1. Introduction and Capitalization Grants Summary

This Intended Use Plan (IUP) provides details on the Division of Water Infrastructure's (Division) intent to administer the Clean Water State Revolving Funds (CWSRF) and to apply for the FY2026 base CWSRF capitalization grant and the FY2026 Infrastructure Investment and Jobs Act¹ (IIJA) CWSRF General Supplemental capitalization grant.

All capitalization grant amounts identified in this IUP exclude the allotments for 604(b) grants.

North Carolina's FY2026 base CWSRF capitalization grant allotment has not yet been announced or estimated by the US Environmental Protection Agency (EPA). For the purposes of this draft IUP to go through a public comment period on time to ensure that the Division can submit a grant application to EPA by their established application deadline in Spring 2026, the Division is assuming that the FY2026 base CWSRF allotment will be the same as it was in FY2024, i.e., \$14,733,000. When the FY2026 base CWSRF allotments are announced, the Division *will amend the IUP, apply for the full allotment, and use the percentages identified in this IUP to split the funds between Principal Forgiveness, reserves, and the various set-asides.*

North Carolina's FY2026 IIJA CWSRF General Supplemental capitalization grant allotment is preliminarily estimated by EPA to be \$44,460,000. When a final allotment has been announced by EPA, the Division *will amend the IUP, apply for the full allotment, and use the percentages identified in this IUP to split the funds between Principal Forgiveness, reserves, and the various set-asides.*

The table below summarizes the capitalization grants and the allotment of the funds between various uses described in this Intended Use Plan. *The percentages presented in the summary table will be used to apply to the final allotments or capitalization grant amounts, once known, to update the currently estimated dollar amounts in the summary table.*

The Division intends to apply for any additional funds made available through reallocations of other states' capitalization grant allotments and apply the reallocation funds towards awarded projects using the percentages shown in the summary table below.

¹ Infrastructure Investment and Jobs Act (IIJA) was formerly referred to as Bipartisan Infrastructure Law (BIL).

Table Summary of Capitalization Grants

	FY2026 Base CWSRF	FY2026 IIJA CWSRF General Supplemental	Any potential reallocments (none)
Capitalization Grant Amount	TBD. Estimated to be \$14,733,000	TBD. Estimated to be \$44,460,000	N/A or TBD
State Match (20%)	Est. \$2,946,600	Est. \$8,892,000	N/A or TBD
<i>Total Cap. Grant and State Match</i>	<i>Est. \$17,679,600</i>	<i>Est. \$53,352,000</i>	<i>N/A or TBD</i>
Set-Asides from Capitalization Grant Amount			
A. Program Administration	Up to 4%: Est. up to \$589,320	Up to 4%: Est. up to \$1,778,400	0% \$0
B. Technical Assistance	Up to 2%: Est. up to \$294,660	Up to 2%: Est. up to \$889,200	0% \$0
<i>Set-Asides Total²</i>	<i>Est. up to \$883,980</i>	<i>Est. up to \$2,667,600</i>	<i>\$0</i>
Available for project loans from grant and state match, including Principal Forgiveness	At least 94% of cap grant and 100% state match Est. \$16,795,620	At least 94% of cap grant and 100% state match Est. \$50,684,400	100% of cap grant and state match
Principal Forgiveness from Capitalization Grant Amount			
Minimum – Maximum range of the CWA Disadvantaged Community Subsidization (base SRF)	10% – 30%: Est. \$1,473,300 – \$4,419,900	N/A: \$0	TBD
Congressional Additional Subsidy (base SRF)	TBD. Assumed to be 10%: Est. \$1,473,300	N/A: \$0	TBD
IIJA General Supplemental Subsidization	N/A: \$0	49%: Est. \$21,785,400	TBD
<i>Total min. – max. range of Principal Forgiveness</i>	<i>Est. \$2,946,600 – \$5,893,200</i>	<i>Est. \$21,785,400</i>	<i>TBD</i>
Mandatory Capitalization Grant Reserve			
Minimum Green Project Reserve (10%)	10%: Est. \$1,473,300	10%: Est. \$4,446,000	10%

² Unused amounts that are budgeted for set-asides will be used for project loan disbursements prior to closing the capitalization grant.

The Division of Water Infrastructure is part of the North Carolina Department of Environmental Quality (NCDEQ). The Division administers financial assistance programs to assist local government units (LGUs) and non-profit water/wastewater utilities³ in constructing projects that both benefit water quality and improve the human environment.

In 2013 the North Carolina General Assembly created the State Water Infrastructure Authority (Authority) to determine the eligibility of projects for certain water infrastructure funding programs, including the Clean Water State Revolving Fund (CWSRF), consistent with federal law. The priorities reflected in this document have been approved by the Authority.

Specific to this document, the Division administers the federal-state CWSRF program as established by Title VI of the Federal Water Pollution Control Act (a.k.a. Clean Water Act) as amended in 1987. The CWSRF program offers loans to LGUs at interest rates lower than market rates for clean water infrastructure. As a LGU repays the loan, the monies are again loaned out, hence the revolving nature of the program. All loan repayments must go back into the CWSRF. This Intended Use Plan serves to explain how the capitalization grant will be used and how the CWSRF will operate.

The IUP is incorporated into the capitalization grant agreement and becomes the grant work plan. Combined, the operating agreement, grant agreement, IUP, Clean Water Act, Code of Federal Regulations, and state statutes set the program requirements for the CWSRF. The IUP identifies anticipated projects scheduled for funding commitments from the CWSRF. It also explains how the CWSRF will utilize a priority rating system to identify those projects that will address the greatest need and/or provide the greatest positive environmental impact on the water resources in North Carolina.

2. Financial History

Congress appropriates an overall CWSRF funding level that is allocated to states based on percentages in the Clean Water Act. This allocation has not been updated since the 1987 amendments that established the CWSRF. The North Carolina allocation is approximately 1.8% of the national appropriation. Capitalization grants, including the required State match, enable increasing amounts of loan commitments. This is due to loan repayments being loaned again, thereby providing public benefits repeatedly through time. While providing substantial support, this infrastructure financing has only met a small percentage of the clean water infrastructure needs for LGUs in North Carolina. Congressional Directed Spending has recently significantly reduced the funding available to the base CWSRF program. However, if capitalization grants return to previous levels (as was done in the FY2025 SRF appropriations), or are increased, the program will be better able to meet infrastructure financing needs for LGUs.

Congress appropriated additional funds to the CWSRF in the Infrastructure Investment and Jobs Act of 2021. The IJIA appropriated additional funds for five fiscal years (FY2022-FY2026), referred to as the CWSRF General Supplemental Funding (or IJIA Supplemental CWSRF for short), to supplement the base CWSRF program and its yearly appropriations. The IJIA also appropriated funds specifically to address emerging contaminants issues; plans for which are described in a separate IUP.

North Carolina will receive allotments in a federal capitalization grant for the FY2025 base CWSRF

³ For brevity, "LGUs" in this IUP refers to eligible entities, including local government units and non-profit utilities.

and in a federal capitalization grant for the FY2025 IJJA CWSRF General Supplemental, in the amounts shown in the Table Summary of Capitalization Grants. North Carolina will provide a 20% state match from state appropriations, in the amounts shown in the Table Summary of Capitalization Grants, for the base CWSRF and the IJJA CWSRF General Supplemental capitalization grants. North Carolina will also provide a 20% state match from state appropriations or from fees **or interest earnings from state funds** in the amount necessary to apply for reallocation of funds, if available.

CWSRF funds will not be used to satisfy debt security requirements.

3. Programmatic Goals

Pursuant to the Clean Water Act, the State must identify the goals and objectives of its water pollution control revolving fund (i.e., the CWSRF). North Carolina has set its short- and long-term goals of this IUP to align with EPA's Pillar 1: Clean Air, Land, and Water for Every American. The State has the following goals for its CWSRF program:

3.1. Overall CWSRF Program Goal

Provide funding for clean water infrastructure while advancing the NCDEQ's mission to provide science-based environmental stewardship for the health and prosperity of ALL North Carolinians and to advance the water quality goals of CWA while targeting the systems with greatest needs.

3.2. Short-Term Goal

Continue efforts to inform LGUs of the availability of funds, benefits of the CWSRF program, and opportunities to utilize multiple funding programs to fund specialized projects.

3.3. Long -Term Goals

Goal #1: Support North Carolina Department of Environmental Quality's Strategic Goal to "strengthen North Carolina's infrastructure through thoughtful and strategic investments in communities".

Goal #2: Support North Carolina Department of Environmental Quality's **Strategy to "invest state and federal water infrastructure funding in intentional and efficient ways"**.

Goal #3: Support North Carolina Department of Environmental Quality's **Objective to "support communities' efforts to build resilience to natural hazards and increasingly extreme weather."**

Goal #4: Support U.S. Environmental Protection Agency's **Pillar 1 that aims to ensure that every American have access to clean water.**

Goal #5: Continue efforts to streamline the funding process to ensure the funds are used in an expeditious and timely manner in accordance with §602(b)(4) of the Clean Water Act.

- Goal #6: Ensure the technical integrity of CWSRF projects through diligent and effective planning, design, and construction management.
- Goal #7: Ensure the Priority Rating System reflects NCDEQ's and the Authority's goals.
- Goal #8: Aid compliance with state and federal water quality standards by all funded publicly-owned wastewater treatment works.
- Goal #9: Ensure the long-term viability of the CWSRF program through effective financial practices.

4. Information on Activities to be Supported

North Carolina's program will continue to be one of low-interest loans, supplemented with principal forgiveness as allowed by §603(i)(3) of the Clean Water Act. The State intends to access up to 4% of the base CWSRF and from the IIJA CWSRF General Supplemental capitalization grants (see the Table Summary of Capitalization Grants for the amounts) for the administrative costs associated with running the program. These costs include application preparations and outreach, technical assistance, application review, engineering report and environmental document review, design review, loan processing, construction inspection, disbursement and repayment processing and accounting for funded projects. The State is not intending to access any set-aside funds from any additional funds made available through reallocations of other states' capitalization grant allotments.

In addition to funding infrastructure projects, the CWSRF also allows the use of set-asides of capitalization grant funds for technical assistance. The State intends to access up to 2% of the base CWSRF and from the IIJA CWSRF General Supplemental capitalization grants (see the Table Summary of Capitalization Grants for the amounts) for technical assistance. Technical assistance may be carried out directly by the Division or the Division of Water Resources in the Department of Environment Quality and through contracts with other agencies and organizations. The Division intends to use technical assistance set-asides to:

- 1) Fund Division efforts to implement the state's Viable Utilities program, assisting rural and small publicly owned treatment works. The Viable Utilities program works directly with local government units identified as being Distressed as defined by state law to meet requirements to conduct utility asset condition and risk assessment, develop a system operational and maintenance plan, perform a rate study that supports operations, maintenance, and replacement of infrastructure, develop a long term and short-term financial plans for long term utility viability.
- 2) Fund NCDEQ efforts and a contract with another organization to develop and implement the Wastewater Energy Efficiency Program. This program is designed to provide wastewater system operators in small, rural publicly owned treatment works, ideally representing those systems in local government units identified as being Distressed, a multi-week training program on energy efficiency concepts from basic measures such as lighting and HVAC to highly complex and specialized measures involving aeration, disinfection, and other site-specific wastewater processes. The program will help identify low and potentially no-cost energy efficiency improvements that can have a significant impact on a system's

operational costs. Measures that are medium or higher in cost will be explored for feasibility as a potential application to CWSRF funding.

- 3) Technical assistance may be provided to assist disadvantaged communities and local government units designated as Distressed in preparing for potential CWSRF projects.

The Division reserves the right to use unused portions of the technical assistance set-aside at a later date.

The Division reserves the authority to transfer IJA funds between the DWSRF and CWSRF from this year's capitalization grants at a later date and apply it to a future year's capitalization grant. Any requests for transfer will be notified in writing to EPA.

The following table provides a summary of the projected funds available as a result of the Federal capitalization grant. With the capitalization grants, state matches, and projections of repayments from active loans, disbursements to active projects, and use of set-asides during the fiscal year, the CWSRF is projected to end with approximately **\$567 million** in cash at the end of the fiscal year, including amounts that are obligated (but not yet disbursed) to active projects. Since 2022, the Division has increased the CWSRF funds awarded to projects to approximately \$200 million per year. As expected, project disbursements consequently increased starting in FY2024, concurrent with project timelines. Based on cash-flow models, approximately **\$680 million** is expected to be disbursed for active projects in future years, exceeding the amount of cash available at the end of the fiscal year. Revenues from repayments of loans and new capitalization grants are expected to cover the difference.

Values in BLUE are approximate values.

IIJA funds only reflect the IIJA CWSRF General Supplemental Funds. IIJA funds for Emerging Contaminants are excluded from this table.

5. Criteria and Methods for Distributing Funds

5.1. Project List and Prioritization

The Intended Use Plan Project Priority List may be supplemented or replaced based on applications received as a part of future funding cycles (see 5.2 below) and/or based on applications for Emergency Relief Loans.

5.1.1. Emergency Relief Loans

Emergency relief loans may be used to fund projects to repair, restore and add resilience to wastewater systems that suffered system damage or failure resulting from a natural disaster with a Presidential emergency declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (the Stafford Act) authorizing Public Assistance for drinking water and wastewater facilities. Applications for emergency relief loans may be submitted at any time during the year following the Stafford Act declaration. Applications may be added to the Project Priority List at any time during the year based upon the applicant's successful demonstration of an emergency situation, certification from the Secretary of the North Carolina Department of Environmental Quality that a serious public health hazard related to the natural disaster-caused damage to the wastewater system is present or imminent in a community, and receiving a funding award from the State Water Infrastructure Authority. Funding may bypass other high-scoring applications (for non-emergency relief loans) to prioritize emergency relief loans. Loans to eligible applicants must be approved by the Local Government Commission. Targeted interest rates may be used for emergency relief loans.

The intent of Emergency Relief Loans is to supplement the State's emergency loan program with the SRF program (if needed) to provide rapid financial assistance to eligible applicants in response to a Stafford Act-declared natural disaster to address critical infrastructure needs to restore services. The applicant must comply with all applicable federal and state requirements.

5.1.2. Applications in Funding Cycles (non-Emergency Relief Loans)

Eligible applicants may submit applications for funding for wastewater projects during the Division's funding cycles. Applications that are received in one funding cycle and are not selected for funding will be reconsidered in one more cycle (the next one) for funding.

The State's ranking for projects will be based on the Priority Rating System established by the State Water Infrastructure Authority working with the Division (see Appendix C). Applications will be ranked based on the following scores, in the following order: 1) total application score (points), 2) project purpose points, 3) project benefit points, and 4) affordability points.

The Priority Rating System considers four elements of a project: (1) project purpose, (2) project benefit, (3) system management, and (4) affordability.

For project purpose, the Division places higher priority on projects that will consolidate nonviable systems, resolve issues associated with failed or failing infrastructure, rehabilitate

or replace infrastructure, or serve disadvantaged areas. Projects that reduce nonpoint source pollution (e.g., stormwater best management practices) are also prioritized. The Priority Rating System generally prioritizes replacement and rehabilitation over building new infrastructure. An application will only receive priority points for one project purpose.

In terms of project benefits, the Priority Rating System seeks to prioritize projects where replacement, repair, resiliency, regionalization, partnerships, or merger will provide an environmental benefit. For example, the Priority Rating System more highly prioritizes projects that benefit impaired waters and/or replace failing septic tanks.

In addition to correcting water quality issues, the Priority Rating System supports those LGU systems that seek to be proactive in their system management, including prioritization points for having implemented asset management plans and appropriate operating ratios.

The Priority Rating System also considers the ability of the applicant to afford projects. For example, those applicants that have a high poverty rate, high utility bills, lower population growth, lower median household incomes, and higher unemployment receive higher priority. Projects that primarily benefit subsets of the service population that are in disadvantaged areas also receive additional priority points. Local government units that are under the fiscal control of the Local Government Commission and that have required Emergency Operating Grants to balance their budgets are also prioritized.

The State Water Infrastructure Authority may adjust the rank of any application based on its analysis of a proposed project's value that is consistent with, but not evident in, the Priority Rating System, provided it is consistent with federal law.

Sections 5.2 and 5.3 describe the criteria that specifically apply to Applications in Funding Cycles (non-Emergency Relief Loans).

5.2. Application and Project Deadlines

The CWSRF program operates on a priority basis and accepts funding applications semi-annually. Projects are allocated funding in priority order (as noted above) and within special reserve requirements (e.g. Principal Forgiveness Reserve, etc. as described herein) until available funds are exhausted. Funding availability is determined based on the capitalization grants and associated state match. Results will be posted on the Division's website.

Project funding is contingent on adherence to the schedule below in accordance with §159G-41 (times listed are measured from Letter of Intent to Fund except as noted otherwise):

5.2.1. Funding application and supporting information must be received by the application deadline to be considered for any given funding cycle.

5.2.2. After the Authority provides final project rank eligibilities, the CWSRF program will issue Letters of Intent to Fund (LOIF) based on the projects' prioritization and the amount of funds being made available in the cycle.

- 5.2.3. Within four months of the issuance of the LOIF, a complete Engineering Report / Environmental Information Document must be submitted to the CWSRF program.
- 5.2.4. Within nine months, the Engineering Report / Environmental Information Document must be approved.
- 5.2.5. Within 15 months, complete plans and specifications must be submitted with copies of all required permits, encroachments, etc., or evidence that applications for remaining required permits have been submitted to the respective permitting agency.
- 5.2.6. Within 19 months, the plans/specifications and all required permits must be approved/issued.
- 5.2.7. Within 23 months, the following events/items must be completed/received:
 - 5.2.7.1. Advertise the project for bids
 - 5.2.7.2. Receive bids
 - 5.2.7.3. Submit bid information to CWSRF staff
 - 5.2.7.4. Obtain the Division's Authority to Award Construction Contracts.
- 5.2.8. Within 24 months, construction contracts must be executed.

The milestones in the timeline above are absolute for all projects in a particular cycle and will not be extended except based upon a demonstrated need for extension by the LGU. Projects may be able to meet these milestones ahead of schedule. However, if any milestone noted above is not met, work by the CWSRF staff may be suspended and all documents returned to the Applicant until the proposed project is resubmitted for consideration during a future cycle.

If an Applicant desires CWSRF funding and the Applicant's project requires an Environmental Impact Statement (EIS), Division staff will manage the environmental review process. However, a funding application for the project will not be accepted in any funding cycle until a draft EIS has been sent to the State Clearinghouse (SCH). If a fundable project is in process and the environmental review completed within the timeline results in the conclusion that an EIS is required, then the milestone deadlines for the project will be suspended until a draft EIS has been sent to the SCH. After the draft EIS is sent to the SCH, the project must adhere to the same time frames specified above.

5.3. Detailed Loan and Project Funding Criteria

5.3.1. General

- 5.3.1.1. To be eligible for CWSRF funding, a project must be on the Intended Use Plan Project List.
- 5.3.1.2. Funding can be provided for any eligible projects as provided for in the Clean Water Act and NCGS 159G, including wastewater treatment facilities, collection systems, stream restorations, stormwater SCMs, etc. that improve water quality.
- 5.3.1.3. Funding will be provided in priority order based on project scores, Authority determination, and the amount of funds made available with consideration of principal forgiveness reserve detailed below. Projects cannot be substantively changed once funding is allocated.
- 5.3.1.4. The maximum CWSRF loan amount will be established at \$35 million per applicant per funding round.
- 5.3.1.5. The maximum CWSRF loan availability per applicant is not more than \$200,000,000 in outstanding debt to the CWSRF program, **measured as the total amount of CWSRF loans (including principal forgiveness) awarded to and/or committed to active projects initiated by a Letter of Intent to Fund.**
- 5.3.1.6. Notwithstanding the limits in Items 5.3.1.4., and 5.3.1.5., if availability of funds exceeds project demand, these limits may be exceeded to ensure all available funds are utilized. Exceeding the maximum provided in Item 5.3.1.4. will be considered prior to Item 5.3.1.5.
- 5.3.1.7. A project may be funded with a targeted interest rate if the project is eligible for principal forgiveness as described in 5.3.2 below. For projects that are eligible for 75% or more principal forgiveness, the targeted interest rate will be 0%. For projects that are eligible for 50% or 25% principal forgiveness funding, the targeted interest rate will be one percentage point lower than the Division's base interest rate (but no less than zero percent).

5.3.2. Principal Forgiveness

5.3.2.1. Applicants that are eligible to receive principal forgiveness are defined as “disadvantaged communities”. The Table Summary of Capitalization Grants in Section 1 provides minimum and maximum additional subsidy to be provided for the base CWSRF and IIJA CWSRF General Supplemental capitalization grants. Included in these amounts, up to 10% of the base CWSRF capitalization grant may be to provide principal forgiveness to any CWSRF-eligible recipient as initial financing to buy, refinance or restructure debt obligations for debt incurred after December 29, 2022.

5.3.2.2. The Division will provide additional subsidization to projects in the categories provided in 5.3.2.2.1 – 5.3.2.2.3 in project priority order. The Division will provide principal forgiveness to a project based on only one of the categories provided in 5.3.2.2.1 – 5.3.2.2.3.

5.3.2.2.1. Non-viable rescue: Projects that eliminate a non-viable system to benefit a disadvantaged community with a financial need consistent with the criteria in 5.3.2.2.2 and served by a public wastewater system will receive principal forgiveness for the full amount of the loan up to \$3,000,000. The disadvantaged community either meets the affordability criteria listed in 5.3.2.2.2 or is representative of the criteria.

5.3.2.2.2. Affordability: Projects that receive project purpose points when the applicant has less than 20,000 residential wastewater connections, at least three (3) of five (5) LGU economic indicators (“LGU indicators”) worse than the state benchmark, an operating ratio (future) of less than 1.3, and either utility rates greater than the state median or project cost per connection that project to increase the utility rates above the 70th percentile of state-wide utility rates, will receive principal forgiveness following the affordability criteria grant percentage matrix found in Appendix D.

Projects that receive project purpose points when the benefiting system has been designated as distressed per NCGS §159G-45 and either has utility rates greater than the state median or project cost per connection that project to increase the utility rates above the 70th percentile of state-wide utility rates, will receive principal forgiveness percentages following the affordability criteria grant percentage matrix found in Appendix D.

Local government units under the fiscal control of the Local Government Commission on the day of the application deadline qualify for 100% principal forgiveness.

Principal forgiveness will range from 25% to 100% in increments of 25%, up to \$500,000 per applicant per round with the targeted interest rate as described under 5.3.1.7 applied to the remaining portion of the loan.

5.3.2.2.3. Disadvantaged Area: Projects for which at least 50% of the project costs are to benefit disadvantaged areas will receive principal forgiveness for 50% of the award, up to \$500,000.

“Disadvantaged areas” are subsections or pockets of a local government unit area or utility service area, not the entire local government unit area or entire utility service area. Disadvantaged areas are limited to less than half the number of total connections served by the applicant at the time of application. A project that benefits the entire local government unit area or entire utility service area is not eligible to be considered a “disadvantaged area” project.

Applicants can demonstrate a targeted project area as a disadvantaged area if it meets the size specifications above and it falls within a Potentially Underserved Block Group or Tribal boundary layer in the North Carolina Department of Environmental Quality’s Community Mapping System.

Alternatively, Applicants can demonstrate a targeted project area is a disadvantaged area based on its socioeconomic data, which may be obtained for Census Block Groups or Census Tracts that provide the closest overlap with the targeted project area. Census Block Groups are recommended. A targeted project area will be considered a “disadvantaged area” based on at least three of the following factors:

- median household income of the targeted project area is lower than the state benchmark;
- poverty rate of the targeted project area is higher than the state benchmark;
- property values per capita of the targeted project area is lower than the state benchmark;
- unemployment rate of the targeted project area is higher than the state benchmark.

Additional factors that may qualify the targeted project area as disadvantaged, such as (but not limited to) demographic, historical, cultural, linguistic, socio-economic stressors, cost-of-living stressors, or existing contamination factors, may also be considered for targeted project areas that meet the size specification above. Additional factors cannot be considered if they contradict federal or state requirements for federal funding.

Applicants must provide a narrative in the application to justify the targeted project area as disadvantaged using the factors above and may use maps or other existing sources to document their justification.

- 5.3.2.3. Notwithstanding the above limits in Items 5.3.2.2.1, 5.3.2.2.2 and 5.3.2.2.3, if availability of principal forgiveness funds exceeds project demand, the limits may be exceeded in project priority order to ensure all available funds are utilized in the following order:
 - 5.3.2.3.1. Principal Forgiveness limits of \$3,000,000 in item 5.3.2.2.1 and \$500,000 in item 5.3.2.2.2 may be exceeded by \$500,000 (not to exceed the applicant's principal forgiveness percentage eligibility determined in the grant percentage matrix in Appendix D) and principal forgiveness limit of \$500,000 in item 5.3.2.2.3 may be exceeded by \$500,000 (not to exceed 50% of the award) for eligible projects in priority order. If principal forgiveness funds remain for that funding cycle, additional increments of up to \$500,000 principal forgiveness can be awarded (not to exceed the applicable eligibility limit) for eligible projects in priority order.
 - 5.3.2.3.2. Principal Forgiveness percentages determined in 5.3.2.2.1., 5.3.2.2.2 and 5.3.2.2.3 may be exceeded by 10% (not to exceed 100%) for eligible projects in priority order. If funds remain after all eligible projects receive the first percentage increase, principal forgiveness percentages can be increased for eligible projects by additional 10-percent increments (not to exceed 100%) until all Principal Forgiveness funds are used.
- 5.3.2.4. Principal forgiveness is not available for Green Projects.

5.3.3. Green Projects

- 5.3.3.1. Not less than 10% of CWSRF capitalization grants (see Table Summary of Capitalization Grants for amount) will be provided for Green Projects, provided there are sufficient applications to utilize this reserve. Funding may bypass a higher priority project to satisfy the Green Project Reserve. Any such bypassing will be shown in the Intended Use Plan Project Priority List. If sufficient applications are not received to utilize this reserve after two cycles of funding applications, funds may be utilized for non-green projects. However, the State will continue to conduct outreach to promote green project funding opportunities. Green projects funded through the Green Project Reserve will receive targeted interest rates.
- 5.3.3.2. Notwithstanding the above paragraph, the State will offer targeted interest rates to green projects beyond the requirements of the capitalization grant consistent with the Priority Rating System.
- 5.3.3.3. A green project will be eligible for a one-percentage point reduction from the targeted interest rate (but not less than zero percent).
- 5.3.3.4. Principal forgiveness is not available for green projects.

5.3.4. Decentralized Wastewater Treatment System Pilot Program (DWTSP)

- 5.3.4.1. Not more than \$1,500,000 of available CWSRF (including not more than \$1,500,000 of available Principal Forgiveness) may be provided for applicants for the decentralized wastewater treatment system pilot program, provided there are sufficient applications to utilize the funds. Funding may bypass a higher priority project. Any such bypassing will be shown in the Intended Use Plan Project Priority List.
- 5.3.4.2. The Decentralized Wastewater Treatment System Pilot Program will be a pass-through funding program where the CWSRF applicant passes funding to qualified recipients (e.g., homeowners) with failed or malfunctioning decentralized wastewater systems including onsite wastewater, single family non-discharge systems, or single-family discharge facilities, to repair or replace those systems.
- 5.3.4.3. Eligible recipients for pass-through funding must meet specific qualification criteria established by the CWSRF applicant (i.e., the local government unit) in consultation with the Division prior to disbursement of funds. The CWSRF applicant will be responsible for developing the qualification criteria and evaluating recipients' information to verify and document their qualification. Qualification criteria established by the CWSRF applicant can distinguish between recipients that qualify for loans

and grants. An income level qualification criterion should limit pass through of principal forgiveness funds to recipients whose household income is at or below the state's median household income.

5.3.4.4. The State will offer Principal Forgiveness funds and/or 0% targeted interest rate loans to applicants.

5.3.4.5. Principal forgiveness eligibility will be:

- Up to 100% of the full amount, limited to \$250,000, for applicants that will pass through all of the funding to recipients that meet qualification criteria for principal forgiveness and that do not have household income exceeding the state's median household income, or
- Up to 50% of the full amount, limited to \$500,000, for applicants that will pass through at least 50% of the total funds to recipients that meet qualification criteria for principal forgiveness and that do not have household income exceeding the state's median household income, or
- Up to 50% of the full amount, limited to \$500,000, for applicants that will pass through at least 50% of the total funds to recipients in disadvantaged areas as defined in Section 5.3.2.2.3 excluding the size specification noted in that section.

5.3.5. Miscellaneous Criteria/Provisions:

- 5.3.5.1. Davis-Bacon prevailing wage rates apply to loans as required by funding agreements/conditions.
- 5.3.5.2. American Iron and Steel provisions will apply to loans as required by Federal mandates.
- 5.3.5.3. Build America, Buy America requirements will apply to loans providing funding assistance equivalent to the capitalization grant amount as required by US EPA and by Federal mandates.
- 5.3.5.4. Brooks Act requirements will be applied to projects in a dollar amount equal to or exceeding the capitalization grant.
- 5.3.5.5. The CWSRF loan interest rate is based on half of The Bond Buyer's 20-Bond Index except as specifically allowed herein. The maximum interest rate for each loan will be set at the time of application with a lower interest rate, if available, set at the time of the award offer.

- 5.3.5.6. Approval of a CWSRF loan is contingent on approval by the Local Government Commission (LGC). Applicants receiving 100% principal forgiveness loans must submit their audited financial statement of the latest fiscal year to the Local Government Commission by July 1 of the following calendar year prior to receiving disbursements from the CWSRF principal forgiveness loan.
- 5.3.5.7. CWSRF loan terms are set by the LGC.
- 5.3.5.8. The maximum CWSRF loan term is determined by State statute and federal requirements.
- 5.3.5.9. A 2% loan fee is required. The loan fee cannot be financed by the CWSRF fund.
- 5.3.5.10. Loan repayments are due in May (principal and interest) and November (interest only) of each year.
- 5.3.5.11. Interest begins accruing on date of completion in the Notice to Proceed.
- 5.3.5.12. The first loan repayment is due no sooner than six months after the completion date as established in the Notice to Proceed.
- 5.3.5.13. For projects with multiple construction contracts, debt will be amortized (or re-amortized) based on the latest known completion date as established in the Notices to Proceed, following 5.3.5.9 – 5.3.5.11. Earlier Promissory Notes will be replaced with a revised Promissory Note reflecting the start of repayments after the latest established completion date. All loan repayment schedules, including updated repayment schedules, will be coordinated with the LGC's staff. If a repayment is due based on the latest Promissory Note, the loan repayment must be made even if the project is not complete. All interest and principal payments made on an earlier amortization schedule will be credited upon the conclusion of the entire project and the development of a final amortization schedule. The credit will apply to the next scheduled repayment but may be spread out over the entire amortization period if requested. The Division may delay repayments in earlier amortization schedules in limited cases if completion of the project would create the revenues needed to make the repayments or for an unforeseen financial hardship (e.g., a natural disaster directly affecting the LGU's finances).

6. Programmatic Conditions

6.1. Assurances and Specific Proposals

Pursuant to §606(c)(4) of the Clean Water Act, the State of North Carolina certifies that:

- 6.1.1. The State will enter into binding commitments for 120% of the amount of each payment received under the capitalization grant within one year after receipt of each payment.
- 6.1.2. The State will expend all funds in the CWSRF in an expeditious and timely manner.
- 6.1.3. The State will conduct environmental reviews of treatment works projects according to procedures set forth in its Operating Agreement between the State and US Environmental Protection Agency.

6.2. Federal Requirements

- 6.2.1. The State will ensure that all federal requirements are met as noted in the CWSRF Operating Agreement between the State and US Environmental Protection Agency and the Grant Agreement, including Single Audit, Disadvantaged Business Enterprise compliance, federal environmental crosscutters, and Federal Funding Accountability and Transparency Act (FFATA) reporting requirements.
- 6.2.2. The State will enter all required reporting information at least quarterly into respective federal databases including FFATA and the SRF Data System.
- 6.2.3. The State will ensure that all applicants to the CWSRF program certify that they meet the fiscal sustainability planning requirements. Such certifications will be received by the time of loan offer.

6.3. Transfer between CWSRF and Drinking Water State Revolving Fund

Transfer of funds between the CWSRF and the Drinking Water State Revolving Fund are authorized by federal statutes. This IUP does not propose any such transfer of funds. However, the Division reserves the ability to make transfers in managing cash flow. If such transfer takes place, a subsequent transfer will be made by transferring that amount back from the receiving fund to the providing fund (i.e., no permanent transfers) as soon as possible. Any requests for transfer will be notified in writing to EPA.

7. Program Evaluation Report

The CWSRF program anticipates receiving and responding to the Program Evaluation Report (PER) for FY2025 funding in calendar year 2026, during and following the Annual Review. The Division participated in the EPA FY2024 Annual Review.

8. Public Review and Comment

The Intended Use Plan is drafted by the Division, including the Priority Rating System and the funding awards as approved by the State Water Infrastructure Authority, and sent to EPA's Regional Office for review. The draft IUP, including the proposed Priority Rating System (PRS), is published for public review and comment. Links for the documents and notification to the public are done through the Department's website and email notifications sent to various listservs. Once

the public review is completed, the Division prepares responses to any comments received and any updates to the IUP, if necessary. If no changes are proposed by the Division, a reason is provided as the response and all of these comments and responses become part of the final IUP.

This section will be completed after the public review period is concluded. Public comments are sought for the draft IUP, including the proposed Priority Rating System established by the State Water Infrastructure Authority (see Appendix C).

The Division will update and finalize the Intended Use Plan after reviewing public comments and receiving the final allotments from EPA. The Division will also incorporate any additional changes to the Intended Use Plan that EPA identifies as necessary.

9. Budget and Project Periods

- 9.1. The budget and project periods being requested for the capitalization grants is shown in Appendix B and on EPA Form SF 424.
- 9.2. The anticipated cash draw ratio will be 100% State and, after all State matching funds are withdrawn, 100% federal for disbursements made from the capitalization grant.
- 9.3. The source of State match funds is from appropriations and supplemented by loan fees and interest earnings on state funds as needed. State match funds will be deposited into the CWSRF before drawing any federal funds. State matches for the base CWSRF and for the IJJA CWSRF General Supplemental grants are listed in the Table Summary of Capitalization Grants.
- 9.4. Loan fees (2% of loan) on loans from the grant and fees from loans from repayment funds will be deposited into separate account centers. Fees will be used to administer the program. In addition, fees considered non-program income will also be used for other water quality purposes within the Division of Water Infrastructure and the Division of Water Resources, including funding for positions.
- 9.5. In order to reduce and minimize federal unliquidated obligations and undisbursed non-federal cash balances, the state will draw down on the capitalization grants in the order it was received, fully spending on each year's capitalization grant fund types before drawing down from the next year's capitalization grant.

Appendix A

Draft - Intended Use Plan Project Priority List for Base CWSRF and IIJA CWSRF General Supplemental

The Intended Use Plan Project Priority List may be supplemented or replaced based on applications received as a part of future funding cycles. Funds from this year's capitalization grants may also be disbursed to projects listed on previous **and future** years' Intended Use Plan Project Priority Lists that are in construction during this year's capitalization grants' performance period.

Projects listed in the Intended Use Plan as scoring above the funding line may receive funding from the Base CWSRF allotment and/or the IIJA General Supplemental CWSRF allotment and/or recycled SRF funds. The tables below illustrate an example of how the projects may be allocated between Base CWSRF and IIJA General Supplemental CWSRF, but final determinations of the funding source will be made by the Division at a future date. The Division will ensure that total funding awards for the Base CWSRF and IIJA General Supplemental CWSRF (including additional subsidies) meets or exceeds their allotment amounts for the State of North Carolina. This Project Priority List items the output/outcomes of the policies and procedures outlined in this Intended Use Plan.

All additional subsidy is provided as principal forgiveness. All principal forgiveness listed below are for LGUs that meet the state's affordability criteria or disadvantaged communities as defined in this IUP.

Spring 2026 applications and funding awards may be added to this draft Project Priority List at a later date. Spring 2026 funding applications are due April 30, 2026 and funding awards anticipated in July 2026.

Fall 2025 Application Round – Funded Projects shown in Base CWSRF and IIJA CWSRF General Supplemental columns

¹ In the FY2025 IUP, it was noted that the Green Project Reserve (GPR) projects exceeded the FY2025 base CWSRF and FY2025 IIJA CWSRF General Supplemental grants combined by \$1,600,941. Per CWSRF allowance, the difference can be carried forward to fulfill the minimum GPR requirements of the next capitalization grants, totaling \$7,309,300 in FY2026. During the Spring 2025 and Fall 2025 funding rounds, no application qualified as a Green Project. The IUP sets aside 10% of the capitalization grants for the GPR; however, if sufficient applications are not received to utilize this reserve after two cycles of funding applications, funds may be utilized for non-green projects. This is the case for the Spring 2025 and Fall 2025 funding rounds.

Appendix B

2026 CWSRF Proposed Payment Schedule

(Dependent on timing of state match and award of federal grant)

This proposed schedule may be updated in the final Intended Use Plan.

<u>Payment Quarter</u>	<u>2026 Base CWSRF Payment Amount</u>	<u>2026 IJA CWSRF General Allotment Payment Amount</u>	<u>Reallotment from other capitalization grants (TBD)</u>
April 1, 2026 – June 30, 2026			
July 1, 2026 - September 30, 2026			
October 1, 2026 - December 31, 2026	\$14,733,000		
January 1, 2027 - March 31, 2027			
April 1, 2027 - June 30, 2027		\$44,460,000	
July 1, 2027 - September 30, 2027			
October 1, 2027 - December 31, 2027			
January 1, 2028 - March 31, 2028			
April 1, 2028 - June 30, 2028			
Total	\$14,733,000	\$44,460,000	

Appendix C

PRIORITY RATING SYSTEM for Wastewater Projects

No changes to the 2025 Priority Rating System was proposed by the State Water Infrastructure Authority on February 18, 2026 prior to the public comment period. A guidance change to the definition of Line Items 2.C.1 and 2.C.2 are provided at the end of the table.

Proposed 2026 PRIORITY RATING SYSTEM for Wastewater Projects

Instructions: For each line item, mark "X" to claim the points for that line item. Be sure that your narrative includes justification for every line item claimed. At the end of each category, provide the total points claimed for each program in the subtotal row for that category. Then add the subtotals from each category and enter the Total of Points for All Categories in the last line. Note that some categories have a maximum allowed points that may be less than the total of individual line items.

Line Item #	EC Line Item [†]	Category 1 – Project Purpose (Points will be awarded for <u>only one</u> Project Purpose)	Claimed Yes/No	Points
1.A		Project will consolidate a nonviable drinking water or wastewater utility		25
1.B		Project will resolve failed or failing infrastructure issues		20
1.C		Project will rehabilitate or replace infrastructure, including replacement by a regionalization projects		12
1.C.1		Treatment units, pumps and/or pump stations to be rehabilitated or replaced are greater than 20 years old, OR lines, or tanks to be rehabilitated or replaced are greater than 40 years old		8
1.D		Project will expand infrastructure		2
1.D.1		Treatment units, pumps and/or pump stations to be rehabilitated or replaced are greater than 20 years old, OR lines, storage tanks, drinking water wells or intake structures to be rehabilitated or replaced are greater than 40 years old		8
1.E		Project will provide service to disadvantaged areas		20
1.F		Reserved for other programs		
1.G		Project will provide stream/wetland/buffer restoration		10
1.G.1		Restoration project that includes restoration of a first order stream and includes stormwater infiltration SCMs		5
1.G.2		Restoration project that includes restoration and/or protection of riparian buffers to at least 30 feet on both sides of the stream		5

Proposed 2026 PRIORITY RATING SYSTEM for Wastewater Projects

1.H		Project will provide SCMs to treat existing sources of pollution		10
1.H.1		Project that includes SCMs in series that achieve at least 35% nutrient reduction (both TN and TP) and 85% TSS reduction		10
1.I		Project will provide reclaimed water/usage or rainwater harvesting/usage		10
1.J		Project addresses PFAS emerging contaminants		
1.J.1	EC	Sole purpose of the project is to address Emerging Contaminants (construction projects) where 100% of the costs are associated with this purpose OR		12
1.J.2	EC	At least 75% of the project costs are to address Emerging Contaminants (construction projects) OR		5
1.J.3	EC	Reserved for EC-Study Program. Please use the appropriate guidance and the rolling application.		
Maximum points for Category 1 – Project Purpose				25
Subtotal claimed for Category 1 – Project Purpose				
Line Item #	EC Line Item[†]	Category 2 – Project Benefits	Claimed Yes/No	Points
2.A – 2.B		Reserved for other programs		
2.C		Project provides a specific environmental benefit		
2.C.1		Project replaces or repairs certain sewer lines, eliminates failed ¹ onsite wastewater system or non-discharge system, or resolves managerial, technical & financial issues		15
2.C.2		Project eliminates malfunctioning ¹ onsite wastewater systems		10
2.D		Project addresses promulgated but not yet effective regulations		10
2.E		Project directly addresses enforcement documents		
2.E.1		Project directly addresses an EPA Administrative Order for a local government Applicant located in a Tier 1 county, or addresses an existing or pending SOC, or a DEQ Administrative Order, OR		5

Proposed 2026 PRIORITY RATING SYSTEM for Wastewater Projects

2.E.2		Project directly resolves a Notice of Violation or Notice of Deficiency		3
2.F		Project includes system merger or regionalization		
2.F.1		Project includes system merger OR		10
2.F.2	EC	Project includes system regionalization and/or system partnerships		5
2.G – 2.H.2		Reserved for other programs		
2.H.3	EC	Project addresses any PFAS compounds exceeding 10 ppt or State-established regulatory standards or limits OR		2
2.H.4	EC	Project addresses PFAS exceeding proposed or promulgated MCL or Hazard Index		5
2.I		Project improves treated water quality by adding or upgrading a unit process		3
2.J – 2.M		Reserved for other programs		
2.N		Project moves existing infrastructure from the floodplain or fortifies infrastructure within the floodplain		
2.N.1		Project relocates and/or improves infrastructure to assure continued operation during a 500-year flood event OR		8
2.N.2		Project relocates and/or improves infrastructure to assure continued operation during a 100-year flood event		5
2.O		Project <u>directly benefits</u> subwatersheds that are impaired as noted on the most recent version of the Integrated Report		20
2.P		Project <u>directly benefits</u> specific classified waters		10
2.Q		Project will result in elimination of an NPDES discharge		3
2.R		Primary purpose of the project is to achieve at least 20% reduction in energy use		5
2.S		Reserved for other programs		

Proposed 2026 PRIORITY RATING SYSTEM for Wastewater Projects

2.T		Project provides redundancy/resiliency for critical treatment and/or transmission/distribution system functions including cybersecurity and/or backup electrical power source		3
Maximum points for Category 2 – Project Benefits				35
Subtotal claimed for Category 2 – Project Benefits				
Line Item #	EC Line Item[†]	Category 3 – System Management	Claimed Yes/No	Points
3.A		Capital Planning Activities		
3.A.1	EC	Applicant has implemented an Asset Management Plan as of the date of application OR		10
3.A.2	EC	Applicant has a current Capital Improvement Plan (CIP) that spans at least 10 years and proposed project is included in the plan		2
3.B	EC	System Operating Ratio is greater than or equal to 1.00 based on a current audit, or is less than 1.00 and unit cost is greater than 2.5% of MHI		5
3.C – 3.E		Reserved for other programs		
3.F		Applicant has completed a local flood resiliency action plan with the proposed project included in the plan		5
Maximum points for Category 3 – System Management				15
Subtotal claimed for Category 3 – System Management				
Line Item #	EC Line Item[†]	Category 4 – Affordability	Claimed Yes/No	Points
4.A		Residential Connections		
4.A.1	EC	Less than 10,000 residential connections OR		2
4.A.2	EC	Less than 5,000 residential connections OR		4
4.A.3	EC	Less than 1,000 residential connections		8
4.B		Current Monthly Combined Utility Rates at 5,000 Usage		
4.B.1	EC	Greater than the 50 th Percentile OR		4
4.B.2	EC	Greater than the 70 th Percentile OR		6
4.B.3	EC	Greater than the 85 th Percentile OR		8

Proposed 2026 PRIORITY RATING SYSTEM for Wastewater Projects				
4.B.4	EC	Greater than the 95 th Percentile		10
4.C		Local Government Unit (LGU) Indicators		
4.C.1	EC	3 out of 5 LGU indicators worse than state benchmark OR		3
4.C.2	EC	4 out of 5 LGU indicators worse than state benchmark OR		5
4.C.3	EC	5 out of 5 LGU indicators worse than state benchmark OR		7
4.C.4	EC	Project benefits disadvantaged areas		5
4.D – 4.G		Reserved for other programs		
Maximum points for Category 4 – Affordability				25
Subtotal claimed for Category 4 – Affordability[‡]				
Total of Points for All Categories				
Total Points for EC funding (if applicable)				

[†] Only line items marked with “EC” will be used in scoring eligible applications for CWSRF-EC funding. These applications will also be scored using the full PRS for all other wastewater funding sources.

[‡]Local government units under Local Government Commission’s fiscal control that have received an Emergency Operating Grant under NC GS 159G-34.5 in the current or prior fiscal year qualify for the maximum points for Category 4: Affordability.

¹ Proposing to change the application guidance requirement of documenting Notice of Violations related to septic failures, which are rare, to qualify for line items 2.C.1 and 2.C.2. The proposed change is to include alternative documentation requirements to document failed or malfunctioning systems. This includes:

- allowing the option for a signed and sealed statement that the septic/irrigation systems in the project area have failed *or have documented challenges to system functioning as originally permitted*.
- Documentation by a County Health Department or environmental health survey conducted by an approved third party that 50 percent or more of the homes being connection either have an onsite system failure, have an onsite system that received multiple repair permits or denial of repair permits, and/or have an onsite system installation predating the County’s adoption of state minimum standards.
- Documentation by a County Health Department or environmental health survey conducted by an approved third party to changing environmental conditions since issuance of onsite permits.

Appendix D

Grant Percentage Matrix

Thresholds will be updated from 2024 rates to 2026 rates (shown below) in assessing applications **starting with the Fall 2026 funding round**. Applications received prior to that date will be assessed using the 2024 rates data that are shown in the [FY2025 IUP](#), which underwent a public comment period in March 2025.

Table 4. Proposed Step 4 (Affordability Matrix)¹				
Percentile Ranges for grant eligibility categories	Combined Monthly Bills² based on 2026 data (\$/5000 gallons)	% Grant or PF	Combined Monthly Bills + Project cost per customer per month³ based on 2026 data (\$/5000 gallons)	% Grant or PF
> 99 Percentile	> \$190	100%	> \$190	100%
95 - 99 Percentile	\$161 - \$190	100%	\$161 - \$190	75%
85 - 95 Percentile	\$134 - \$161	75%	\$134 - \$161	50%
70 - 85 Percentile	\$117 - \$134	50%	\$117 - \$134	25%
50 - 70 Percentile	\$97 - \$117	25%	\$97 - \$117	0%
0 - 50 Percentile	\$0 - \$97	0%	\$0 - \$97	0%
<p>¹ Local government units under the fiscal control of the Local Government Commission on the day of the application deadline qualify for 100% grant or principal forgiveness.</p> <p>² Single utility providers may divide by 0.4 for water or 0.6 for sewer applicant for calculating a combined monthly bill.</p> <p>³ Project cost per customer per month calculated assuming 0% interest financing for 20 years.</p>				

Monthly bill data updated **March 2026** using **January 2026** statewide rates data compiled by the Environmental Finance Center at the University of North Carolina, Chapel Hill.
