity of the Site is primarily residential. Land usage at the time of the site visit within 1,000 feet of the Disposal Area perimeter was:

- North:** Charlotte Humane Society, Interstate 77, and Revolution Park/Golf Course, apparent down-gradient direction from the Site.
- South:** Residences, apparent up-gradient direction from the Site.
- East:** Residences, Bethlehem Center of Charlotte, Christian Service Methodist Church, the Housing Authority of Charlotte, and office buildings, apparent side-to up-gradient direction from the Site.
- West:** Residences, apparent side- to up-gradient direction from the Site.

2.4 Surface Water Features

The unnamed perennial stream located within the Disposal Area flows from the northern perimeter of the Site into Irwin Creek located approximately 1,800 feet northwest of the Site.

3.0 AERIAL PHOTOGRAPHY REVIEW

Aerial photographs were reviewed for the years 1938, 1951, 1968, 1983, 1993, 2001, 2005, and 2009. The estimated reported years of operation of the Site were from 1920s to mid-1950s. Observations of each of the photographs are included in the following table. Copies of the aerial photographs are included in Appendix E. Some aerial photographs are reproductions of original aerial photographs and have some distortion; therefore, overlaid Disposal Area Boundaries and other features may vary from their actual locations. Hand drawn lines and notations on the photographs denote soils mapping information drawn on the original photographs by the USDA NRCS.

Flight Year	Observations	Source
1938	Disposal Area is cleared with low vegetation. The ground on the western and northern parts of the Disposal Area appears disturbed. One structure is visible on the northern corner (the old incinerator) and another structure is visible on the southern part of the Disposal Area. Trees surround the southern structure. The NRCS has drawn two streams on the aerial photograph through the eastern and central portions of the Disposal Area. Scattered residences and agricultural fields surround the Site.	1
1951	Disposal Area is cleared. Disturbed areas are visible to the north of the stream (central portion of the Disposal Area) and along the northeastern perimeter of the Disposal Area. Two linear structures are visible to the east of the southern structure. A small shed is visible to the west of the incinerator. Residences are visible across Remount Road.	1
1968	Disposal Area is cleared. The southern structure is no longer present on the Disposal Area. The western part of the Disposal Area is covered with low vegetation. A dark shaded area is visible on the central portion of the Disposal Area. The streams on the eastern part of the Disposal Area are not visible and have possibly been filled in with fill material. Residences are visible to the south, adjacent to the Site. The Humane Society is present, adjacent to the northwestern part of the Disposal Area.	1
1983	Disposal Area is mostly covered with low vegetation, except for two circular spots on the eastern part of the Disposal Area and on the northern part at the location of the incinerator. Walkways are visible in the eastern and northern parts of the Disposal Area. A parking lot is visible on the western part of the Disposal Area. A cleared disturbed area and trees are visible within the drainage of the stream.	1

1993	Disposal Area is covered with low vegetation. Gravel or paved areas are visible near the incinerator.	2
1999	Disposal Area is covered with low vegetation and bare spots are visible in the eastern part. The incinerator is not visible in the northern part of the Disposal Area. The basketball court is visible on the northernmost corner of the Site. Paved walkways are still visible on the northern and eastern portion of the Disposal Area.	3
2001	Grading is visible in the eastern portion of the Disposal Area. The northern part of the Disposal Area appears to have a playground and some of the walkways have been removed or reconstructed.	3
2005	A picnic shelter is visible on the northern part of the Disposal Area and soccer fields are present on the eastern part of the Disposal Area.	3
2009	The aerial photograph shows conditions representative of those observed during the visit.	3

On-Site Structures for Site Area including Disposal Area

Any buildings located onsite? Y/or N Approximate age of building(s) _____

Location of building(s) Basketball court + picnic shelters, open on sides, on slab

Building utilization (i.e. residential, retail store, barn, etc.) _____

Is building on a slab or is it a raised foundation with a crawl space? _____

Is there a water supply well at or near the building? No

Are there any indications of former onsite buildings? No

Any evidence of human activity? Y or N Describe in detail: _____

parking lot, child play areas, walking paths, recent trash disposal
basketball courts, soccer fields

Current Use of Site and Disposal Areas

What is the current use of the site (residential, church, daycare, school, business, agricultural, etc.)?

Park & parking lot,

What is the ground cover (grass, scrub trees, large trees, pasture, agricultural field, bare ground)?

grass, small (5x5ft) bare ground, tall grasses by drainage
w/ no flow; trees, bare ground & vines near Drainage w/ flow
trees → deciduous 3-10 inches in Diameter

Available utilities on site and location:

Utility	Provided by	Location of Utility
Electricity <input checked="" type="radio"/> or N		
Natural Gas <input checked="" type="radio"/> or N		
Water <input checked="" type="radio"/> or N		
Sewer <input checked="" type="radio"/> or N		
Solid Waste <input checked="" type="radio"/> or N		

On-Site Water Wells

Well Number	Location	Working or Abandoned
Water Well(s)	<u>None</u>	

DRAINAGES

Location	Width (ft)	Stream Bed*	Flow*	Water Quality*
<u>West</u>	<u>2ft</u>	<u>Grass</u>	<u>No Flow</u>	
<u>South</u>	<u>10ft</u>	<u>Sandy, trash</u>	<u>Moderate Flow</u>	<u>Clear to Cloudy</u>
<u>North</u>	<u>10ft</u>	<u>Sandy, trash</u>	<u>Moderate Flow</u>	<u>Clear to Cloudy</u>
		*Mud, Sand, Gravel, Boulders, Combination	*Standing Water, Slow Flow, Fast Flow	*Clear, Cloudy, Muddy

STANDING WATER				
Location	Approx Size	Type*	Natural or Modified Topography?	Water Quality*
None				
		*Swamp, Poor Drainage, Lake, Pond		*Clear, Cloudy, Muddy

General topography of the site (which way does surface water flow)?:

North west

DISPOSAL AREA

(Disposal Area: The area observed or reported to have been used for waste placement or burial. The perimeter of this area is the observed limit of waste material based on field observations, or the inferred limit base on a review of historical aerial photographs.)

DISPOSAL AREA BOUNDARY				
Perimeter	Boundary Type	Visibility	Water Discharge?	Water Quality
Northern	Street	Visible	Flowing Water	Clear to Cloudy
Southern	Residences, Stream	Visible	Flowing Water	Clear to Cloudy
Eastern	Street, basketball court	D to I		
Western	Street	D to I		
	Wooded, Pasture, Residential, Creek, etc.	Clearly Visible, Visible, Difficult to Identify, Not Found	Seep, Standing Water, Flowing Water	Clear, Cloudy, Muddy

Disposal Area:

Names of adjacent roads: Toomey Avenue, Chicago Avenue, Remount Road

Access to Disposal Area: Toomey Avenue, into the Southside Park parking lot

General slope and topography of Disposal Area: Northwest

Disposal Area Conditions

Describe the feature and location of any of the conditions observed. Take photographs of observed features. Note if feature not observed.

Disposal Area Ground Cover (grass, trees (include diameter), bushes, waste, litter, dirt, rock):

bare ground, vines, trees → Deciduous 3-10 inches in Diameter, tall grasses

Erosion: None

Cemetery: None

Slope failure: observed on NW corner of Site across Toomey Ave. above the culvert. Disposal Debris → glass + metal observed

Seeps: None

Odor: None

Stained Soil: None

Evidence of waste deposition based on topographic changes (depressions, holes, hummocky, piles of soil, berms):

holes, hummocky topography

Exposed Debris: tires, scrap metal, glass, plastic, cloth, rusted container mattress, bricks, concrete

Physical Barriers at Disposal Area Boundary: steep slope to drainage w/ flowing water

Potential Landfill Gas Migration Pathways: holes, underground utilities, stormwater drains, sewer

Physical barriers to Site Area: None

Physical barriers to Disposal Area: steep slope to drainage w/ flowing water

Evidence of Human Activity: recent trash disposal → glass bottles + clothes

Other site information which will help NCDENR prioritize the site:

Since the site was closed, the site area and disposal area have been used by whom and for what purpose?

city → for a Park

Vicinity Conditions

Vicinity Area: The area within 1,000 feet of the perimeter of the Disposal Area.

Adjacent and Adjoining Properties (note for ALL properties adjoining within 1,000 ft of perimeter of the Disposal Area):

Describe structure(s) on adjacent properties that have a shared property boundary with the Site.

Residences, Humane Society (Animal Shelter)

Are there fire hydrants and/or water meters present within 500 feet of the site? (Y) or N

Describe: five hydrant along NW boundary

Are there fire hydrants and/or water meters present within 1,000 feet of the site? (Y) or N

Current Land Usage in Vicinity		
Direction	Description (i.e. wooded, residential, commercial)	Topographically Upgradient or Downgradient
North	Humane Society, I-77	Down-gradient
South	Residences	Up-gradient
East	Residences, Bethlehem Center	Cross-to up-gradient
West	Residences	Cross-to up-gradient

Describe properties in detail. Are they gasoline stations, industry, dry cleaners, landfills, junk yards, residences, office buildings, etc.?

Residences, Humane Society (Animal Shelter), Bethlehem Center, Methodist Church, Housing Authority of Charlotte, and office buildings

Land use of the surrounding area as a whole: Commercial, (Residential), Agricultural, Industrial, or Wooded (Circle answer)

Surface Water Features:

Are there any surface water bodies (i.e. ponds, creeks, swamps, lagoons) within 500 or 1,000 feet of the site? (Y) or N Describe:

Perennial Stream to the NW of Site
+ Irwin Creek to the NW of Site -> Outside the 1,000ft
vicinity

APPENDIX C
RECORDS OF COMMUNICATION
SITE VISIT PERMISSION LETTER

June 15, 2010

Mecklenburg County Park and Recreation Department
5841 Brookshire Blvd.
Charlotte, NC 28216

To Whom It May Concern:

The North Carolina Department of Environment and Natural Resources (NCDENR) has hired Schnabel Engineering South, PC (Schnabel) to assess old unlined landfills in several North Carolina counties. This project consists of researching the past use and current conditions of hundreds of sites.

Your property at 645 Remount Road in Charlotte (Southside Park) has been identified as a potential location of one of these old unlined landfills. We would like to visit your property and ask questions related to the history of the property to help prepare a report for the NCDENR. During the site visit our staff would walk over the property to observe the current conditions. No sampling or digging would be performed. After our site visit we will prepare a report and submit it to NCDENR.

During the next few days one of our staff will be calling you to answer any questions you might have and to request permission to visit your property. If you have questions prior to our call, feel free to call me at the phone number listed below. If you call after business hours or during the weekend, please leave me a message.

If you have general questions about the program you may also contact the NCDENR staff listed on the attached letter.

Thank you for your assistance.

Sincerely,

SCHNABEL ENGINEERING SOUTH, PC

North Carolina Department of Environment and Natural Resources
Division of Waste Management

Beverly Eaves Perdue
Governor

Dexter R. Matthews
Director

Dee Freeman
Secretary

June 17, 2009

To: Property Owner

Re: Pre-Regulatory Landfill Assessments

The North Carolina Department of Environment and Natural Resources' Division of Waste Management (State) has been tasked with gathering information and accurately locating pre-regulatory landfills. The State is in the process of compiling a statewide inventory of these sites. Over 700 pre-regulatory landfills are currently included on a list maintained by the State.

The General Assembly has appropriated funding through Senate Bill 1492 to determine the location of these landfills and identify potential hazards to the public and the environment. After reviewing the information contained in the State's files, your property and/or a nearby property may have been used as a landfill in the past. The State requests permission to inspect your property to look for the disposal area and the presence of any hazards that may exist because of the property's past use as a landfill. Any cataloged landfills determined not to be present will be removed from the State's list.

Marshall Miller & Associates, Inc. and Schnabel Engineering South, P.C. have been contracted by the State to perform location research and inspection of these pre-regulatory landfill sites. This inspection is for information gathering purposes only. By granting permission you are not assuming responsibility for any hazards found.

If you have any questions, please contact me at (919) 508-8463.

Sincerely,

Bruce E. Lefler Jr., Hydrogeologist
Pre-Regulatory Landfill Unit
Inactive Hazardous Sites Branch, Superfund Section
Division of Waste Management

Executive Summary

The City of Charlotte – Engineering and Property Management Department (E&PM), elected to conduct a Limited Phase I Environmental Site Assessment (ESA) of the northwestern portion of the current Southside Park (formerly the “Shuman Avenue” Incinerator) located at Remount and Toomey Avenues in Charlotte, North Carolina (site or subject property). A Site Location Map is presented as Figure 1.

The site is a City-owned property, Mecklenburg County parcel number 14501416; that is adjacent to a Mecklenburg County-owned property, Mecklenburg County parcel number 14501415. Collectively, these two parcels comprise Southside Park (a Mecklenburg County Parks and Recreation Facility) with address 645 Remount Road. The City parcel consists of approximately 6.9 acres. The County parcel consists of approximately 10.8 acres.

Southside Park is generally surrounded by a combination of residential, commercial and industrial uses. The site (northwestern portion of Southside Park and the City-owned parcel) currently includes a tennis court, playground, picnic shelter, grassy areas and a paved parking lot. The adjacent County parcel includes a grassy soccer/baseball field, public grills, and a perimeter walkway. The County parcel is bound to the south by a creek within a wooded embankment. Both parcels are in good condition and have no sensory indications of recognized environmental conditions.

The adjacent parcel to the northwest of the site is a City-owned animal shelter; to the northeast is a multi-family residential community, to the southeast is a community based social services facility; and to the southwest are residential and faith-based properties.

A review of the historical sources indicates that the City parcel was the previous site of the City-owned “Shuman Avenue” Incinerator and ash landfill. The name “Shuman Avenue” comes from the fact that current Remount Road was formerly known as Shuman Avenue. Both the City parcel and the County parcel were the previous sites of underground ash disposal from the Incinerator. The Incinerator and ash landfill were believed to be operational from the late 1920’s thru the mid 1950’s. The approximate limits of ash burial are reportedly in the northwest portion of the block; bounded by the on-site creek and creek/storm drainage line on the County parcel.

The Incinerator facility was constructed on a multi-level site. The upper level (first floor) of the Incinerator (including 3 Chimneys) was removed from the site in the late 1960’s when the County constructed Phase I of Southside Park. The lower level (basement) of the incinerator building was removed in the mid-1990’s.

A review of the United States Geological Survey (USGS) 7.5-minute topographic quadrangle map for Charlotte East, North Carolina, 1988 shows that the subject property is approximately 676 feet above mean sea level (msl). The western portion of the subject property slopes downward toward the west and the eastern portion of the subject property slopes downward to the south towards a tributary of Sugar Creek.

E&PM reviewed information gathered from several environmental databases through Environmental Data Resources, Inc. (EDR) to evaluate whether activities on or near the subject property have the potential to create a Recognized Environmental Condition on the subject property. The subject property address was not identified on the databases searched.

Three properties within $\frac{1}{4}$ mile of the site were listed on databases. Based on a field review of the proximity to the site and/or topographic relations, it is unlikely that these facilities represent an REC at the subject property.

Multiple facilities were identified at distances greater than 1/4-mile from the subject property. Based on distance from the subject property and regulatory status, it is unlikely that these facilities have created a REC at the subject property.

However, this assessment did reveal the following Recognized Environmental Condition in connection with the subject property:

- The subject property was a former municipal waste incinerator and ash landfill. The facility was operated by the City of Charlotte from the late 1920's thru the mid-1950's. Original 1928/29 design drawings indicate that the building plan was approximately 115-ft by 95-ft, with three (3) 125-ft high Radial Brick Chimneys. The facility was constructed on a multi-level site. Vehicles loaded with solid waste drove at-grade into the building's "Charging Floor" where waste was dumped into 'chutes' in the floor to a lower level. This lower level held three (3) Combustion Chambers for incineration. Waste ash was hauled out from the chambers, and reportedly buried on-site (north of the creek) as well as on the adjacent County property to the east.

Based on these findings, E&PM recommends that prior to the sale or development of the property, a Phase II ESA of the subject property be conducted to address the potential for soil and groundwater impacts associated with on-site ash disposal and former operation of the incinerator.

This Executive Summary is not intended to be a "stand-alone" document, but rather a summary of our findings as described in the following report. It is intended to be used in conjunction with the scope of services and limitations described therein.

SECTION ONE – Introduction

1.1 PURPOSE

The City of Charlotte – Engineering and Property Management Department (E&PM), elected to conduct a Limited Phase I Environmental Site Assessment (ESA) of the northwestern portion of the current Southside Park (formerly the “Shuman Avenue” Incinerator) located at Remount and Toomey Avenues in Charlotte, North Carolina (site or subject property). The objective of this environmental review is to attempt to identify recognized environmental conditions associated with the subject property prior to the potential sale or development of the property. This review, while limited in scope, utilizes major portions of the methodology of the “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process”, (ASTM Standard E 1527-05).

1.2 DETAILED SCOPE-OF-SERVICES

E&PM completed the following tasks:

1. Contracted with Environmental Data Resources, Inc. (EDR) to conduct a regulatory database search of known underground storage tank (UST) facilities; landfills; hazardous waste generation, treatment, storage and disposal facilities; and subsurface contamination in the surrounding area up to a mile from the center of the subject property (or subject property boundaries). The EDR report is presented in Appendix B.
2. Researched subject property history by (a) reviewing a chronology of aerial photographs and topographic maps covering the subject property and adjoining properties available from EDR; (b) reviewing historical city directories for the subject property and nearby properties available from EDR; and reviewing archived City and County files relevant to the subject property. Copies of some of these documents are presented in Appendix C.
3. Conducted site reconnaissance for obvious evidence of potential contamination such as current hazardous materials storage or use; unusually stained soils, slabs, and pavements; drains, sumps, drums, tanks, and electrical transformers; stressed vegetation; and discarded hazardous materials containers. Photographs were not taken.
4. Interviewed various current and former City and County employees familiar with the former Shuman Avenue Incinerator site and/or the development of Southside Park.
5. Evaluated the information collected and prepared this report summarizing our findings, opinions, and conclusions.

1.3 LIMITATIONS AND EXCEPTIONS

This report and the associated work have been provided as a preliminary review of the site’s environmental condition. This report is not intended to be a complete ASTM E1527-05 ESA; nor is the report intended to fulfill the requirements of the Innocent Landowner provisions of the US EPA. No warranties are expressed or implied.

This ESA is not a regulatory compliance audit or an evaluation of the efficiency or the use of any hazardous materials at the subject property.

SECTION TWO - Site Description

2.1 LOCATION AND LEGAL DESCRIPTION

Southside Park is bounded by Toomey Ave on the west, Remount Road on the north, and residential and light commercial facilities to the south and east. The subject property occupies the northwestern portion of the current Southside Park (formerly known as the “Shuman Avenue” Incinerator) This parcel is owned by the City of Charlotte, Mecklenburg County parcel number 14501416, and consists of approximately 6.9 acres. The adjacent parcel consists of the remaining northeastern portion of Southside Park. This parcel is owned by Mecklenburg County, Mecklenburg County parcel number 14501415, and consists of approximately 10.8 acres. Southside Park in its entirety is presented on Figure 1, provided in Appendix A. A complete legal description of the subject property was not obtained.

2.2 PHYSICAL SETTING

A review of the United States Geological Survey (USGS) 7.5-minute topographic quadrangle map for Charlotte West, North Carolina, 1996 shows that the subject property is approximately 676 feet above mean sea level (msl). The western portion of the subject property slopes downward toward the west and the eastern portion of the subject property slopes downward to the north. A tributary of Sugar Creek bisects the site. The National Wetlands Inventory maps (shown in the EDR report, Appendix B) show no recorded wetland areas at the subject property. The closest mapped wetland is located approximately 3/4-mile to the west of the subject property. Federal Emergency Management Agency (FEMA) flood zone data included in the EDR report indicates the northwestern portion of the subject property is located approximately 3/8-mile to closest mapped 100- and 500- year flood plains. None of the subject property is within a mapped 100 or 500-year flood zone.

2.3 SITE AND VICINITY GENERAL CHARACTERISTICS

The subject property occupies the northwestern portions of the Southside Park property located at 645 Remount Road, Mecklenburg County parcel numbers 14501415 (10.8 acres) and 14501416 (6.96 acres) as described above. The subject property is zoned R-22MF, Multi-family—22.0 units per acre. The subject property is located in an area of Charlotte, North Carolina where the surrounding zoning designations are R-22MF (Multi-family—22.0 units per acre), O-1 (Office district—max. floor area ratio: 0.60), I-1 (Industrial (light industrial)), B-1 (Business (neighborhood business)), and O-2 (Office district—max. floor area ratio: 1.0). The general site layout and characteristics, along with adjacent property uses can also be seen in Figure 1 presented in Appendix A.

2.4 CURRENT SITE USE

The subject property is currently being used as a park and recreation site. The subject property was found to be well maintained, free of any significant evidence of litter or improperly disposed trash.

2.5 DESCRIPTIONS OF STRUCTURES, ROADS, AND OTHER IMPROVEMENTS

The subject property is the northwestern portion of the property located at 645 Remount Road in Charlotte, North Carolina. The subject property was observed to include park benches, playground equipment, tennis courts, a basketball court, a shelter, picnic grills and parking. The subject property is mostly covered by grass, with an asphalt parking lot, basketball and tennis courts; and several concrete walking paths. At least two drop inlet drains also exist within the park boundaries to provide storm water drainage for the site.

2.6 CURRENT ADJOINING PROPERTY USES

During the site reconnaissance, E&PM Staff conducted a walking and drive-by review of adjoining land uses along accessible roads. Table 2-1 lists the adjacent businesses and property uses. Figure 1 also shows the adjacent properties.

TABLE 2-1 - SUMMARY OF ADJACENT PROPERTY USAGE

Direction	Property
North	Corporate-Industrial / Multi-Family Residential
East	Office-Community Center / Multi-and Single-Family Residential
South	Single-Family Residential / Office-Community Center
West	Office-Animal Shelter

SECTION THREE - User-Provided Information

3.1 TITLE RECORDS

E&PM Staff did not obtain a Chain of Title (COT) report for the subject property. However, a review of the Property Ownership and Land Records Information System (POLARIS) revealed the following:

- Parcel 14501416 (subject property) is currently owned by the City of Charlotte and no previous owners are noted.
- Parcel 14501415 (adjacent property and other section of the Park) is currently owned by Mecklenburg County; was previously owned by the City of Charlotte; and no other previous owners are noted.

3.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

The subject property is owned by the City of Charlotte. No Environmental Lien Search Report was obtained.

3.3 SPECIALIZED KNOWLEDGE

E&PM Staff obtained some limited historical documentation regarding the subject property from the Mecklenburg County Parks and Recreation Department and the City of Charlotte Real Estate Division, which is referenced throughout this report. The specialized knowledge contained within this documentation includes construction plans, property maps, and references to prior uses, tenants, soils testing, property transfers, etc.

3.4 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

E&PM Staff are not aware of any adjustments in the purchase amount for environmental issues.

3.5 OWNER, SITE MANAGER AND OCCUPANT INFORMATION

The subject property is currently owned by the City of Charlotte and is operated by Mecklenburg County as a portion of Southside Park, an open-access, public park with park benches, playground equipment, tennis courts, a basketball court, a shelter, picnic grills, concrete walking paths and asphalt parking.

3.6 REASON FOR CONDUCTING PHASE I ESA

The Phase I ESA is being conducted in order to summarize currently known information about this City property prior to any future development or sale.

SECTION FOUR - Record Review

4.1 ENVIRONMENTAL DATABASES REVIEW

E&PM Staff reviewed information gathered from several environmental databases through EDR to evaluate whether activities on or near the subject property have the potential to create a Recognized Environmental Condition (REC) on the subject property. EDR reviews databases compiled by federal, state, and local governmental agencies. The complete list of databases reviewed is provided in the EDR report, which is included in Appendix B. It should be noted that this information is reported as E&PM received it, as it is provided in various government databases. It is not possible for E&PM to verify the accuracy or completeness of information contained in these databases. However, the use of and reliance on this information is a generally accepted practice in the conduct of environmental due diligence. The ASTM databases searched and the information obtained where properties were identified within the search radius are summarized below in Table 4-1. Additional supplemental databases searched are summarized in the EDR report.

Table 4-1 – SUMMARY OF ENVIRONMENTAL DATABASES

Type of Database	Description of Database/Effective Date	Search Radius	Number of Identified Sites
Federal ASTM Standard			
NPL	The National Priorities List (NPL) identifies uncontrolled or abandoned hazardous waste sites. To appear on the NPL, sites must have met or surpassed a predetermined hazard ranking system score, been chosen as a state's top priority site, pose a significant health or environmental threat, or be a site where the EPA has determined that remedial action is more cost-effective than removal action.	1.00 mile	None
Proposed NPL	The Proposed National Priorities List (NPL) identifies uncontrolled or abandoned hazardous waste sites with potential for coverage under the NPL program.	1.00 mile	None
Delisted NPL	The Delisted National Priorities List (NPL) identifies hazardous waste sites removed from the NPL program.	1.00 mile	None
CERCLIS	The Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) database iden-	0.50 mile	One (1)

	tifies hazardous waste sites that require investigation and possible remedial action to mitigate potential negative impacts on human health or the environment.		
CERC-NFRAP	The No Further Remedial Action Planned Report under CERCLA (CERCNFRAP), also known as the CERCLIS Archive, contains information pertaining to sites that have been removed from the U.S. EPA's CERCLIS database. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration.	0.50 mile	Two (2)
RCRA CORRACTS	Identifies hazardous waste handlers with RCRA corrective action activity.	1.00 mile	One (1)
RCRIS TSDs	Resource Conservation & Recovery Information System (RCRIS) treatment, storage, or disposal (TSD) sites	0.50 mile	None
RCRIS Generators	RCRA-regulated hazardous waste generator notifiers list; both Large- and Small-Quantity Generators are included in this list. A RCRA small-quantity generator (SQG) is defined as a facility that generates less than 1,000 kilograms (kg) per month of hazardous waste or less than 1 kilogram per month of acutely hazardous waste. A RCRA large-quantity generator (LQG) is defined as a facility that generates greater than 1,000 kg per month of non-acutely hazardous wastes or greater than 1 kg per month of acutely hazardous wastes.	0.25 mile	One (1) CESQG
ERNS	EPA's Emergency Response Notification System (ERNS) list contains reported spill records of oil and hazardous substances.	Target Property	None
US BROWNFIELDS	A listing of Brownfields sites.	0.50 mile	One (1)
FUDS	Formerly Used Defense Sites where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.	1.00 mile	None
FINDS	Facility Index System contains both facility information and 'pointers' to other sources	Target Property	None

	that contain more detail.		
State ASTM Standard			
NC SHWS	North Carolina's Inactive Hazardous Sites Inventory is the state equivalent of CERCLIS.	1.00 mile	Twenty-five (25)
NC IMD	Incident Management Database lists groundwater and/or soil contamination incidents.	0.50 mile	Fourteen (14)

INDIAN RESERV	Indian Reservations	1.00 mile	None
Manufactured Gas Plants	EDR Proprietary Records	1.00 mile	None
Historical Auto Stations	EDR Proprietary Records	0.5 mile	None

Historical Cleaners	EDR Proprietary Records	0.5 mile	None
---------------------	-------------------------	----------	------

4.1.1 Subject Property

The subject property address was not listed in any of the databases searched.

4.1.2 Adjacent Properties

None of the immediately adjacent property addresses were listed in any of the databases searched.

4.1.3 Site Vicinity

Two (2) cross/up-gradient facilities were identified in the regulatory database report at a distance less than ¼ -mile from the subject property.

4.1.4 Other Information

E&PM Staff also reviewed the Orphan Sites list (a list of sites that have not been geocoded based on a lack of sufficient data regarding their exact location) presented in the EDR report. The review of the Orphan Sites list did not identify any properties that have the apparent possibility to have created a Recognized Environmental Condition at the subject property. A copy of the complete EDR database is included in this report as Appendix B.

4.2 REGULATORY AGENCY CONTACT

During the performance of an environmental assessment, state and local regulatory agencies having jurisdiction over the subject property may be contacted to evaluate the following information: the status of relevant environmental permits; whether there has been any violations, or other similar correspondence from such agencies; whether any corrective action or remediation is planned, currently taking place, or has been completed at the subject property; whether there have been any reported violations or complaints that the subject property is not in compliance with environmental laws, regulations, or standards, and whether the subject property is under investigation for such non-compliance; whether the subject property is listed on any of the regulatory databases; and whether there is any other pertinent documentation on file with such regulatory agencies regarding the subject property or surrounding sites of concern.

Whereas the subject property was not listed in any of the databases searched, E&PM did not contact any regulatory agencies.

4.3 PREVIOUS INVESTIGATIONS

E&PM did not obtain or review any previous investigative reports regarding the subject property or adjoining properties.

4.4 HISTORICAL USE INFORMATION ON THE SUBJECT PROPERTY AND

ADJOINING PROPERTY

As noted above, E&PM Staff obtained archived historical files from the Mecklenburg County Parks and Recreation Department regarding Southside Park. From these files, much of the foregoing historical information was compiled.

For many years, the subject property and the adjacent parcel on the southside of Remount Road was used as a landfill site for the disposal of municipal solid waste. An incinerator for the burning of waste material was also operated at the on the subject property, at the southeast corner of Remount Road and the current Toomey Avenue(the incinerator building reportedly was located at a location approximately across from the current Brookhill Rd., where a small park structure is now.

Original 1928/29 design drawings indicate that the Incinerator building plan was approximately 115-ft by 95-ft, with three (3) 125-ft high Radial Brick Chimneys. The facility was constructed on a multi-level site. Vehicles loaded with solid waste drove at-grade into the building's "Charging Floor" where waste was dumped into 'chutes' in the floor to a lower level. This lower level held three (3) Combustion Chambers for incineration. Waste ash was hauled out from the chambers, and reportedly buried on-site (north of the creek) as well as on the adjacent County property to the east.

The operation of the incinerator was curtailed in June 1946 and terminated in January 1950. Use of the adjacent property for landfill continued until January 1956, after which time portions of the adjacent property and the subject property were converted to other uses, including playgrounds and an animal shelter. (Sometime prior to the construction of I-77, Toomey Avenue was relocated eastward, thereby separating the animal shelter parcel from the park parcel and causing the animal shelter parcel to abut I-77.)

On November 2, 1959 City Council authorized the leasing of the incinerator building to Keeter Trailer and Body Co. at a rental of \$100 per month. The building was used by this firm for the building and fitting of truck and trailer bodies until 1968 (approx.); following City Council's approval on August 7, 1967 to demolish the old incinerator building to the first floor, to turn the property over to Park & Recreation Commission (who would use the first floor as an outdoor all-purpose area and use the basement as a storage area for their equipment), and to give the then current occupant, Keeter Trailer and Body Company, a minimum of six months to find other quarters.

The Southside Park was eventually developed/renovated/improved by the City and turned over to the Parks and Recreation Department in June 1978. Southside Park also underwent several subsequent improvements during the 1980's and 1990's. During these latter renovations, the incinerator chambers (basement of old incinerator building) were ultimately demolished. The Park improvements included a baseball field, construction for which required the addition of many tons of fill dirt. However, over the years, the baseball field continued to sink; and in spite of the addition of more fill dirt, the ballfields were eventually removed. Currently, the park

consists of mostly grassy areas, with an open-aired shelter, concrete walkpaths, grills, playground equipment, a tennis court and a basketball court.

In February 1985 (during the Park renovations of the 1980's and 1990's), 55-gallon drums of material were found in the then existing incinerator basement. After reviews with long-term Parks and Recreation employees and testing by the Mecklenburg EPA, the following explanations were surmised:

- No one was sure where the chemicals came from, but they had been observed to have been there for a long time. It was suspected that they were left over from the days the Operations Department operated the incinerator. The drums were only identified by staff at the time because they had initiated a clean-up effort at the storage facility [perhaps in preparation for the demolition?].
- The material was determined to be lead and chromium, which are hazardous to the touch and if consumed. As such, the disposal was to be handled by professionals instead of employee; and the disposal was to occur quickly so that leakage from the corroding barrels did not contaminate the groundwater. The building was kept secure until the hazardous material was disposed to prevent park user access to the hazards.

In January 1989, (also during the Park renovations of the 1980's and 1990's), seven (7) soil boring samples were requested by City Engineering.

No hazardous waste disposal manifests or soil testing results were located in the archived Southside Park files.

E&PM Staff contacted EDR to obtain historic aerial photographs and Sanborn Fire Insurance Maps. Aerial photographs were available for the years 1950, 1968, 1973, 1988, 1996, and 2006. No Sanborn Maps were available. Upon review, the incinerator building/stacks are observable on the 1950, 1968, 1973 and 1988 aerial maps. City Real Estate Division also located a 1954 Powell Bill Map that identified the Dog Pound and the Shuman Ave Incinerator near Toomey Ave.

E&PM Staff attempted to locate references to the incinerator (subject property) in the historical City Directories at the public library, but was unsuccessful. Subsequent to this document search, E&PM Staff learned that Remount Road was previously named Shuman Avenue. This was believed to be the source of the failed Directory search for the subject property and another search was not completed. A Directory Search for adjacent properties was not conducted.

TABLE 4-2 - CHRONOLOGICAL SUMMARY OF HISTORICAL LAND USE

Historical Land Use Source	Date	Observations
Aerial Photograph	1950	Incinerator and Stacks, Old and New Toomey

Powell Bill Map	1954	Dog Pound, Incinerator, Toomey west of Dog Pound
Aerial Photograph	1968	Incinerator and Stacks, Dog Pound, Old and New Toomey, I-77 clearing started, Brookhill and other residential development completed
Aerial Photograph	1973	Incinerator and Stacks, New Toomey, I-77 completed
Aerial Photograph	1988	Park developed, Incinerator Building still present
Aerial Photograph	1996	Park expanded, Incinerator Building gone
Aerial Photograph	2006	Park developed in its current form

ASTM E1527-05 standards for Phase I ESAs require that historical land use be identified to the property's first developed use (including agriculture) or back to 1940, whichever is earlier, using reasonably ascertainable sources. Other than the 1928/29 original Incinerator design drawings, the earliest available standard historical source reviewed by E&PM was an aerial photograph from 1950, which showed the incinerator with stacks and the dog pound in the vicinity of few other developments. Therefore, the first developed use of the property appears to have been identified. Based on the consistent, developed use of the land thru 2006 and the lack of any listings for the subject or adjacent properties in the regulatory databases, E&PM believes the absence of historical information prior to construction of the incinerator is not significant.

SECTION FIVE - Site Reconnaissance

5.1 METHODOLOGY AND LIMITING CONDITIONS

Ms. Theresa Watley and Mr. David Wolfe of the City of Charlotte – Engineering and Property Management Department (E&PM) conducted a reconnaissance of the site on Thursday, August 7, 2008 to evaluate current site use and identify potential sources of hazardous substances on and off site (on adjacent properties).

Figure 1 provides a Site Plan / General Vicinity Map showing features observed on the subject property. No photographs were taken during the site reconnaissance. E&PM Staff conducted the site reconnaissance by visually observing the subject property. The periphery of the subject property was observed by walking and driving, and was viewed from adjacent roads.

5.2 GENERAL SITE SETTING

Southside Park is bounded by Toomey Ave on the west, Remount Road on the north, the Charlotte The subject property occupies the northwestern portion of the current Southside Park (formerly the “Shuman Avenue” Incinerator) located at Remount and Toomey Avenues in Charlotte, North Carolina. This parcel is owned by the City of Charlotte, Mecklenburg County parcel number 14501416, and consists of approximately 6.9 acres. The adjacent parcel consists of the remaining northeastern portion of Southside Park. This parcel is owned by Mecklenburg County, Mecklenburg County parcel number 14501415, and consists of approximately 10.8 acres. Southside Park in its entirety is presented on Figure 1, provided in Appendix A. The site is located in a mixed use area of Charlotte, North Carolina.

5.3 INTERIOR AND EXTERIOR OBSERVATIONS

5.3.1 Hazardous Substances and Petroleum Products

E&PM did not observe any hazardous substances and/or petroleum products at the subject property during the site inspection.

Hazardous substances and/or petroleum products were observed at a nearby auto mechanic facility northeast of the subject property.

5.3.2 Aboveground Storage Tanks

No above ground storage tanks (ASTs) were observed at the subject property during the site inspection.

5.3.3 Underground Storage Tanks

No underground storage tanks (USTs) were observed at the subject property during the site inspection.

5.3.4 Odors

No unusual or strong odors were noted at the subject property during the site inspection.

5.3.5 Pools of Liquid

No pools of liquid were observed at the subject property at the time of the site visit.

5.3.6 Drums and Containers

No drums and/or containers were observed at the subject property at the time of the site reconnaissance.

5.3.7 Unidentified Substance Containers

No other unidentified substance containers were observed at the subject property at the time of the site reconnaissance.

5.3.8 Polychlorinated Biphenyl-Containing Equipment

No PCB containing equipment was observed at the subject property at the time of the site reconnaissance.

5.3.9 Emergency Generators

No emergency generators were observed on the subject property at the time of the site reconnaissance.

5.3.10 Drains, Sumps, Pits, Ponds, and Lagoons

No sumps, pits, or lagoons were observed or reported on the subject property at the time of the site reconnaissance.

5.3.11 Stained Soil or Pavement

No stained soil or pavement was observed on the subject property at the time of the site reconnaissance.

5.3.12 Stressed Vegetation

No stressed vegetation was observed on the subject property at the time of the site reconnaissance.

5.3.13 Solid Waste

No solid waste is currently generated at the subject property; and only minor amounts of litter were observed throughout the subject property.

5.3.14 Wastewater and Stormwater

The subject property does not currently contain any public restrooms, although the archived files indicated that a restroom building was previously constructed and demolished. Therefore, connections to the City of Charlotte sanitary sewer system are assumed to still exist. The subject property does contain water fountains which currently generate wastewater. Stormwater on the subject property appeared to be handled by ground infiltration, sheet flow

to curbside drains and the on-site tributary of Sugar Creek, and several storm drainage drop inlets [with running water perhaps from a recent rain] observed across the subject and/or adjacent properties comprising Southside Park.

5.3.15 Wells

No wells were observed on the subject property. No groundwater monitoring wells were observed during the site reconnaissance.

5.3.16 Septic Systems

No septic systems were observed on the subject property.

5.3.17 Asbestos-Containing Materials

The subject property does not have any structures that could potentially contain asbestos-containing materials to be present.

5.3.18 Lead-Based Paint

The subject property has playground equipment which is owned and operated by Mecklenburg County. No testing for lead-based paint was performed during this investigation.

5.3.19 Radon

E&PM reviewed the Federal EPA Radon Zones provided in the EDR report to determine if the subject property is located in an area of low radon concentrations. Based on this review of the Radon Zone data, the subject property is considered to be in Zone 2 for radon concentrations. The average indoor radon concentrations for Zone 2 are predicted to be equal or greater than 2 pico Curies per liter (pCi/L) and equal or less than 4 pCi/L. E&PM also reviewed the State of North Carolina's Radon Database information provided in the EDR report, regarding the site tested in the vicinity of the subject property in Mecklenburg County, North Carolina. The average radon activity level for a first floor living area was not reported. The average radon activity level for the basement was reported to be 2.10 pCi/L. Based on these radon results, the absence of any structures, and the current use of the subject property as a park, there is a low probability for radon to represent an environmental concern to the subject property.

5.3.20 Wetlands

The National Wetlands Inventory maps (shown in the EDR report, Appendix B) show no recorded wetland areas at the subject property.

5.3.21 Drinking Water Supply

Drinking water is available at the subject property from water fountains, reportedly supplied to the subject property from the City of Charlotte. No drinking water supply wells were observed in the general vicinity of the subject property.

SECTION SIX - Interviews

E&PM Staff interviewed several former and current City and County Staff that were previously involved with or had recollections of Southside Park and/or the City Incinerator. The information obtained during these interviews is reported in the applicable sections of this report to the extent it was consistent with the information obtained in the archived files. Interviewees included Mr. Ken Gillis – retired from City Engineering; Mr. David Snider – current City Surveyor; Mr. Keith Carpenter – current City Engineering Project Manager; Mr. Carl Jarrett – current City Engineering Program Manager; Mr. Dennis Tyndall – current Mecklenburg County LUESA Hydrogeologist; Mr. Joe Hack – current Mecklenburg County LUESA Solid Waste Management Project Manager; Ms. Nancy Brunnemer – current County Real Estate Services Agent and former Mecklenburg County Parks & Recreation staffer; Ms. Dot Law – current Mecklenburg County Parks & Recreation Financial Services Director; Mr. John DeKemper – former Mecklenburg County Park Planner; and Mr. Blaine Gregory – current Mecklenburg County Parks & Recreation Sr. Planner.

SECTION SEVEN - Findings, Opinions and Conclusions

7.1 FINDINGS

E&PM identified the following conditions at the subject property:

- A review of the historical sources indicates that the City parcel was the previous site of the City-owned "Shuman Avenue" Incinerator and ash landfill. Both the City parcel and the adjacent County parcel were the previous sites of underground ash disposal from the Incinerator. The Incinerator and ash landfill are believed to have been operational from the late 1920's thru the mid 1950's. The approximate limits of ash burial are reportedly in the northwest portion of the block; bounded by the on-site creek and creek/storm drainage line on the County parcel.
- The subject property address was not identified on any regulatory databases. Multiple off-site facilities within the applicable search radii were identified; however no off-site properties are anticipated to result in a recognized environmental condition to the subject property. Historical records revealed that 55-gallon drums of hazardous waste were discovered stored in the incinerator basement long after incinerator operations ceased.
- Limited quantities of litter were observed throughout the subject and adjacent properties.

7.2 OPINIONS

It is the opinion of the E&PM that:

- The previous operations of the incinerator and landfill at the subject and adjacent properties represent a Recognized Environmental Condition.
- No off-site facilities within applicable search radii were identified which are expected to result in a Recognized Environmental Condition to the subject property.
- The drums of hazardous materials found in the storage basement is not significant since no contamination or improper disposal notifications have been identified.
- The negligible litter is not significant since the minimal quantity is actually indicative of a well-maintained public facility.

7.3 CONCLUSIONS

E&PM has performed a Limited Phase I ESA of the northwestern portions of the property located at 645 Remount Road in Charlotte, North Carolina also known as Southside Park. This assessment revealed the following Recognized Environmental Condition in connection with the subject property:

- The subject property was a former municipal waste incinerator and ash landfill. The facility was operated by the City of Charlotte from the late 1920's thru the mid-1950's. Original 1928/29 design drawings indicate that the building plan was approximately 115-ft by 95-ft, with three (3) 125-ft high Radial Brick Chimneys. The facility was constructed on a multi-level site. Vehicles loaded with solid waste drove at-grade into the building's "Charging Floor" where waste was dumped into 'chutes' in the floor to a lower level. This lower level held three (3)

Combustion Chambers for incineration. Waste ash was hauled out from the chambers, and reportedly buried on-site (north of the creek) as well as on the adjacent County property to the east.

Based on these findings, E&PM recommends that prior to the sale or development of the property, a Phase II ESA of the subject property be conducted to address the potential for soil and groundwater impacts associated with on-site ash disposal and former operation of the incinerator.

Section EIGHT – Additional Services

No additional services were performed.

SECTION NINE – References

References of significance are mentioned throughout the report.

SECTION TEN - Signatures of Environmental Professionals

This section includes qualification statements of the environmental professionals responsible for conducting the ESA and preparing this report.

The site reconnaissance, file reviews, and report writing were performed by Ms. Theresa J.L. Watley of the City of Charlotte, Engineering and Property Management Department. Ms. Watley has over 18 years of experience in Engineering, implementing compliance audits and serving as a Project Manager. Ms. Watley earned a BS in Chemical Engineering from Howard University.

The report was prepared under the supervision of Mr. David Wolfe, PE, of the City of Charlotte, Engineering and Property Management Department. Mr. Wolfe has over 17 years of experience in due diligence assessments, groundwater remediation, and project management.

Mr. Wolfe declares that, to the best of his professional knowledge and belief, he meets the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. Mr. Wolfe has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property.

Theresa J.L. Watley
Sr. Project Manager

David Wolfe, PE
Environmental Program Manager

EXECUTIVE SUMMARY

A search of the environmental records was conducted by Environmental Data Resources, Inc. (EDR). CITY OF CHARLOTTE used the EDR FieldCheck System to review and/or revise the results of this search, based on independent data verification by CITY OF CHARLOTTE. The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

An online review and analysis by CITY OF CHARLOTTE of the CERCLIS list, as provided by EDR, and dated 04/08/2008 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
<i>DYNTECH</i>	<i>2213 TOOMEY STREET</i>	<i>1/4 - 1/2 NE</i>	<i>F20</i>	<i>43</i>

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

An online review and analysis by CITY OF CHARLOTTE of the CERC-NFRAP list, as provided by EDR, and dated 12/03/2007 has revealed that there are 2 CERC-NFRAP sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

An online review and analysis by CITY OF CHARLOTTE of the CORRACTS list, as provided by EDR, and dated 03/26/2008 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
PARKS-CRAMER CO	2000 S. BLVD	1/2 - 1 E	40	77

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

An online review and analysis by CITY OF CHARLOTTE of the RCRA-CESQG list, as provided by EDR, and dated 03/06/2008 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

STATE AND LOCAL RECORDS

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environment & Natural Resources' Inactive Hazardous Sites Program.

An online review and analysis by CITY OF CHARLOTTE of the SHWS list, as provided by EDR, and dated 04/14/2008 has revealed that there are 25 SHWS sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

BROWNFIELDS: A brownfield site is an abandoned, idled, or underused property where the threat of environmental contamination has hindered its redevelopment. All of the sites in the inventory are working toward a brownfield agreement for cleanup and liability control.

An online review and analysis by CITY OF CHARLOTTE of the BROWNFIELDS list, as provided by EDR, and dated 10/01/2007 has revealed that there is 1 BROWNFIELDS site within approximately 0.5 miles of the target property.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Off-site waste receiver: Commercial status unknown

Historical Generators:

Date form received by agency: 10/28/1988
Facility name: SOUTHERN TRUCK SERVICE
Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Other Pertinent Environmental Activity Identified at Site

Not reported

NC-FITS (North Carolina - Facility Identification Template For States) is North Carolina Department of Environment and Natural Resources' (NCDENR) Facility Identification Template for States that provides a common facility identifier in order to improve accessibility to comprehensive information about environmental regulated entities in the state of North Carolina.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites,

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Other Pertinent Environmental Activity Identified at Site

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

 Other Pertinent Environmental Activity Identified at Site

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

NC-FITS (North Carolina - Facility Identification Template For States) is North Carolina Department of Environment and Natural Resources' (NCDENR) Facility Identification Template for States that provides a common facility identifier in order to improve accessibility to comprehensive information about environmental regulated entities in the state of North Carolina.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when

PACKAGE PRODUCTS CO FLEXIBLE P (Continued)

1000267782

complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

NC-FITS (North Carolina - Facility Identification Template For States) is North Carolina Department of Environment and Natural Resources' (NCDENR) Facility Identification Template for States that provides a common facility identifier in order to improve accessibility to comprehensive information about environmental regulated entities in the state of North Carolina.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: D039
Waste name: TETRACHLOROETHYLENE

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF

Comments: One 1,000-gallon gasoline UST removed in 1986. ESA (2001) sampling indicates minor soil contamination and 2L exceedances. LSA submitted using ESA data. No additional soil collection. MW-2 qualifies for LSA well. Soil analytical during ESA not complete for UST closure. WSW survey letters not completed. WSW survey and soil boring completed. NRP for groundwater to close.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/30/2008	Source: EPA
Date Data Arrived at EDR: 05/06/2008	Telephone: N/A
Date Made Active in Reports: 06/09/2008	Last EDR Contact: 04/28/2008
Number of Days to Update: 34	Next Scheduled EDR Contact: 07/28/2008
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/30/2008	Source: EPA
Date Data Arrived at EDR: 05/06/2008	Telephone: N/A

Number of Days to Update: 34	Next Scheduled EDR Contact: 07/28/2008
	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 05/19/2008
Number of Days to Update: 56	Next Scheduled EDR Contact: 08/18/2008
	Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/08/2008	Source: EPA
Date Data Arrived at EDR: 04/25/2008	Telephone: 703-412-9810
Date Made Active in Reports: 05/21/2008	Last EDR Contact: 06/17/2008
Number of Days to Update: 26	Next Scheduled EDR Contact: 09/15/2008
	Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/03/2007	Source: EPA
Date Data Arrived at EDR: 12/06/2007	Telephone: 703-412-9810

Number of Days to Update: 76	Next Scheduled EDR Contact: 09/15/2008
	Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/06/2008

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/06/2008
Date Data Arrived at EDR: 03/06/2008

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 04/04/2008	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/17/2008	Telephone: 703-603-0695
Date Made Active in Reports: 05/15/2008	Last EDR Contact: 06/30/2008
Number of Days to Update: 28	Next Scheduled EDR Contact: 09/29/2008
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 04/04/2008	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/17/2008	Telephone: 703-603-0695

DOT OPS: Incident and Accident Data

Department of Transportation, Office of Pipeline Safety Incident and Accident data.

Date of Government Version: 02/14/2008	Source: Department of Transportation, Office of Pipeline Safety
Date Data Arrived at EDR: 02/27/2008	Telephone: 202-366-4595
Date Made Active in Reports: 03/20/2008	Last EDR Contact: 05/28/2008
Number of Days to Update: 22	Next Scheduled EDR Contact: 08/25/2008
	Data Release Frequency: Varies

CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Data Release Frequency: Quarterly

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 04/01/2008

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2005
Date Data Arrived at EDR: 06/15/2007

East Map:	35080-B7 CHARLOTTE EAST, NC
Most Recent Revision:	1988

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> MECKLENBURG, NC	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map
--	--

Flood Plain Panel at Target Property: 3701590013B

Additional Panels in search area: 3701590012C

3701590019B

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> CHARLOTTE WEST	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	--

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
1	1/4 - 1/2 Mile ESE	NE
A2	1/4 - 1/2 Mile SSE	Not Reported
A3	1/4 - 1/2 Mile SSE	Not Reported
4	1/4 - 1/2 Mile ENE	NW
5	1/2 - 1 Mile East	Not Reported
6	1/2 - 1 Mile ESE	SSE
7	1/2 - 1 Mile SSW	W
B8	1/2 - 1 Mile ENE	Not Reported
B9	1/2 - 1 Mile ENE	E
10	1/2 - 1 Mile South	SSE

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Cecil

Soil Surface Texture: sandy clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 6 Min: 4.5
2	5 inches	48 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 6 Min: 4.5
3	48 inches	61 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 6 Min: 4.5

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Pacolet

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 6 Min: 4.5
2	7 inches	29 inches	clay	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 6 Min: 4.5

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 6

Soil Component Name: Monacan

Soil Surface Texture: loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 38 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	14 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 7.3 Min: 5.1
2	14 inches	25 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 7.3 Min: 5.1
3	64 inches	79 inches	stratified sand to clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 7.3 Min: 5.1
4	25 inches	64 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 7.3 Min: 5.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Source: Department of Environment & Natural Resources

Telephone: 919-733-2090

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

North Carolina Public Water Supply Wells

Source: Department of Environmental Health

Telephone: 919-715-3243

OTHER STATE DATABASE INFORMATION

NC Natural Areas: Significant Natural Heritage Areas

Source: Center for Geographic Information and Analysis

Telephone: 919-733-2090

A polygon coverage identifying sites (terrestrial or aquatic that have particular biodiversity significance.

A site's significance may be due to the presence of rare species, rare or high quality natural communities, or other important ecological features.

NC Game Lands: Wildlife Resources Commission Game Lands

Source: Center for Geographic Information and Analysis

Telephone: 919-733-2090

All publicly owned game lands managed by the North Carolina Wildlife Resources Commission and as listed in Hunting and Fishing Maps.

NC Natural Heritage Sites: Natural Heritage Element Occurrence Sites

Source: Center for Geographic Information and Analysis

Telephone: 919-733-2090

A point coverage identifying locations of rare and endangered species, occurrences of exemplary or unique natural ecosystems (terrestrial or aquatic), and special animal habitats (e.g., colonial waterbird nesting sites).

RADON

State Database: NC Radon

Source: Department of Environment & Natural Resources

Telephone: 919-733-4984

Radon Statistical and Non Statistical Data

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Total Maps: 0

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

Limited Permission To Make Copies

City of Charlotte (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDRs professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

OFFICE OF
CITY MANAGER

CITY OF CHARLOTTE
NORTH CAROLINA

October 11, 1966

Mr. Marion Diehl, Superintendent
Park and Recreation Commission
310 North Kings Drive
Charlotte, North Carolina

Dear Marion:

Attached is a deed conveying 1.46 acre of land from the Park and Recreation Commission to the City. This is a residue sliver of land left by the bisection of the North-South Expressway with Park property. You will recall some months ago I discussed with you the possibility of combining this land with a tract owned by the City for a new dog pound site; The present pound land and facilities to be turned over to the Commission for recreational purposes.

It would be appreciated if you would review this request with members of the Commission at your earliest convenience. We are hopeful bids can be taken on the new pound within thirty days.

Yours very truly,

L. P. Bobo
Administrative Assistant

LPB:pg

REMOUNT INCINERATOR PROPERTY

FUTURE USE

Following the City Council Meeting on June 26, 1967, the Office of the City Manager requested the Planning Commission to study the site of the old incinerator on Remount Road and make recommendations pertaining to its future use. Since that time a detailed field survey of the community has been conducted, an inspection of the incinerator facility made and a meeting attended at which leaders of organization interested in the future of this area discussed this situation. In addition the zoning of the area has been studied to see if it can be improved.

The observations and recommendations which follow are the result of these investigations.

BACKGROUND

For many years the area on the southside of Remount Road was used as a landfill site for the disposal of garbage. An incinerator for the burning of waste material was also operated at the southeast corner of Remount Road and Tomney Avenue. The operation of the incinerator was curtailed in June, 1946 and terminated in January, 1950. Use of adjoining property for landfill continued until January, 1956 after which portions of the property were converted to other uses including playgrounds and an animal shelter.

On November 2, 1959 City Council authorized the leasing of the incinerator building to Keeter Tractor and Body Co. at a rental of \$100.00 per month. The building has been used by that firm since then for the building and fitting of truck and trailer bodies.

Recently several leaders of organizations interested in the development of this neighborhood became concerned about the unsightly appearance of the incinerator area as well as a need for more park and recreation facilities for the neighborhood. They contacted the Park and Recreation Commission with a proposal for the City to give the incinerator property to the Commission for conversion into a Community Center. After an investigation by the Building Inspection Department it was determined that the cost involved in such a conversion would be too much to be practical.

The Park and Recreation Commission then proposed to tear the building down to the first floor, use this floor as an outdoor all-purpose area and use the basement as a storage area for their equipment. In a recent meeting with community leaders it was determined that they felt it to be desirable for the property to be used by the Park and Recreation Commission even if a Community Center is not possible at this time.

EXISTING COMMUNITY DEVELOPMENT

In studying the development of the Southside neighborhood it is evident that the basic characteristics of this area are set and that only minor changes can

Page 2

be expected in the foreseeable future. A look at the existing land use, shown on the accompanying map, shows this community to be surrounded by industries, roads and parks so that there is little room for expansion of the residential facilities. Industry is located to the east, north and south, Revolution Park and the General Younts Expressway to the west and Marie Davis School on the south, effectively enclosing the neighborhood.

The residential community consists of approximately 1,135 dwelling units containing an estimated 4,500 people. Most of these units are contained in two housing developments - 400 in Southside Homes Public Housing and 417 in Spangler's Brookhill Village. The remaining units are contained in single-family and duplex units confined to several small pockets south of Remount Road.

The General Younts Expressway will be constructed between the Southside area and Revolution Park. It will go under Remount Road with a partial diamond interchange connection to Remount. This roadway, while creating a permanent boundary to the neighborhood on the west, will not prevent access to the Revolution Park facilities. Access will still be available via Remount Road.

Extensive park and recreation facilities are available to the area. There is a playground of approximately 11 acres which is developed with baseball field, basketball court, wading pool, playground equipment, paved all purpose area, etc. Another area of about 2 acres, which was used as the animal shelter site, is being given for park use. Within easy walking distance from the homes in the neighborhood there is Revolution Park with all the facilities of a major park, a municipal swimming pool, and a Community Center at the pool. In addition facilities are available for community use at Bethlehem Center and at Southside Homes Recreation Hall.

The incinerator site is bounded on two sides by park property, residential use in front across Remount Road and by vacant property owned by the City of Charlotte on the remaining side. The old furnace stacks are visible for a great distance because of their height. The roof of the building is in need of major repair and much work would be required to improve its exterior appearance. Other than the incinerator the only non-residential uses in the immediate vicinity are the new animal shelter and the studios of WGIV radio station. Present zoning for this area is illustrated on the accompanying map. The incinerator site is zoned for industrial purposes as well as the adjoining property along Toomey Avenue. With the exception of a small tract of land at the southeast corner of Remount Road and General Younts Expressway all the land south of Remount Road zoned industrial is controlled by the City of Charlotte. Industrial Zoning must be maintained within 300 feet of the new animal shelter in order to meet ordinance requirements for this type of use.

CONCLUSIONS AND RECOMMENDATIONS

Based on the facts as stated above and a study of how the Southside area can best be developed, the following conclusions and recommendations are submitted for consideration:

August 7, 1967
Minute Book 49 - Page 72

INCINERATOR BUILDING ON CORNER OF REMOUNT ROAD AND TOOMEY AVENUE AUTHORIZED DEMOLISHED TO THE GROUND AND TURNED OVER TO THE PARK AND RECREATION COMMISSION.

Councilman Smith moved that the City bear the expense of demolishing to the first floor the old incinerator building located on the southeasterly corner of Remount Road and Toomey Avenue, and then turn it over to Park & Recreation Commission, and that the present occupant, Keeter Trailer and Body Company, be given a minimum of six months to find other quarters. The motion was seconded by Councilman Jordan.

Councilman Short stated he is going to vote against this because the Planning Commission's study shows that there is no urgent, or hardly any use, that is needful for this area. We have been looking at it for 50 years and he thinks we can look at the eyesore until the throughway is built. It is now occupied by a thriving local industry and he does not see moving them out unnecessarily.

Councilman Tuttle stated he concurs in part with Mr. Short. This is not just to give the property for park use; they have dire need for the basement of this building for the storage of their equipment.

Councilman Alexander stated his experience has shown him that the proximity of parks close to homes has a big bearing on the use of playground centers, and although Revolution Park is in the same vicinity, it is a much further distance away. If doing this today makes it possible for the Park and Recreation Commission to give expanded service there, he is aware of the fact that it can be used and will be valuable for park space.

The vote was taken on the motion and carried by the following vote:

YEAS: Councilmen Smith, Jordan, Alexander, Stegall and Tuttle.
NAYS: Councilman Short.

ORDINANCE NO. 673 AMENDING CHAPTER 5, ARTICLES I, II, AND IV OF THE CODE OF THE CITY OF CHARLOTTE WITH RESPECT TO TERRITORIAL JURISDICTION OF THE BUILDING INSPECTION DEPARTMENT.

Councilman Short moved the adoption of the subject ordinance, which was seconded by Councilman Stegall and carried unanimously.

The ordinance is recorded in full in Ordinance Book 15, at Page 78.

**CITY OF CHARLOTTE
INTER-OFFICE COMMUNICATION**

DATE: December 18, 1975

TO: Files

FROM: Sy Piligian

SUBJECT: Southside Park Playground

A meeting was held in the offices of Park and Recreation with the following persons present:

F. Marion Diehl	Park and Recreation
Walter Cuthbertson,	a resident of the area
Annie Lee Byrd	Charlotte Area Fund
Ruth Williams	Charlotte Area Fund
Phillip Barnes	Charlotte Area Fund
George Wallace	Community Development
Paul Reavis	Community Development
Sy Piligian	Community Development

A map was presented showing the features proposed by the neighborhood omitting the amphitheater as directed by Mr. Russ Marane of Hensley-Schmidt prior to making his official assessment.

After considerable discussion and in light of the money budgeted for the first year amounting to approximately \$47,000 the following priorities list was drawn up and accepted by those present.

1. Playground for children including a tot lot to be located at the northwest corner of the property near Toomey Avenue. The tot lot would be enclosed by a fence and would include a wading pool.
2. The parking lot would be located across Toomey Avenue on City property along Remount Road. The area would be graveled.
3. Provide a baseball field of official size complete with necessary grading and fill material and seeded.
4. Provide a backstop for the baseball diamond.
5. Provide a shelter and restroom structure. The shelter dimensions would be approximately 16' x 32'.

It was agreed that the above items would be implemented as budgeted monies would allow. Additional improvements

PARKS AND RECREATION

DATE: February 18, 1985

FROM: T. P. McDermott, Superintendent
Park Operations

TO: Marvin F. Billups, Jr.
Director
Parks and Recreation Department

SUBJECT: Hazardous Waste Removal

Attached is a memo outlining that it will cost us approximately \$1,800 to dispose of one drum of material we found at Southside Park storage area.

Since the material in the drum was unknown, we thought it prudent to contact EPA. We were unaware of the high cost involved with removal. The major cost involves the certification of exactly what the materials are.

We are continuing with the removal of this drum.

/cm

Joan

*pl get w/ Tom & get a more complete accounting of this matter
1. When did the Hazardous material come from? How is it that we are just now finding it?*

2. What is the material found? How Hazardous is it? Is there any chance that our employees will be affected by this material if deposit is? What hazards if any to people using the park?

Once all info is gathered; get w/ B & E and find the \$1800 for removal. do not feel you will have a problem w/ them if all questions are asked and answered and show w/ B & E. Mrs

TO: Marvin F. Billups, Jr., Director
 Parks and Recreation Dept.

FROM: *Joan Kennedy Ross*
 Joan Kennedy Ross
 Parks and Recreation - Admin.

SUBJECT: Hazardous Waste Removal -
 Southside Park

Per your request I spoke with Tom McDermott and, at great length, with Robert Bagley re the barrel of chemicals found at Southside Park. They offered the following explanation to your questions:

1. No one knows where the chemicals came from. Conversations with long-time employees indicate the barrels have been there for a long time. They suspect they were left over from the days the Operations Department is supposed to have operated an incinerator there. We are just now finding the materials because we have just recently begun a clean-up effort at the storage facility.
2. According to Mecklenburg EPA, the materials are lead and chromium. The materials are hazardous to the touch and hazardous if consumed. That makes it essential to have professionals handling its disposal rather than our employees. It is also essential that it is disposed ^{of} quickly so that leakage from the corroding barrels does not contaminate the groundwater. The building is being kept secure until the material is disposed of so that park users will not have access to it.

Budget and Evaluation has been notified; we are charging the expense (\$1,800) to Park Operations 199 account.

Re: Southside Park Demolition

Dear Carl:

Enclosed is a copy of the bid tabulation for Southside Park Demolition. 10 bids were received 16 February 1989, with the low bidder being United Construction Company.

As consultants for the City Parks and Recreation Department, we recommend award to United Construction for the base bid sum of \$4,095.00.

We recommend spending a total of \$4,095.00 on this project.

Sincerely,

THE FWA GROUP

SUBJECT: Southside Park water line repair

I understand that after two new water fountains were installed in Southside Park, that you discovered a water line to these fountains was broken and will require repair. This is to authorize you to spend the \$300.00 required to repair the water line. This is in addition to the \$3,200.00 recently authorized for park repairs.

I understand that there is a possibility that the line may have been damaged during the demolition of the picnic shelter, and that if it can be determined that this contractor was responsible for the damage that you will collect the damages from him.

February 21, 1991

To: David Snider
Engineering
Tom

From: Thomas P. McDermott
Park Development Officer

Subject: Southside Park

I have spoken with John Lojko concerning the placement of dirt at Southside Park ballfield. Park Operations will handle this, however; they may require the use of a tracked vehicle which would have to be rented. In addition, the cost of the erosion control measures would need to be absorbed by the Freedom Park account.

It would be worthwhile to get some staking of the ballfield area so that elevations are known.

Please let me know if there are any problems with this.

MEMORANDUM

February 22, 1991

To: Doug Boyd
Bethlehem Center

From: *Marvin F. Billups, Jr.*
Marvin F. Billups, Jr., Director
Parks and Recreation Department

Subject: Construction in Southside Park

We are continuing to upgrade Southside Park. The last phase of this project is the reconstruction of a baseball field near the Toomey Avenue end of the park. In order to properly build this field, a great deal of soil will be needed. It is our intention to bring some of the soil being removed from Freedom Park and deposit it at Southside Park. This will greatly help us get the field to the level it needs to be.

Please pass this information on to your neighborhood association members so that they can properly answer any questions that may come up. This work will begin sometime after mid March, 1991.

Executive Summary

The City of Charlotte – Engineering and Property Management Department (E&PM), elected to conduct a Limited Phase I Environmental Site Assessment (ESA) of the northwestern portion of the current Southside Park (formerly the “Shuman Avenue” Incinerator) located at Remount and Toomey Avenues in Charlotte, North Carolina (site or subject property). A Site Location Map is presented as Figure 1.

The site is a City-owned property, Mecklenburg County parcel number 14501416; that is adjacent to a Mecklenburg County-owned property, Mecklenburg County parcel number 14501415. Collectively, these two parcels comprise Southside Park (a Mecklenburg County Parks and Recreation Facility) with address 645 Remount Road. The City parcel consists of approximately 6.9 acres. The County parcel consists of approximately 10.8 acres.

Southside Park is generally surrounded by a combination of residential, commercial and industrial uses. The site (northwestern portion of Southside Park and the City-owned parcel) currently includes a tennis court, playground, picnic shelter, grassy areas and a paved parking lot. The adjacent County parcel includes a grassy soccer/baseball field, public grills, and a perimeter walkway. The County parcel is bound to the south by a creek within a wooded embankment. Both parcels are in good condition and have no sensory indications of recognized environmental conditions.

The adjacent parcel to the northwest of the site is a City-owned animal shelter; to the northeast is a multi-family residential community, to the southeast is a community based social services facility; and to the southwest are residential and faith-based properties.

A review of the historical sources indicates that the City parcel was the previous site of the City-owned “Shuman Avenue” Incinerator and ash landfill. The name “Shuman Avenue” comes from the fact that current Remount Road was formerly known as Shuman Avenue. Both the City parcel and the County parcel were the previous sites of underground ash disposal from the Incinerator. The Incinerator and ash landfill were believed to be operational from the late 1920’s thru the mid 1950’s. The approximate limits of ash burial are reportedly in the northwest portion of the block; bounded by the on-site creek and creek/storm drainage line on the County parcel.

The Incinerator facility was constructed on a multi-level site. The upper level (first floor) of the Incinerator (including 3 Chimneys) was removed from the site in the late 1960’s when the County constructed Phase I of Southside Park. The lower level (basement) of the incinerator building was removed in the mid-1990’s.

A review of the United States Geological Survey (USGS) 7.5-minute topographic quadrangle map for Charlotte East, North Carolina, 1988 shows that the subject property is approximately 676 feet above mean sea level (msl). The western portion of the subject property slopes downward toward the west and the eastern portion of the subject property slopes downward to the south towards a tributary of Sugar Creek.

E&PM reviewed information gathered from several environmental databases through Environmental Data Resources, Inc. (EDR) to evaluate whether activities on or near the subject property have the potential to create a Recognized Environmental Condition on the subject property. The subject property address was not identified on the databases searched.

Three properties within $\frac{1}{4}$ mile of the site were listed on databases. Based on a field review of the proximity to the site and/or topographic relations, it is unlikely that these facilities represent an REC at the subject property.

Multiple facilities were identified at distances greater than 1/4-mile from the subject property. Based on distance from the subject property and regulatory status, it is unlikely that these facilities have created a REC at the subject property.

However, this assessment did reveal the following Recognized Environmental Condition in connection with the subject property:

- The subject property was a former municipal waste incinerator and ash landfill. The facility was operated by the City of Charlotte from the late 1920's thru the mid-1950's. Original 1928/29 design drawings indicate that the building plan was approximately 115-ft by 95-ft, with three (3) 125-ft high Radial Brick Chimneys. The facility was constructed on a multi-level site. Vehicles loaded with solid waste drove at-grade into the building's "Charging Floor" where waste was dumped into 'chutes' in the floor to a lower level. This lower level held three (3) Combustion Chambers for incineration. Waste ash was hauled out from the chambers, and reportedly buried on-site (north of the creek) as well as on the adjacent County property to the east.

Based on these findings, E&PM recommends that prior to the sale or development of the property, a Phase II ESA of the subject property be conducted to address the potential for soil and groundwater impacts associated with on-site ash disposal and former operation of the incinerator.

This Executive Summary is not intended to be a "stand-alone" document, but rather a summary of our findings as described in the following report. It is intended to be used in conjunction with the scope of services and limitations described therein.

SECTION ONE – Introduction

1.1 PURPOSE

The City of Charlotte – Engineering and Property Management Department (E&PM), elected to conduct a Limited Phase I Environmental Site Assessment (ESA) of the northwestern portion of the current Southside Park (formerly the “Shuman Avenue” Incinerator) located at Remount and Toomey Avenues in Charlotte, North Carolina (site or subject property). The objective of this environmental review is to attempt to identify recognized environmental conditions associated with the subject property prior to the potential sale or development of the property. This review, while limited in scope, utilizes major portions of the methodology of the “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process”, (ASTM Standard E 1527-05).

1.2 DETAILED SCOPE-OF-SERVICES

E&PM completed the following tasks:

1. Contracted with Environmental Data Resources, Inc. (EDR) to conduct a regulatory database search of known underground storage tank (UST) facilities; landfills; hazardous waste generation, treatment, storage and disposal facilities; and subsurface contamination in the surrounding area up to a mile from the center of the subject property (or subject property boundaries). The EDR report is presented in Appendix B.
2. Researched subject property history by (a) reviewing a chronology of aerial photographs and topographic maps covering the subject property and adjoining properties available from EDR; (b) reviewing historical city directories for the subject property and nearby properties available from EDR; and reviewing archived City and County files relevant to the subject property. Copies of some of these documents are presented in Appendix C.
3. Conducted site reconnaissance for obvious evidence of potential contamination such as current hazardous materials storage or use; unusually stained soils, slabs, and pavements; drains, sumps, drums, tanks, and electrical transformers; stressed vegetation; and discarded hazardous materials containers. Photographs were not taken.
4. Interviewed various current and former City and County employees familiar with the former Shuman Avenue Incinerator site and/or the development of Southside Park.
5. Evaluated the information collected and prepared this report summarizing our findings, opinions, and conclusions.

1.3 LIMITATIONS AND EXCEPTIONS

This report and the associated work have been provided as a preliminary review of the site’s environmental condition. This report is not intended to be a complete ASTM E1527-05 ESA; nor is the report intended to fulfill the requirements of the Innocent Landowner provisions of the US EPA. No warranties are expressed or implied.

This ESA is not a regulatory compliance audit or an evaluation of the efficiency or the use of any hazardous materials at the subject property.

SECTION TWO - Site Description

2.1 LOCATION AND LEGAL DESCRIPTION

Southside Park is bounded by Toomey Ave on the west, Remount Road on the north, and residential and light commercial facilities to the south and east. The subject property occupies the northwestern portion of the current Southside Park (formerly known as the “Shuman Avenue” Incinerator) This parcel is owned by the City of Charlotte, Mecklenburg County parcel number 14501416, and consists of approximately 6.9 acres. The adjacent parcel consists of the remaining northeastern portion of Southside Park. This parcel is owned by Mecklenburg County, Mecklenburg County parcel number 14501415, and consists of approximately 10.8 acres. Southside Park in its entirety is presented on Figure 1, provided in Appendix A. A complete legal description of the subject property was not obtained.

2.2 PHYSICAL SETTING

A review of the United States Geological Survey (USGS) 7.5-minute topographic quadrangle map for Charlotte West, North Carolina, 1996 shows that the subject property is approximately 676 feet above mean sea level (msl). The western portion of the subject property slopes downward toward the west and the eastern portion of the subject property slopes downward to the north. A tributary of Sugar Creek bisects the site. The National Wetlands Inventory maps (shown in the EDR report, Appendix B) show no recorded wetland areas at the subject property. The closest mapped wetland is located approximately 3/4-mile to the west of the subject property. Federal Emergency Management Agency (FEMA) flood zone data included in the EDR report indicates the northwestern portion of the subject property is located approximately 3/8-mile to closest mapped 100- and 500- year flood plains. None of the subject property is within a mapped 100 or 500-year flood zone.

2.3 SITE AND VICINITY GENERAL CHARACTERISTICS

The subject property occupies the northwestern portions of the Southside Park property located at 645 Remount Road, Mecklenburg County parcel numbers 14501415 (10.8 acres) and 14501416 (6.96 acres) as described above. The subject property is zoned R-22MF, Multi-family—22.0 units per acre. The subject property is located in an area of Charlotte, North Carolina where the surrounding zoning designations are R-22MF (Multi-family—22.0 units per acre), O-1 (Office district—max. floor area ratio: 0.60), I-1 (Industrial (light industrial)), B-1 (Business (neighborhood business)), and O-2 (Office district—max. floor area ratio: 1.0). The general site layout and characteristics, along with adjacent property uses can also be seen in Figure 1 presented in Appendix A.

2.4 CURRENT SITE USE

The subject property is currently being used as a park and recreation site. The subject property was found to be well maintained, free of any significant evidence of litter or improperly disposed trash.

2.5 DESCRIPTIONS OF STRUCTURES, ROADS, AND OTHER IMPROVEMENTS

The subject property is the northwestern portion of the property located at 645 Remount Road in Charlotte, North Carolina. The subject property was observed to include park benches, playground equipment, tennis courts, a basketball court, a shelter, picnic grills and parking. The subject property is mostly covered by grass, with an asphalt parking lot, basketball and tennis courts; and several concrete walking paths. At least two drop inlet drains also exist within the park boundaries to provide storm water drainage for the site.

2.6 CURRENT ADJOINING PROPERTY USES

During the site reconnaissance, E&PM Staff conducted a walking and drive-by review of adjoining land uses along accessible roads. Table 2-1 lists the adjacent businesses and property uses. Figure 1 also shows the adjacent properties.

TABLE 2-1 - SUMMARY OF ADJACENT PROPERTY USAGE

Direction	Property
North	Corporate-Industrial / Multi-Family Residential
East	Office-Community Center / Multi-and Single-Family Residential
South	Single-Family Residential / Office-Community Center
West	Office-Animal Shelter

SECTION THREE - User-Provided Information

3.1 TITLE RECORDS

E&PM Staff did not obtain a Chain of Title (COT) report for the subject property. However, a review of the Property Ownership and Land Records Information System (POLARIS) revealed the following:

- Parcel 14501416 (subject property) is currently owned by the City of Charlotte and no previous owners are noted.
- Parcel 14501415 (adjacent property and other section of the Park) is currently owned by Mecklenburg County; was previously owned by the City of Charlotte; and no other previous owners are noted.

3.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

The subject property is owned by the City of Charlotte. No Environmental Lien Search Report was obtained.

3.3 SPECIALIZED KNOWLEDGE

E&PM Staff obtained some limited historical documentation regarding the subject property from the Mecklenburg County Parks and Recreation Department and the City of Charlotte Real Estate Division, which is referenced throughout this report. The specialized knowledge contained within this documentation includes construction plans, property maps, and references to prior uses, tenants, soils testing, property transfers, etc.

3.4 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

E&PM Staff are not aware of any adjustments in the purchase amount for environmental issues.

3.5 OWNER, SITE MANAGER AND OCCUPANT INFORMATION

The subject property is currently owned by the City of Charlotte and is operated by Mecklenburg County as a portion of Southside Park, an open-access, public park with park benches, playground equipment, tennis courts, a basketball court, a shelter, picnic grills, concrete walking paths and asphalt parking.

3.6 REASON FOR CONDUCTING PHASE I ESA

The Phase I ESA is being conducted in order to summarize currently known information about this City property prior to any future development or sale.

SECTION FOUR - Record Review

4.1 ENVIRONMENTAL DATABASES REVIEW

E&PM Staff reviewed information gathered from several environmental databases through EDR to evaluate whether activities on or near the subject property have the potential to create a Recognized Environmental Condition (REC) on the subject property. EDR reviews databases compiled by federal, state, and local governmental agencies. The complete list of databases reviewed is provided in the EDR report, which is included in Appendix B. It should be noted that this information is reported as E&PM received it, as it is provided in various government databases. It is not possible for E&PM to verify the accuracy or completeness of information contained in these databases. However, the use of and reliance on this information is a generally accepted practice in the conduct of environmental due diligence. The ASTM databases searched and the information obtained where properties were identified within the search radius are summarized below in Table 4-1. Additional supplemental databases searched are summarized in the EDR report.

Table 4-1 – SUMMARY OF ENVIRONMENTAL DATABASES

Type of Database	Description of Database/Effective Date	Search Radius	Number of Identified Sites
Federal ASTM Standard			
NPL	The National Priorities List (NPL) identifies uncontrolled or abandoned hazardous waste sites. To appear on the NPL, sites must have met or surpassed a predetermined hazard ranking system score, been chosen as a state's top priority site, pose a significant health or environmental threat, or be a site where the EPA has determined that remedial action is more cost-effective than removal action.	1.00 mile	None
Proposed NPL	The Proposed National Priorities List (NPL) identifies uncontrolled or abandoned hazardous waste sites with potential for coverage under the NPL program.	1.00 mile	None
Delisted NPL	The Delisted National Priorities List (NPL) identifies hazardous waste sites removed from the NPL program.	1.00 mile	None
CERCLIS	The Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) database iden-	0.50 mile	One (1)

	tifies hazardous waste sites that require investigation and possible remedial action to mitigate potential negative impacts on human health or the environment.		
CERC-NFRAP	The No Further Remedial Action Planned Report under CERCLA (CERCNFRAP), also known as the CERCLIS Archive, contains information pertaining to sites that have been removed from the U.S. EPA's CERCLIS database. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration.	0.50 mile	Two (2)
RCRA CORRACTS	Identifies hazardous waste handlers with RCRA corrective action activity.	1.00 mile	One (1)
RCRIS TSDs	Resource Conservation & Recovery Information System (RCRIS) treatment, storage, or disposal (TSD) sites	0.50 mile	None
RCRIS Generators	RCRA-regulated hazardous waste generator notifiers list; both Large- and Small-Quantity Generators are included in this list. A RCRA small-quantity generator (SQG) is defined as a facility that generates less than 1,000 kilograms (kg) per month of hazardous waste or less than 1 kilogram per month of acutely hazardous waste. A RCRA large-quantity generator (LQG) is defined as a facility that generates greater than 1,000 kg per month of non-acutely hazardous wastes or greater than 1 kg per month of acutely hazardous wastes.	0.25 mile	One (1) CESQG
ERNS	EPA's Emergency Response Notification System (ERNS) list contains reported spill records of oil and hazardous substances.	Target Property	None
US BROWNFIELDS	A listing of Brownfields sites.	0.50 mile	One (1)
FUDS	Formerly Used Defense Sites where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.	1.00 mile	None
FINDS	Facility Index System contains both facility information and 'pointers' to other sources	Target Property	None

	that contain more detail.		
State ASTM Standard			
NC SHWS	North Carolina's Inactive Hazardous Sites Inventory is the state equivalent of CERCLIS.	1.00 mile	Twenty-five (25)
NC IMD	Incident Management Database lists groundwater and/or soil contamination incidents.	0.50 mile	Fourteen (14)
NC HSDS	Hazardous Substance Disposal Site	1.00 mile	Eight (8)
NC SWF/LF	Solid Waste Facilities/ Landfill Sites	0.50 mile	None
NC OLI	Old Landfill Inventory	0.50 mile	None
NC HIST LF	North Carolina Historical Landfill Inventory	0.50 mile	None
NC LUST	Leaking Petroleum Storage Tank Database	0.50 mile	Ten (10)
NC LUST TRUST	State Trust Fund Database	0.50 mile	Two (2)
NC UST	State Underground Storage Tank Sites	0.25 mile	None
NC AST	State Above Ground Storage Tanks.	0.25 mile	None
NC INST CONTROL	No Further Action Sites With Land Use Restriction Monitoring	0.50 mile	None
NC VCP	North Carolina Voluntary Cleanup Program	0.50 mile	None
NC DRYCLEANERS	Drycleaner Facility Listing	0.25 mile	None
NC BROWNFIELDS	Brownfield Site Assessments that are being cleared under EPA monies.	0.50 mile	One (1)
NC NPDES	NPDES Facility Location Listing	Target Property	None
INDIAN RESERV	Indian Reservations	1.00 mile	None
Manufactured Gas Plants	EDR Proprietary Records	1.00 mile	None
Historical Auto Stations	EDR Proprietary Records	0.5 mile	None

Historical Cleaners	EDR Proprietary Records	0.5 mile	None
---------------------	-------------------------	----------	------

4.1.1 Subject Property

The subject property address was not listed in any of the databases searched.

4.1.2 Adjacent Properties

None of the immediately adjacent property addresses were listed in any of the databases searched.

4.1.3 Site Vicinity

Two (2) cross/up-gradient facilities were identified in the regulatory database report at a distance less than ¼ -mile from the subject property.

4.1.4 Other Information

E&PM Staff also reviewed the Orphan Sites list (a list of sites that have not been geocoded based on a lack of sufficient data regarding their exact location) presented in the EDR report. The review of the Orphan Sites list did not identify any properties that have the apparent possibility to have created a Recognized Environmental Condition at the subject property. A copy of the complete EDR database is included in this report as Appendix B.

4.2 REGULATORY AGENCY CONTACT

During the performance of an environmental assessment, state and local regulatory agencies having jurisdiction over the subject property may be contacted to evaluate the following information: the status of relevant environmental permits; whether there has been any violations, or other similar correspondence from such agencies; whether any corrective action or remediation is planned, currently taking place, or has been completed at the subject property; whether there have been any reported violations or complaints that the subject property is not in compliance with environmental laws, regulations, or standards, and whether the subject property is under investigation for such non-compliance; whether the subject property is listed on any of the regulatory databases; and whether there is any other pertinent documentation on file with such regulatory agencies regarding the subject property or surrounding sites of concern.

Whereas the subject property was not listed in any of the databases searched, E&PM did not contact any regulatory agencies.

4.3 PREVIOUS INVESTIGATIONS

E&PM did not obtain or review any previous investigative reports regarding the subject property or adjoining properties.

4.4 HISTORICAL USE INFORMATION ON THE SUBJECT PROPERTY AND

ADJOINING PROPERTY

As noted above, E&PM Staff obtained archived historical files from the Mecklenburg County Parks and Recreation Department regarding Southside Park. From these files, much of the foregoing historical information was compiled.

For many years, the subject property and the adjacent parcel on the southside of Remount Road was used as a landfill site for the disposal of municipal solid waste. An incinerator for the burning of waste material was also operated at the on the subject property, at the southeast corner of Remount Road and the current Toomey Avenue(the incinerator building reportedly was located at a location approximately across from the current Brookhill Rd., where a small park structure is now.

Original 1928/29 design drawings indicate that the Incinerator building plan was approximately 115-ft by 95-ft, with three (3) 125-ft high Radial Brick Chimneys. The facility was constructed on a multi-level site. Vehicles loaded with solid waste drove at-grade into the building's "Charging Floor" where waste was dumped into 'chutes' in the floor to a lower level. This lower level held three (3) Combustion Chambers for incineration. Waste ash was hauled out from the chambers, and reportedly buried on-site (north of the creek) as well as on the adjacent County property to the east.

The operation of the incinerator was curtailed in June 1946 and terminated in January 1950. Use of the adjacent property for landfill continued until January 1956, after which time portions of the adjacent property and the subject property were converted to other uses, including playgrounds and an animal shelter. (Sometime prior to the construction of I-77, Toomey Avenue was relocated eastward, thereby separating the animal shelter parcel from the park parcel and causing the animal shelter parcel to abut I-77.)

On November 2, 1959 City Council authorized the leasing of the incinerator building to Keeter Trailer and Body Co. at a rental of \$100 per month. The building was used by this firm for the building and fitting of truck and trailer bodies until 1968 (approx.); following City Council's approval on August 7, 1967 to demolish the old incinerator building to the first floor, to turn the property over to Park & Recreation Commission (who would use the first floor as an outdoor all-purpose area and use the basement as a storage area for their equipment), and to give the then current occupant, Keeter Trailer and Body Company, a minimum of six months to find other quarters.

The Southside Park was eventually developed/renovated/improved by the City and turned over to the Parks and Recreation Department in June 1978. Southside Park also underwent several subsequent improvements during the 1980's and 1990's. During these latter renovations, the incinerator chambers (basement of old incinerator building) were ultimately demolished. The Park improvements included a baseball field, construction for which required the addition of many tons of fill dirt. However, over the years, the baseball field continued to sink; and in spite of the addition of more fill dirt, the ballfields were eventually removed. Currently, the park

consists of mostly grassy areas, with an open-aired shelter, concrete walkpaths, grills, playground equipment, a tennis court and a basketball court.

In February 1985 (during the Park renovations of the 1980's and 1990's), 55-gallon drums of material were found in the then existing incinerator basement. After reviews with long-term Parks and Recreation employees and testing by the Mecklenburg EPA, the following explanations were surmised:

- No one was sure where the chemicals came from, but they had been observed to have been there for a long time. It was suspected that they were left over from the days the Operations Department operated the incinerator. The drums were only identified by staff at the time because they had initiated a clean-up effort at the storage facility [perhaps in preparation for the demolition?].
- The material was determined to be lead and chromium, which are hazardous to the touch and if consumed. As such, the disposal was to be handled by professionals instead of employee; and the disposal was to occur quickly so that leakage from the corroding barrels did not contaminate the groundwater. The building was kept secure until the hazardous material was disposed to prevent park user access to the hazards.

In January 1989, (also during the Park renovations of the 1980's and 1990's), seven (7) soil boring samples were requested by City Engineering.

No hazardous waste disposal manifests or soil testing results were located in the archived Southside Park files.

E&PM Staff contacted EDR to obtain historic aerial photographs and Sanborn Fire Insurance Maps. Aerial photographs were available for the years 1950, 1968, 1973, 1988, 1996, and 2006. No Sanborn Maps were available. Upon review, the incinerator building/stacks are observable on the 1950, 1968, 1973 and 1988 aerial maps. City Real Estate Division also located a 1954 Powell Bill Map that identified the Dog Pound and the Shuman Ave Incinerator near Toomey Ave.

E&PM Staff attempted to locate references to the incinerator (subject property) in the historical City Directories at the public library, but was unsuccessful. Subsequent to this document search, E&PM Staff learned that Remount Road was previously named Shuman Avenue. This was believed to be the source of the failed Directory search for the subject property and another search was not completed. A Directory Search for adjacent properties was not conducted.

TABLE 4-2 - CHRONOLOGICAL SUMMARY OF HISTORICAL LAND USE

Historical Land Use Source	Date	Observations
Aerial Photograph	1950	Incinerator and Stacks, Old and New Toomey

Powell Bill Map	1954	Dog Pound, Incinerator, Toomey west of Dog Pound
Aerial Photograph	1968	Incinerator and Stacks, Dog Pound, Old and New Toomey, I-77 clearing started, Brookhill and other residential development completed
Aerial Photograph	1973	Incinerator and Stacks, New Toomey, I-77 completed
Aerial Photograph	1988	Park developed, Incinerator Building still present
Aerial Photograph	1996	Park expanded, Incinerator Building gone
Aerial Photograph	2006	Park developed in its current form

ASTM E1527-05 standards for Phase I ESAs require that historical land use be identified to the property's first developed use (including agriculture) or back to 1940, whichever is earlier, using reasonably ascertainable sources. Other than the 1928/29 original Incinerator design drawings, the earliest available standard historical source reviewed by E&PM was an aerial photograph from 1950, which showed the incinerator with stacks and the dog pound in the vicinity of few other developments. Therefore, the first developed use of the property appears to have been identified. Based on the consistent, developed use of the land thru 2006 and the lack of any listings for the subject or adjacent properties in the regulatory databases, E&PM believes the absence of historical information prior to construction of the incinerator is not significant.

SECTION FIVE - Site Reconnaissance

5.1 METHODOLOGY AND LIMITING CONDITIONS

Ms. Theresa Watley and Mr. David Wolfe of the City of Charlotte – Engineering and Property Management Department (E&PM) conducted a reconnaissance of the site on Thursday, August 7, 2008 to evaluate current site use and identify potential sources of hazardous substances on and off site (on adjacent properties).

Figure 1 provides a Site Plan / General Vicinity Map showing features observed on the subject property. No photographs were taken during the site reconnaissance. E&PM Staff conducted the site reconnaissance by visually observing the subject property. The periphery of the subject property was observed by walking and driving, and was viewed from adjacent roads.

5.2 GENERAL SITE SETTING

Southside Park is bounded by Toomey Ave on the west, Remount Road on the north, the Charlotte The subject property occupies the northwestern portion of the current Southside Park (formerly the “Shuman Avenue” Incinerator) located at Remount and Toomey Avenues in Charlotte, North Carolina. This parcel is owned by the City of Charlotte, Mecklenburg County parcel number 14501416, and consists of approximately 6.9 acres. The adjacent parcel consists of the remaining northeastern portion of Southside Park. This parcel is owned by Mecklenburg County, Mecklenburg County parcel number 14501415, and consists of approximately 10.8 acres. Southside Park in its entirety is presented on Figure 1, provided in Appendix A. The site is located in a mixed use area of Charlotte, North Carolina.

5.3 INTERIOR AND EXTERIOR OBSERVATIONS

5.3.1 Hazardous Substances and Petroleum Products

E&PM did not observe any hazardous substances and/or petroleum products at the subject property during the site inspection.

Hazardous substances and/or petroleum products were observed at a nearby auto mechanic facility northeast of the subject property.

5.3.2 Aboveground Storage Tanks

No above ground storage tanks (ASTs) were observed at the subject property during the site inspection.

5.3.3 Underground Storage Tanks

No underground storage tanks (USTs) were observed at the subject property during the site inspection.

5.3.4 Odors

No unusual or strong odors were noted at the subject property during the site inspection.

5.3.5 Pools of Liquid

No pools of liquid were observed at the subject property at the time of the site visit.

5.3.6 Drums and Containers

No drums and/or containers were observed at the subject property at the time of the site reconnaissance.

5.3.7 Unidentified Substance Containers

No other unidentified substance containers were observed at the subject property at the time of the site reconnaissance.

5.3.8 Polychlorinated Biphenyl-Containing Equipment

No PCB containing equipment was observed at the subject property at the time of the site reconnaissance.

5.3.9 Emergency Generators

No emergency generators were observed on the subject property at the time of the site reconnaissance.

5.3.10 Drains, Sumps, Pits, Ponds, and Lagoons

No sumps, pits, or lagoons were observed or reported on the subject property at the time of the site reconnaissance.

5.3.11 Stained Soil or Pavement

No stained soil or pavement was observed on the subject property at the time of the site reconnaissance.

5.3.12 Stressed Vegetation

No stressed vegetation was observed on the subject property at the time of the site reconnaissance.

5.3.13 Solid Waste

No solid waste is currently generated at the subject property; and only minor amounts of litter were observed throughout the subject property.

5.3.14 Wastewater and Stormwater

The subject property does not currently contain any public restrooms, although the archived files indicated that a restroom building was previously constructed and demolished. Therefore, connections to the City of Charlotte sanitary sewer system are assumed to still exist. The subject property does contain water fountains which currently generate wastewater. Stormwater on the subject property appeared to be handled by ground infiltration, sheet flow

to curbside drains and the on-site tributary of Sugar Creek, and several storm drainage drop inlets [with running water perhaps from a recent rain] observed across the subject and/or adjacent properties comprising Southside Park.

5.3.15 Wells

No wells were observed on the subject property. No groundwater monitoring wells were observed during the site reconnaissance.

5.3.16 Septic Systems

No septic systems were observed on the subject property.

5.3.17 Asbestos-Containing Materials

The subject property does not have any structures that could potentially contain asbestos-containing materials to be present.

5.3.18 Lead-Based Paint

The subject property has playground equipment which is owned and operated by Mecklenburg County. No testing for lead-based paint was performed during this investigation.

5.3.19 Radon

E&PM reviewed the Federal EPA Radon Zones provided in the EDR report to determine if the subject property is located in an area of low radon concentrations. Based on this review of the Radon Zone data, the subject property is considered to be in Zone 2 for radon concentrations. The average indoor radon concentrations for Zone 2 are predicted to be equal or greater than 2 pico Curies per liter (pCi/L) and equal or less than 4 pCi/L. E&PM also reviewed the State of North Carolina's Radon Database information provided in the EDR report, regarding the site tested in the vicinity of the subject property in Mecklenburg County, North Carolina. The average radon activity level for a first floor living area was not reported. The average radon activity level for the basement was reported to be 2.10 pCi/L. Based on these radon results, the absence of any structures, and the current use of the subject property as a park, there is a low probability for radon to represent an environmental concern to the subject property.

5.3.20 Wetlands

The National Wetlands Inventory maps (shown in the EDR report, Appendix B) show no recorded wetland areas at the subject property.

5.3.21 Drinking Water Supply

Drinking water is available at the subject property from water fountains, reportedly supplied to the subject property from the City of Charlotte. No drinking water supply wells were observed in the general vicinity of the subject property.

SECTION SIX - Interviews

E&PM Staff interviewed several former and current City and County Staff that were previously involved with or had recollections of Southside Park and/or the City Incinerator. The information obtained during these interviews is reported in the applicable sections of this report to the extent it was consistent with the information obtained in the archived files. Interviewees included Mr. Ken Gillis – retired from City Engineering; Mr. David Snider – current City Surveyor; Mr. Keith Carpenter – current City Engineering Project Manager; Mr. Carl Jarrett – current City Engineering Program Manager; Mr. Dennis Tyndall – current Mecklenburg County LUESA Hydrogeologist; Mr. Joe Hack – current Mecklenburg County LUESA Solid Waste Management Project Manager; Ms. Nancy Brunnemer – current County Real Estate Services Agent and former Mecklenburg County Parks & Recreation staffer; Ms. Dot Law – current Mecklenburg County Parks & Recreation Financial Services Director; Mr. John DeKemper – former Mecklenburg County Park Planner; and Mr. Blaine Gregory – current Mecklenburg County Parks & Recreation Sr. Planner.

SECTION SEVEN - Findings, Opinions and Conclusions

7.1 FINDINGS

E&PM identified the following conditions at the subject property:

- A review of the historical sources indicates that the City parcel was the previous site of the City-owned “Shuman Avenue” Incinerator and ash landfill. Both the City parcel and the adjacent County parcel were the previous sites of underground ash disposal from the Incinerator. The Incinerator and ash landfill are believed to have been operational from the late 1920’s thru the mid 1950’s. The approximate limits of ash burial are reportedly in the northwest portion of the block; bounded by the on-site creek and creek/storm drainage line on the County parcel.
- The subject property address was not identified on any regulatory databases. Multiple off-site facilities within the applicable search radii were identified; however no off-site properties are anticipated to result in a recognized environmental condition to the subject property. Historical records revealed that 55-gallon drums of hazardous waste were discovered stored in the incinerator basement long after incinerator operations ceased.
- Limited quantities of litter were observed throughout the subject and adjacent properties.

7.2 OPINIONS

It is the opinion of the E&PM that:

- The previous operations of the incinerator and landfill at the subject and adjacent properties represent a Recognized Environmental Condition.
- No off-site facilities within applicable search radii were identified which are expected to result in a Recognized Environmental Condition to the subject property.
- The drums of hazardous materials found in the storage basement is not significant since no contamination or improper disposal notifications have been identified.
- The negligible litter is not significant since the minimal quantity is actually indicative of a well-maintained public facility.

7.3 CONCLUSIONS

E&PM has performed a Limited Phase I ESA of the northwestern portions of the property located at 645 Remount Road in Charlotte, North Carolina also known as Southside Park. This assessment revealed the following Recognized Environmental Condition in connection with the subject property:

- The subject property was a former municipal waste incinerator and ash landfill. The facility was operated by the City of Charlotte from the late 1920’s thru the mid-1950’s. Original 1928/29 design drawings indicate that the building plan was approximately 115-ft by 95-ft, with three (3) 125-ft high Radial Brick Chimneys. The facility was constructed on a multi-level site. Vehicles loaded with solid waste drove at-grade into the building’s “Charging Floor” where waste was dumped into ‘chutes’ in the floor to a lower level. This lower level held three (3)

Combustion Chambers for incineration. Waste ash was hauled out from the chambers, and reportedly buried on-site (north of the creek) as well as on the adjacent County property to the east.

Based on these findings, E&PM recommends that prior to the sale or development of the property, a Phase II ESA of the subject property be conducted to address the potential for soil and groundwater impacts associated with on-site ash disposal and former operation of the incinerator.

Section EIGHT – Additional Services

No additional services were performed.

SECTION NINE – References

References of significance are mentioned throughout the report.

SECTION TEN - Signatures of Environmental Professionals

This section includes qualification statements of the environmental professionals responsible for conducting the ESA and preparing this report.

The site reconnaissance, file reviews, and report writing were performed by Ms. Theresa J.L. Watley of the City of Charlotte, Engineering and Property Management Department. Ms. Watley has over 18 years of experience in Engineering, implementing compliance audits and serving as a Project Manager. Ms. Watley earned a BS in Chemical Engineering from Howard University.

The report was prepared under the supervision of Mr. David Wolfe, PE, of the City of Charlotte, Engineering and Property Management Department. Mr. Wolfe has over 17 years of experience in due diligence assessments, groundwater remediation, and project management.

Mr. Wolfe declares that, to the best of his professional knowledge and belief, he meets the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. Mr. Wolfe has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property.

Theresa J.L. Watley
Sr. Project Manager

David Wolfe, PE
Environmental Program Manager

EXECUTIVE SUMMARY

A search of the environmental records was conducted by Environmental Data Resources, Inc. (EDR). CITY OF CHARLOTTE used the EDR FieldCheck System to review and/or revise the results of this search, based on independent data verification by CITY OF CHARLOTTE. The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

An online review and analysis by CITY OF CHARLOTTE of the CERCLIS list, as provided by EDR, and dated 04/08/2008 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
<i>DYNTECH</i>	<i>2213 TOOMEY STREET</i>	<i>1/4 - 1/2 NE</i>	<i>F20</i>	<i>43</i>

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

An online review and analysis by CITY OF CHARLOTTE of the CERC-NFRAP list, as provided by EDR, and dated 12/03/2007 has revealed that there are 2 CERC-NFRAP sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

An online review and analysis by CITY OF CHARLOTTE of the CORRACTS list, as provided by EDR, and dated 03/26/2008 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
PARKS-CRAMER CO	2000 S. BLVD	1/2 - 1 E	40	77

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

An online review and analysis by CITY OF CHARLOTTE of the RCRA-CESQG list, as provided by EDR, and dated 03/06/2008 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

STATE AND LOCAL RECORDS

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environment & Natural Resources' Inactive Hazardous Sites Program.

An online review and analysis by CITY OF CHARLOTTE of the SHWS list, as provided by EDR, and dated 04/14/2008 has revealed that there are 25 SHWS sites within approximately 1 mile of the target property.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Used oil transfer facility: No
Used oil transporter: No
Off-site waste receiver: Commercial status unknown

Historical Generators:

Date form received by agency: 10/28/1988
Facility name: SOUTHERN TRUCK SERVICE
Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Other Pertinent Environmental Activity Identified at Site

Not reported

NC-FITS (North Carolina - Facility Identification Template For States) is North Carolina Department of Environment and Natural Resources' (NCDENR) Facility Identification Template for States that provides a common facility identifier in order to improve accessibility to comprehensive information about environmental regulated entities in the state of North Carolina.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites,

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Other Pertinent Environmental Activity Identified at Site

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

 Other Pertinent Environmental Activity Identified at Site

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

NC-FITS (North Carolina - Facility Identification Template For States) is North Carolina Department of Environment and Natural Resources' (NCDENR) Facility Identification Template for States that provides a common facility identifier in order to improve accessibility to comprehensive information about environmental regulated entities in the state of North Carolina.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when

complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

NC-FITS (North Carolina - Facility Identification Template For States) is North Carolina Department of Environment and Natural Resources' (NCDENR) Facility Identification Template for States that provides a common facility identifier in order to improve accessibility to comprehensive information about environmental regulated entities in the state of North Carolina.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: D039
Waste name: TETRACHLOROETHYLENE

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF

Comments: One 1,000-gallon gasoline UST removed in 1986. ESA (2001) sampling indicates minor soil contamination and 2L exceedances. LSA submitted using ESA data. No additional soil collection. MW-2 qualifies for LSA well. Soil analytical during ESA not complete for UST closure. WSW survey letters not completed. WSW survey and soil boring completed. NRP for groundwater to close.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/30/2008	Source: EPA
Date Data Arrived at EDR: 05/06/2008	Telephone: N/A
Date Made Active in Reports: 06/09/2008	Last EDR Contact: 04/28/2008
Number of Days to Update: 34	Next Scheduled EDR Contact: 07/28/2008
	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 05/19/2008
Number of Days to Update: 56	Next Scheduled EDR Contact: 08/18/2008
	Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/08/2008	Source: EPA
Date Data Arrived at EDR: 04/25/2008	Telephone: 703-412-9810
Date Made Active in Reports: 05/21/2008	Last EDR Contact: 06/17/2008
Number of Days to Update: 26	Next Scheduled EDR Contact: 09/15/2008
	Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/03/2007	Source: EPA
Date Data Arrived at EDR: 12/06/2007	Telephone: 703-412-9810

Number of Days to Update: 76	Next Scheduled EDR Contact: 09/15/2008
	Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Number of Days to Update: 22	Next Scheduled EDR Contact: 08/25/2008
	Data Release Frequency: Varies

CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Data Release Frequency: Quarterly

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 04/01/2008

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2005

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: PennWell Corporation
Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Child Care Facility List

Source: Department of Health & Human Services

Telephone: 919-662-4499

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Source: Department of Environment & Natural Resources

Telephone: 919-733-2090

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Most Recent Revision:	1996
East Map:	35080-B7 CHARLOTTE EAST, NC
Most Recent Revision:	1988

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u>	<u>FEMA Flood</u>
MECKLENBURG, NC	<u>Electronic Data</u>
	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 3701590013B

Additional Panels in search area: 3701590012C
3701590018C
3701590019B

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic</u>
CHARLOTTE WEST	<u>Data Coverage</u>
	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u> <u>FROM TP</u>	<u>GENERAL DIRECTION</u> <u>GROUNDWATER FLOW</u>
1	1/4 - 1/2 Mile ESE	NE
A2	1/4 - 1/2 Mile SSE	Not Reported
A3	1/4 - 1/2 Mile SSE	Not Reported
4	1/4 - 1/2 Mile ENE	NW
5	1/2 - 1 Mile East	Not Reported
6	1/2 - 1 Mile ESE	SSE
7	1/2 - 1 Mile SSW	W
B8	1/2 - 1 Mile ENE	Not Reported
B9	1/2 - 1 Mile ENE	E
10	1/2 - 1 Mile South	SSE

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Cecil

Soil Surface Texture: sandy clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 6 Min: 4.5
2	5 inches	48 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 6 Min: 4.5
3	48 inches	61 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 6 Min: 4.5

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Pacolet

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 6

Soil Component Name: Monacan

Soil Surface Texture: loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 38 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	14 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 7.3 Min: 5.1
2	14 inches	25 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 7.3 Min: 5.1
3	64 inches	79 inches	stratified sand to clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 7.3 Min: 5.1
4	25 inches	64 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 7.3 Min: 5.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

OFFICE OF
CITY MANAGER

CITY OF CHARLOTTE
NORTH CAROLINA

October 11, 1966

Mr. Marion Diehl, Superintendent
Park and Recreation Commission
310 North Kings Drive
Charlotte, North Carolina

Dear Marion:

Attached is a deed conveying 1.46 acre of land from the Park and Recreation Commission to the City. This is a residue sliver of land left by the bisection of the North-South Expressway with Park property. You will recall some months ago I discussed with you the possibility of combining this land with a tract owned by the City for a new dog pound site; The present pound land and facilities to be turned over to the Commission for recreational purposes.

It would be appreciated if you would review this request with members of the Commission at your earliest convenience. We are hopeful bids can be taken on the new pound within thirty days.

Yours very truly,

L. P. Bobo
Administrative Assistant

LPB:pg

REMOUNT INCINERATOR PROPERTY

FUTURE USE

Following the City Council Meeting on June 26, 1967, the Office of the City Manager requested the Planning Commission to study the site of the old incinerator on Remount Road and make recommendations pertaining to its future use. Since that time a detailed field survey of the community has been conducted, an inspection of the incinerator facility made and a meeting attended at which leaders of organization interested in the future of this area discussed this situation. In addition the zoning of the area has been studied to see if it can be improved.

The observations and recommendations which follow are the result of these investigations.

BACKGROUND

For many years the area on the southside of Remount Road was used as a landfill site for the disposal of garbage. An incinerator for the burning of waste material was also operated at the southeast corner of Remount Road and Tomney Avenue. The operation of the incinerator was curtailed in June, 1946 and terminated in January, 1950. Use of adjoining property for landfill continued until January, 1956 after which portions of the property were converted to other uses including playgrounds and an animal shelter.

On November 2, 1959 City Council authorized the leasing of the incinerator building to Keeter Traylor and Body Co. at a rental of \$100.00 per month. The building has been used by that firm since then for the building and fitting of truck and trailer bodies.

Recently several leaders of organizations interested in the development of this neighborhood became concerned about the unsightly appearance of the incinerator area as well as a need for more park and recreation facilities for the neighborhood. They contacted the Park and Recreation Commission with a proposal for the City to give the incinerator property to the Commission for conversion into a Community Center. After an investigation by the Building Inspection Department it was determined that the cost involved in such a conversion would be too much to be practical.

The Park and Recreation Commission then proposed to tear the building down to the first floor, use this floor as an outdoor all-purpose area and use the basement as a storage area for their equipment. In a recent meeting with community leaders it was determined that they felt it to be desirable for the property to be used by the Park and Recreation Commission even if a Community Center is not possible at this time.

EXISTING COMMUNITY DEVELOPMENT

In studying the development of the Southside neighborhood it is evident that the basic characteristics of this area are set and that only minor changes can

Page 2

be expected in the foreseeable future. A look at the existing land use, shown on the accompanying map, shows this community to be surrounded by industries, roads and parks so that there is little room for expansion of the residential facilities. Industry is located to the east, north and south, Revolution Park and the General Younts Expressway to the west and Marie Davis School on the south, effectively enclosing the neighborhood.

The residential community consists of approximately 1,135 dwelling units containing an estimated 4,500 people. Most of these units are contained in two housing developments - 400 in Southside Homes Public Housing and 417 in Spangler's Brookhill Village. The remaining units are contained in single-family and duplex units confined to several small pockets south of Remount Road.

The General Younts Expressway will be constructed between the Southside area and Revolution Park. It will go under Remount Road with a partial diamond interchange connection to Remount. This roadway, while creating a permanent boundary to the neighborhood on the west, will not prevent access to the Revolution Park facilities. Access will still be available via Remount Road.

Extensive park and recreation facilities are available to the area. There is a playground of approximately 11 acres which is developed with baseball field, basketball court, wading pool, playground equipment, paved all purpose area, etc. Another area of about 2 acres, which was used as the animal shelter site, is being given for park use. Within easy walking distance from the homes in the neighborhood there is Revolution Park with all the facilities of a major park, a municipal swimming pool, and a Community Center at the pool. In addition facilities are available for community use at Bethlehem Center and at Southside Homes Recreation Hall.

The incinerator site is bounded on two sides by park property, residential use in front across Remount Road and by vacant property owned by the City of Charlotte on the remaining side. The old furnace stacks are visible for a great distance because of their height. The roof of the building is in need of major repair and much work would be required to improve its exterior appearance. Other than the incinerator the only non-residential uses in the immediate vicinity are the new animal shelter and the studios of WGIV radio station. Present zoning for this area is illustrated on the accompanying map. The incinerator site is zoned for industrial purposes as well as the adjoining property along Toomey Avenue. With the exception of a small tract of land at the southeast corner of Remount Road and General Younts Expressway all the land south of Remount Road zoned industrial is controlled by the City of Charlotte. Industrial Zoning must be maintained within 300 feet of the new animal shelter in order to meet ordinance requirements for this type of use.

CONCLUSIONS AND RECOMMENDATIONS

Based on the facts as stated above and a study of how the Southside area can best be developed, the following conclusions and recommendations are submitted for consideration:

August 7, 1967
Minute Book 49 - Page 72

INCINERATOR BUILDING ON CORNER OF REMOUNT ROAD AND TOOMEY AVENUE AUTHORIZED DEMOLISHED TO THE GROUND AND TURNED OVER TO THE PARK AND RECREATION COMMISSION.

Councilman Smith moved that the City bear the expense of demolishing to the first floor the old incinerator building located on the southeasterly corner of Remount Road and Toomey Avenue, and then turn it over to Park & Recreation Commission, and that the present occupant, Keeter Trailer and Body Company, be given a minimum of six months to find other quarters. The motion was seconded by Councilman Jordan.

Councilman Short stated he is going to vote against this because the Planning Commission's study shows that there is no urgent, or hardly any use, that is needful for this area. We have been looking at it for 50 years and he thinks we can look at the eyesore until the throughway is built. It is now occupied by a thriving local industry and he does not see moving them out unnecessarily.

Councilman Tuttle stated he concurs in part with Mr. Short. This is not just to give the property for park use; they have dire need for the basement of this building for the storage of their equipment.

Councilman Alexander stated his experience has shown him that the proximity of parks close to homes has a big bearing on the use of playground centers, and although Revolution Park is in the same vicinity, it is a much further distance away. If doing this today makes it possible for the Park and Recreation Commission to give expanded service there, he is aware of the fact that it can be used and will be valuable for park space.

The vote was taken on the motion and carried by the following vote:

YEAS: Councilmen Smith, Jordan, Alexander, Stegall and Tuttle.
NAYS: Councilman Short.

ORDINANCE NO. 673 AMENDING CHAPTER 5, ARTICLES I, II, AND IV OF THE CODE OF THE CITY OF CHARLOTTE WITH RESPECT TO TERRITORIAL JURISDICTION OF THE BUILDING INSPECTION DEPARTMENT.

Councilman Short moved the adoption of the subject ordinance, which was seconded by Councilman Stegall and carried unanimously.

The ordinance is recorded in full in Ordinance Book 15, at Page 78.

**CITY OF CHARLOTTE
INTER-OFFICE COMMUNICATION**

DATE: December 18, 1975

TO: Files

FROM: Sy Piligian

SUBJECT: Southside Park Playground

A meeting was held in the offices of Park and Recreation with the following persons present:

F. Marion Diehl	Park and Recreation
Walter Cuthbertson,	a resident of the area
Annie Lee Byrd	Charlotte Area Fund
Ruth Williams	Charlotte Area Fund
Phillip Barnes	Charlotte Area Fund
George Wallace	Community Development
Paul Reavis	Community Development
Sy Piligian	Community Development

A map was presented showing the features proposed by the neighborhood omitting the amphitheater as directed by Mr. Russ Marane of Hensley-Schmidt prior to making his official assessment.

After considerable discussion and in light of the money budgeted for the first year amounting to approximately \$47,000 the following priorities list was drawn up and accepted by those present.

1. Playground for children including a tot lot to be located at the northwest corner of the property near Toomey Avenue. The tot lot would be enclosed by a fence and would include a wading pool.
2. The parking lot would be located across Toomey Avenue on City property along Remount Road. The area would be graveled.
3. Provide a baseball field of official size complete with necessary grading and fill material and seeded.
4. Provide a backstop for the baseball diamond.
5. Provide a shelter and restroom structure. The shelter dimensions would be approximately 16' x 32'.

It was agreed that the above items would be implemented as budgeted monies would allow. Additional improvements

FEB 18 1985
PARKS AND RECREATION

DATE: February 18, 1985

FROM: T. P. McDermott, Superintendent
Park Operations

TO: Marvin F. Billups, Jr.
Director
Parks and Recreation Department

SUBJECT: Hazardous Waste Removal

Attached is a memo outlining that it will cost us approximately \$1,800 to dispose of one drum of material we found at Southside Park storage area.

Since the material in the drum was unknown, we thought it prudent to contact EPA. We were unaware of the high cost involved with removal. The major cost involves the certification of exactly what the materials are.

We are continuing with the removal of this drum.

/cm

Joan

pl get w/ Tom & get a more complete accounting of this matter

1. When did the Hazardous material come from? How is it that we are just now finding it?

2. What is the material found? How Hazardous is it? Is there any chance that our employees will be affected by this material if deposit is? What hazards if any to people using the park?

Once all info is gathered; get w/ B & E and find the \$1800 for removal. do not feel you will have a problem w/ them if all questions are asked and answered and show w/ B & E. nrs

CITY OF CHARLOTTE
INTER-OFFICE COMMUNICATION

DATE: March 5, 1975

TO: Marvin F. Billups, Jr., Director
 Parks and Recreation Dept.

FROM: *Joan Kennedy Ross*
 Joan Kennedy Ross
 Parks and Recreation - Admin.

SUBJECT: Hazardous Waste Removal -
 Southside Park

Per your request I spoke with Tom McDermott and, at great length, with Robert Bagley re the barrel of chemicals found at Southside Park. They offered the following explanation to your questions:

1. No one knows where the chemicals came from. Conversations with long-time employees indicate the barrels have been there for a long time. They suspect they were left over from the days the Operations Department is supposed to have operated an incinerator there. We are just now finding the materials because we have just recently begun a clean-up effort at the storage facility.
2. According to Mecklenburg EPA, the materials are lead and chromium. The materials are hazardous to the touch and hazardous if consumed. That makes it essential to have professionals handling its disposal rather than our employees. It is also essential that it is disposed *of* quickly so that leakage from the corroding barrels *does* not contaminate the groundwater. The building is being kept secure until the material is disposed of so that park users will not have access to it.

Budget and Evaluation has been notified; we are charging the expense (\$1,800) to Park Operations 199 account.

Re: Southside Park Demolition

Dear Carl:

Enclosed is a copy of the bid tabulation for Southside Park Demolition. 10 bids were received 16 February 1989, with the low bidder being United Construction Company.

As consultants for the City Parks and Recreation Department, we recommend award to United Construction for the base bid sum of \$4,095.00.

We recommend spending a total of \$4,095.00 on this project.

Sincerely,

THE FWA GROUP

Douglas P. Miller

Marvin F. Billups, Jr.
Parks & Recreation Director

SUBJECT: Southside Park water line repair

I understand that after two new water fountains were installed in Southside Park, that you discovered a water line to these fountains was broken and will require repair. This is to authorize you to spend the \$300.00 required to repair the water line. This is in addition to the \$3,200.00 recently authorized for park repairs.

I understand that there is a possibility that the line may have been damaged during the demolition of the picnic shelter, and that if it can be determined that this contractor was responsible for the damage that you will collect the damages from him.

MEMORANDUM

February 21, 1991

To: David Snider
Engineering
Tom

From: Thomas P. McDermott
Park Development Officer

Subject: Southside Park

I have spoken with John Lojko concerning the placement of dirt at Southside Park ballfield. Park Operations will handle this, however; they may require the use of a tracked vehicle which would have to be rented. In addition, the cost of the erosion control measures would need to be absorbed by the Freedom Park account.

It would be worthwhile to get some staking of the ballfield area so that elevations are known.

Please let me know if there are any problems with this.

copy to: John Lojko

TMc/pb

MEMORANDUM

February 22, 1991

To: Doug Boyd
Bethlehem Center

From: *Marvin F. Billups, Jr.*
Marvin F. Billups, Jr., Director
Parks and Recreation Department

Subject: Construction in Southside Park

We are continuing to upgrade Southside Park. The last phase of this project is the reconstruction of a baseball field near the Toomey Avenue end of the park. In order to properly build this field, a great deal of soil will be needed. It is our intention to bring some of the soil being removed from Freedom Park and deposit it at Southside Park. This will greatly help us get the field to the level it needs to be.

Please pass this information on to your neighborhood association members so that they can properly answer any questions that may come up. This work will begin sometime after mid March, 1991.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1921 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1320 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

 Contact: Connor Hicks

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 01/29/2024 has revealed that there are 2 SEMS sites within approximately 0.5 miles of the target property.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes

EXECUTIVE SUMMARY

available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/29/2024 has revealed that there are 5 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small

EXECUTIVE SUMMARY

quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

NC HSDS: The Hazardous Substance Disposal Sites list contains locations of uncontrolled and unregulated hazardous waste sites. The file contains sites on the national priority list as well as the state priority list. The data source is the North Carolina Center for Geographic Information and Analysis.

A review of the NC HSDS list, as provided by EDR, and dated 08/09/2011 has revealed that there are 8 NC HSDS sites within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

NC SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environment & Natural Resources' Inactive Hazardous Sites Program.

A review of the NC SHWS list, as provided by EDR, and dated 12/01/2023 has revealed that there are 45 NC SHWS sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

NC SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environment & Natural Resources' List of Solid Waste Facility Contacts in Alpha Order.

A review of the NC SWF/LF list, as provided by EDR, and dated 12/15/2022 has revealed that there is 1

Lists of state and tribal brownfield sites

NC BROWNFIELDS: A brownfield site is an abandoned, idled, or underused property where the threat of environmental contamination has hindered its redevelopment. All of the sites in the inventory are working toward a brownfield agreement for cleanup and liability control.

A review of the NC BROWNFIELDS list, as provided by EDR, and dated 03/06/2024 has revealed that there

EXECUTIVE SUMMARY

are 33 NC BROWNFIELDS sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that there are 6 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 5 UST FINDER sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 38 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 6 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Hazardous Waste Summary:

Waste Code: D001
 Waste Description: Ignitable Waste

Waste Code: F001
 Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
