16	Notes:																															
17	(#) No. of LGUs in 2025 with no audits for 2023-2024. LGUs with missing audits cannot be evaluated on up to 10 (40%) out of a potential 25 points due to missing financial data.																															
18	<sup>a</sup> Due to data limitations, certain criteria cannot be assessed for some LGUs according to Utility Type (both, DW, WW, bulk) and LGU type (municipality, county, sanitary district/authority). Blacked out cells are not assessed for all LGU Types according to Utility Type, as shown in the table. Sanitary districts/authorities are not assessed for additional points that are greyed out according Utility Type, including the affordability criteria because of the lack of directly corresponding demographic data.																															
19	<sup>b</sup> In 2021-2024, the assessment score threshold was 8 points (≥8) for single service providers (DW and WW, shown by dotted line) and 9 points (≥9) for dual service providers.																															
20	<sup>c</sup> In 2025, the assessment score threshold was changed to 9 points for single service providers (DW and WW), such that both dual and single service providers must score greater than or equal to 9 points (≥9) to be designated or receive a 1st year notice letter (shown as above dashed line).																															
21	<sup>d</sup> 2025 Recommendations: LGUs to receive 1st Year Notice Letters are highlighted in light red. These are LGUs that were not designated distressed in 2021-2024 and scored ≥9 points in 2025.
