

**North Carolina
Infrastructure Investment and Jobs Act
Drinking Water State Revolving Fund
Lead Service Line Replacement
(IIJA DWSRF-LSLR)**

**Intended Use Plan
Fiscal Year 2024**

Revised March 2026

Changes to the draft IUP after the March 2025 public comment period that are open for public comment are identified in red font text. Main changes include additional program eligibilities as established by a new Memo from USEPA in November 2025, and an updated Project Priority List (Appendix B), among other updates in red font text. Note that the rest of the Intended Use Plan (all items not in red font text) has already undergone a public comment period in March 2025 and is not subject to change.

1. Introduction and Capitalization Grants Summary

This Intended Use Plan (IUP) addresses the FY2024 Infrastructure Investment and Jobs Act¹ (IIJA) Drinking Water State Revolving Fund Lead Service Line Replacement (DWSRF-LSLR) funding. The IUP provides details on the Division of Water Infrastructure’s (Division) intent to administer the DWSRF-LSLR program and to apply for the FY2024 IIJA DWSRF-LSLR capitalization grant. North Carolina’s allotment of the FY2024 IIJA DWSRF-LSLR funds is \$76,201,000. No state match is required for this funding. The table below summarizes the capitalization grant and the allotment of the funds between various uses described in this Intended Use Plan.

Table Summary of Capitalization Grant

	FY2024 IIJA DWSRF-LSLR
Capitalization Grant Amount	\$76,201,000
State Match	N/A. \$0.
<i>Subtotal</i>	<i>\$76,201,000</i>
Set-Asides from Cap. Grants:	
A. Program Administration	Up to 4%. Up to \$3,048,040
B. Technical Assistance to Small Systems	Up to 2%. Up to \$1,524,020
C. Administration of the Public Water Supply Supervision Program	Up to 10%. Up to \$7,620,100
D. Local Assistance and Other State Programs	Up to 10%. Up to \$7,620,100
<i>Set-Asides subtotal²</i>	<i>Up to \$19,812,260</i>
<i>Available for loans from grant, including Principal Forgiveness</i>	<i>At least 74% of cap grant (\$56,388,740)</i>
Principal Forgiveness from capitalization grant	49%. \$37,338,490
Available as 0% interest loan from cap grant	\$19,050,250

The Division of Water Infrastructure is part of the North Carolina Department of Environmental Quality (NCDEQ). The Division administers financial assistance programs to assist eligible public water supply systems in constructing projects that both benefit public health and improve the human environment. Eligible public water supply systems³ are local government units (LGUs), non-profit water utilities, and investor-owned drinking water companies. Most of the customers of public water supply systems across North Carolina are served by local government units.

¹ Infrastructure Investment and Jobs Act (IIJA) was formerly referred to as Bipartisan Infrastructure Law (BIL). IIJA and BIL can be used interchangeably.

² Unused amounts that are budgeted for set-asides will be used for project loan disbursements prior to closing the capitalization grant.

³ For brevity, “LGUs” in this Intended Use Plan refers to all eligible entities, including local government units, non-profit water utilities, and investor-owned drinking water utilities.

In 2013, the North Carolina General Assembly created the State Water Infrastructure Authority (Authority) to determine projects eligible for certain water infrastructure funding programs, including the Drinking Water State Revolving Fund (DWSRF), consistent with federal law. The priorities reflected in this document have been approved by the Authority.

Specific to this document, the Division administers the DWSRF program as established by the 1996 Amendments to the Safe Drinking Water Act (SDWA), (P.L. 104-182), Section 1452. The DWSRF program offers loans to public water supply systems for drinking water infrastructure at interest rates lower than market rates. As a public water supply system repays the loan, the monies are again loaned out, hence the revolving nature of the program. All loan repayments must go back into the general DWSRF program. This Intended Use Plan explains how the capitalization grant will be used and how the fund will operate in accordance with Section 1452(b) of the SDWA.

The IUP is incorporated into the capitalization grant agreement and becomes the grant work plan. Combined, the operating agreement, grant agreement, IUP, SDWA, and state statutes set the program requirements for the DWSRF and its components, such as the IJA DWSRF-LSLR funds. The IUP identifies anticipated projects scheduled for loan commitments from the IJA DWSRF-LSLR. It also explains how the IJA DWSRF-LSLR will utilize a priority rating system to identify those projects that will address the greatest need and/or provide the greatest positive public health impact in North Carolina.

Funding is available to identify, inventory, and replace lead service lines in drinking water systems. A service line connects the water main to the building inlet. A lead service line may be owned by the water system, the property owner, or both. **Galvanized pipes requiring replacement service lines as defined in 40 CFR 141.2 and galvanized pipes downstream of lead components (lead goosenecks, pigtails, or other connectors) are eligible for replacement with funding from IJA DWSRF-LSLR (as clarified by USEPA's Memorandum in November 2025).** ~~Replacement of lead service lines and galvanized service lines that ever was or currently is downstream of any known lead service line or components are eligible for IJA DWSRF-LSLR funding. Per US EPA's May 1, 2024 memo, starting with the FY2024 capitalization grant, replacement of galvanized service lines that are or were downstream of service lines or components of unknown material (i.e., not known lead) are no longer eligible for IJA DWSRF-LSLR funding.~~ The replacement of lead goosenecks, pigtails, and connectors are eligible expenses for IJA DWSRF-LSLR funds, whether stand-alone or connected to a lead service line. For brevity, "lead service line replacement" in this IUP refers to the replacement of all of the above, including the replacement of lead goosenecks, pigtails, and connectors.

Funding can also be used to replace or install "integrated components" of LSLR projects, following the additional eligibilities established by USEPA's Memorandum in November 2025. Integrated components include water mains, water meters, connectors, and backflow preventers directly connected to lead service lines (described above). Replacement or installation of integrated components are eligible expenses for IJA DWSRF-LSLR funds if the following three conditions apply:

- 1. The Division determines that integrated components are sufficiently financially integrated into the lead service line replacement project such that the project cannot proceed**

- without their replacement,
2. Integrated components needing repair or replacement are directly connected to a lead service line, and
 3. Integrated components are in a disadvantaged community as defined in Section 5.4.2.

2. Financial History

Congress appropriated funds to the DWSRF in the Infrastructure Investment and Jobs Act of 2021 (IIJA). The IIJA appropriated additional funds for five fiscal years (FY2022-FY2026) specifically for lead service line replacements, referred to as the IIJA DWSRF-Lead Service Line Replacement (IIJA DWSRF-LSLR) Fund. The IIJA also appropriated funds specifically to supplement the DWSRF funds and to address emerging contaminants issues, plans for which will be described in separate IUPs.

North Carolina will receive a federal capitalization grant for the FY2024 IIJA DWSRF-LSLR program, in the amount shown in the Table Summary of Capitalization Grant. No state match is required for this funding. Forty-nine percent of the capitalization grant must be offered to LGUs in the form of principal forgiveness loans. Other funds available for projects must be offered to LGUs in the form of low-interest loans that are not principal forgiveness, according to the IIJA. North Carolina will offer those loans with a 0% interest rate.

DWSRF-LSLR funds will not be used to satisfy debt security requirements and set-aside funds will not be made available as loans.

3. Programmatic Goals

Pursuant to the SDWA, the State must identify the goals and objectives of the state loan fund (i.e., the IIJA DWSRF-Lead Service Line Replacement). North Carolina has set its short- and long-term goals of this IUP to align with EPA's **Pillar 1: Clean Air, Land, and Water for Every American**. The State has the following goals for its IIJA DWSRF-LSLR program:

3.1. Overall DWSRF Program Goal

Provide funding for drinking water infrastructure while advancing the NCDEQ's mission to provide science-based environmental stewardship for the health and prosperity of ALL North Carolinians and to advance the public health goals of SDWA while targeting the systems with the greatest needs.

3.2. Lead Service Line Replacement Short-Term Goals

- Continue efforts to inform eligible drinking water systems of the availability of funds, benefits of the DWSRF-LSLR program, and funding process improvements.
- Work closely with local water agencies to complete lead service line (LSL) inventories and verifications of unknown service line materials. Under the Final Lead and Copper Rule Improvements adopted in October 2024, all water systems must identify and replace lead service lines within 10 years. Technical assistance set-aside funds will be used to help water systems develop inventories and verify service line

materials for the “unknowns”. Preparing the inventory and verifying service line materials will allow systems to assess the magnitude of their LSLs, better identify sampling locations, and begin removal actions of LSLs.

3.3. Long-Term Goals

- Support water agencies in full LSL replacement. A service line connects the water main to the building inlet. A lead service line may be owned by the water system, the property owner, or both. **Galvanized pipes requiring replacement service lines as defined in 40 CFR 141.2 and galvanized pipes downstream of lead components (lead goosenecks, pigtails, or other connectors) are eligible for replacement with funding from IIJA DWSRF-LSLR.** The replacement of lead goosenecks, pigtails, and connectors are eligible expenses for IIJA DWSRF-LSLR funds, whether stand-alone or connected to a lead service line. For brevity, “lead service line replacement” in this IUP refers to the replacement of all of the above, including the replacement of lead goosenecks, pigtails, and connectors.

4. Information on Activities to be Supported

North Carolina's program will continue to be one of low-interest loans, supplemented with principal forgiveness as allowed by federal law. The State intends to access up to 4% of the FY2024 capitalization grant (see the Table Summary of Capitalization Grants for the amount) for the administrative costs associated with running the program. These activities include application review, scope review, engineering report and environmental document review, design review, loan processing, final report review, construction inspection, and loan repayment processing and accounting for funded projects.

In addition to funding lead service line inventorying and replacement projects by eligible entities, the State intends to use set-asides from the IIJA DWSRF-LSLR capitalization grant for non-construction project activities related to identifying, inventorying and replacing lead service lines. Non-construction project activities will be conducted directly by the Division, by the Public Water Supply (PWS) Section of the Division of Water Resources in the North Carolina Department of Environment Quality, and through contracts with other agencies and organizations. See Appendix A for more information about set-aside activities. The administrative set-aside is administered by the Division of Water Infrastructure. The Division reserves the right to use unused portions of set-asides at a later date.

The following table provides a summary of the projected funds available as a result of the FY2024 federal capitalization grant for IIJA DWSRF-LSLR, which is the third year of capitalization in the five-year program. **The FY2024 capitalization grant was conditionally awarded to the Division in August 2025, with access limited only to set-aside funds. The Division is providing updated Project Priority Lists to EPA in Spring 2026, after a public comment period of the amended FY2024 IUP to remove the conditions on the capitalization grant.** Set-aside funds are being used to pay for administrative costs and costs associated with contracted vendors conducting technical assistance specified in the set-aside workplan. The first LSLR project loan disbursements began in early FY2025. **The first set-**

aside expenditures were charged to the program during FY2026. Project disbursements from this capitalization grant must occur within the performance period of the capitalization grant (maximum of seven years, although projects are on a project timeline that is up to four years). All loan repayments will be deposited into the base DWSRF program. The project and set-aside expenditures, by fiscal year, including projections for future fiscal years, are shown in the Sources and Uses table below.

Sources and Uses for the Life of the Program (updated March 2026)

Historic Sources and Uses									
	Revenues					Expenditures		Net	
FY	Federal Cap	State Match	Repayments Principal ¹	Repayments Interest	Interest Earned	Project Disbursements	Set-Asides	Net For FY	Cumulative Net
2025 (FY22, 23 cap grants)	\$20,000,000	\$0	Into DWSRF	N/A	N/A	\$8,026,624.34	\$0.00	\$11,973,375.66	\$11,973,375.66
Totals	\$20,000,000	\$0		N/A	N/A	\$8,026,624.34	\$0.00	\$11,973,375.66	\$11,973,375.66
Projected Sources and Uses for FY2026 and Beyond (based on Availability Model)									
	Revenues					Expenditures		Net	
FY	Federal Cap	State Match	Repayments Principal	Repayments Interest	Interest Earned	Project Disbursements ²	Set-Asides	Net For FY	Cumulative Net
2026 (FY22-24 cap grants)	\$52,000,000	\$0	Into DWSRF	N/A	N/A	\$16,000,000	\$4,500,000	\$31,500,000	\$43,473,376
2027 (FY22-25 cap grants)	\$69,000,000	\$0	Into DWSRF	N/A	N/A	\$25,000,000	\$12,000,000	\$32,000,000	\$75,473,376
2028 (FY22-25 cap grants)	\$59,000,000	\$0	Into DWSRF	N/A	N/A	\$50,000,000	\$15,000,000	(\$6,000,000)	\$69,473,376
2029-2033 (FY22-25 cap grants)	\$123,310,000	\$0	Into DWSRF	N/A	N/A	\$142,834,636	\$49,948,740	(\$69,473,376)	\$0
Totals	\$303,310,000	\$0		N/A	N/A	\$233,834,636	\$81,448,740	(\$11,973,376)	\$0

Values in BLUE as approximate values/projections.

¹ Repayments of LSLR loans (principal only and zero interest) will be added to the base DWSRF program. \$19,050,250 is expected in loan repayments from FY2024 cap grant-awarded projects (repaid between FY2029 - FY2049).

² Project disbursements may last seven years after the FY2024 capitalization grant award, through FY2032.

5. Criteria and Methods for Distributing Funds

5.1. Project List and Prioritization

The Intended Use Plan Project Priority List may be supplemented or replaced based on applications received as part of future funding cycles (see 5.2. below). Applications that are received in one funding cycle and are not selected for funding will be reconsidered in one more cycle (the next one) for funding.

The State's ranking for projects will be based on the DWSRF-Lead Service Line Replacement Priority Rating System established by the State Water Infrastructure Authority working with the Division (see Appendix D). Applications will be ranked based on the following scores, in the following order: 1) total application score (points), 2) project purpose points, 3) project benefit points, and 4) affordability points.

IIJA DWSRF-LSLR funds will only be awarded to projects when the entire project is eligible for IIJA DWSRF-LSLR funds and receives Project Purpose priority points in the priority rating system.

- Eligible costs include the following:
 - Replacement of curb stops, curb stop boxes, and other service line appurtenances that are removed as part of full LSLR.
 - Site restoration, including landscaping, sidewalks, driveways, curbs, etc., if the removal is necessary to replace the lead service line.
 - Permit fees if the fees are normal, required, and specific to the LSLR. It is recommended that LGUs waive these fees.
 - Temporary pitcher filters or point-of-use (POU) devices certified to reduce lead during or for a short time period after LSLR projects by an American National Standards Institute-accredited certifier.
 - Non-routine (i.e., not for compliance purposes) lead sampling as part of a LSLR project.
 - **Integrated components that are directly connected to a lead service line, directly connected with the community's ability to proceed with the LSLR project, and that are in disadvantaged communities as defined in Section 5.4.2.**

The Priority Rating Systems considers three elements: project purpose, project benefit, and affordability.

- Project purpose points are available for projects to accomplish the following:
 - Complete removal of lead service lines (both public and privately owned portion) or service lines made of galvanized iron or galvanized steel that are currently or have previously been downstream of lead components and replacement with pipe that meets the requirements established under 40 CFR 143 and complies with state and local plumbing codes and/or building codes.

- Removal of lead or galvanized goosenecks, pigtails, and connectors and replacement with an acceptable material that meets the requirements established under 40 CFR 143 and complies with state and local plumbing codes and or building codes.
- Establish and implement a program to find and replace lead service lines in areas suspected of having lead service lines or connectors.
- Develop or update lead service line inventories, including locating and mapping lead service lines. Methods of investigation to develop inventories may include visual observation, water quality sampling (non-compliance), excavation, vacuum or hydro-excavation, statistical analysis, or other emerging technologies.
- Project benefit points are given for applicants that have a documented exceedance of the lead action level, and additional prioritization for projects that will address the documented exceedance of the lead action level.
- The Division also considers the ability of the applicant to afford projects. For example, those applicants that have a high poverty rate, high utility bills, lower population growth, lower median household incomes, higher unemployment, or projects that benefit disadvantaged areas receive higher priority points. Local government units that are under the fiscal control of the Local Government Commission and that have required Emergency Operating Grants to balance their budgets are also prioritized.

5.2. Estimated Funds Available for Each Funding Round

It is the intent of the Division to make the IJJA DWSRF-LSLR funds available to systems more quickly than the traditional funding cycles which occur twice per year (awards in February, and July). IJJA DWSRF-LSLR funds will be made available for awards as part of regular State Water Infrastructure Authority (SWIA) meetings throughout the year. The Division will establish application due dates for each funding cycle based on established SWIA meeting dates and will communicate those due dates on the Division's website. Complete and eligible applications received on or prior to the application due date will be considered for funding and the Division will make funding recommendations to SWIA at the next scheduled SWIA meeting. Projects not selected for funding will be automatically reconsidered for the next funding cycle.

The following table shows the expected funding rounds for the FY2024 IJJA DWSRF-LSLR funds but are subject to change based on SWIA meeting dates and on availability of funds.

Expected Funding Rounds for the FY2024 IIJA DWSRF-LSLR funds				
Approximate Application Due Date	Approximate SWIA Meeting (Award Date)	Estimated Min. FY2024 Principal Forgiveness (PF) Available	Estimated Min. FY2024 Zero-Interest Loans Available	Estimated Min. FY2024 LSLR Funds Available (Includes PF)
January 10, 2025	February 19, 2025 ¹	\$0 (actual)	\$5,360,560 (actual)	\$5,360,5560 (actual)
March 7, 2025	April 16-17, 2025	\$1,129,110 (actual)	\$9,000,000 (actual)	\$10,129,110 (actual)
June 6, 2025	July 16, 2025	\$12,374,300 (actual)	\$2,000,000 (actual)	\$14,374,300 (actual)
August 1, 2025	September 17, 2025	\$11,186,000 (actual)	\$3,343,100 (actual)	\$14,529,100 (actual)
November 7, 2025	December 10, 2025	\$5,507,500 (actual)	\$3,611,800 (actual)	\$9,119,300 (actual)
January 9, 2026	February 18, 2026	\$6,309,344 (actual)	\$0 (actual)	\$6,304,344 (actual)
March 2, 2026	April 15-16, 2026	Any unobligated FY2024 amount + TBD ²	Any unobligated FY2024 amount + TBD ²	Any unobligated FY2024 amount + TBD ²
Available from FY2024 Cap Grant		\$37,338,490	\$19,050,250	\$56,388,740

¹ February 2025 funding awards by SWIA in excess of previous capitalization grant funding available; pending receipt of FY2024 capitalization grant funds from EPA.

² Funding may be available based on remaining availability of FY2024 IIJA DWSRF-LSLR funds and on awards for funding from FY2025 IIJA DWSRF-LSLR.

5.3. Application and Project Deadlines

The IIJA DWSRF-Lead Service Line Replacement program operates on a priority basis. Funding is allocated to projects in priority order (as noted above) and within special reserve requirements (e.g., Principal Forgiveness Reserve, etc. as described herein) until available funds for a funding round are exhausted. Funding availability for each funding round is determined based on LSLR funds remaining and number of founding rounds remaining in the Capitalization Grant cycle. Results will be posted on the program’s website. Funding applications will be accepted throughout the year. Only projects with a scope entirely eligible for LSLR funds will be eligible for funding from the IIJA DWSRF-LSLR by the State Water Infrastructure Authority.

Awards will be made by the Authority at meetings scheduled and advertised on the Division’s website. After the Authority approves awards of funds to eligible projects during a funding cycle, the DWSRF program will issue Letters of Intent to Fund (LOIF) based on the projects’ prioritization and the amount of funds available in the cycle.

Project funding is contingent on adherence to the schedule below in accordance with §159G-41 (times listed are measured from the date of the Letter of Intent to Fund unless noted otherwise). Projects that do not require engineering design may have an alternate

project schedule that skips unnecessary milestones and moves project to completion more quickly. Such projects will be expected to be completed within one year of the award:

- Within four months, a complete Engineering Report for construction projects or a project scope for inventorying work must be submitted to the Division. Inventory projects will not be required to submit an Engineering Report and will have an alternative schedule established.
- Within six months, the Engineering Report or scope of work must be approved by the Division.
- Within nine months, plans and specifications or bid and design documents must be submitted to the Division for construction projects. Inventory Projects will not be required to submit an Engineering Report and will have an alternative schedule established.
- Within 12 months, plans and specifications or bid and design documents must be approved by the Division.
- Within 16 months, the following events must be completed (If applicable):
 - Advertise the project for bids
 - Receive bids
 - Submit bid information to Division
 - Obtain the Division's Authority to Award construction contracts.
- Within 18 months, construction contracts must be executed. Inventory Projects will have an alternative schedule established.

Per G.S.159G-41, a letter of intent to offer (LOIF) an award is withdrawn if the applicant fails to enter into a construction contract for the project within two years after the LOIF. An award for a project is withdrawn if the applicant fails to enter into a construction contract for the project within one year after the date of the award. Both milestones may be extended if the Department finds that the applicant has good cause for the failure and the Department sets a date by which the applicant must take action or forfeit the loan or grant.

The milestones in the timeline above are absolute for all projects in a particular cycle and will not be extended except upon a demonstrated need for extension by the LGU. Projects may be able to meet these milestones ahead of schedule. However, in the event that any milestone noted above is not met, work by the Division staff may be suspended and all documents returned to the Applicant until the proposed project is resubmitted for consideration during a future funding round.

5.4. Detailed Loan and Project Funding Criteria

5.4.1. General

- 5.4.1.1. To be eligible for IJJA DWSRF-Lead Service Line Replacement funding, a project must be on the Intended Use Plan Project List.
- 5.4.1.2. Funding can be provided for any eligible projects as provided for in the Safe Drinking Water Act and NCGS 159G. A project or activity is eligible for funding when it is both DWSRF-eligible and either a lead service line replacement (LSLR) project or associated activity directly connected to the identification, inventorying, planning, design, and replacement of lead service lines. Any project involving the replacement of a lead service line must replace the entire lead service line, not just a portion, unless a portion has already been replaced, is concurrently being replaced with another funding source, or identified as not needing replacement due to the absence of a lead service line component.
- 5.4.1.3. To support Lead and Copper Rule Improvement requirements for water systems to inventory lead service lines and to verify the service line materials by established federal deadlines, a minimum of 50% of funds made available for each funding round will be reserved for inventory projects. "Inventory projects" include verification of service line materials. Funds reserved in this section will be made available to all projects in priority order if there are not sufficient applications to meet the 50% minimum funding reserve.
- 5.4.1.4. Funding will be provided in priority order based on project score, Authority determination, and the amount of funds made available with consideration of the principal forgiveness reserve detailed below.
- 5.4.1.5. The maximum IJJA DWSRF-LSLR funding loan amount (including principal forgiveness) per applicant for each funding round as defined in Section 5.2 are as follows:
 - \$5,000,000 for projects replacing known lead service lines.
 - \$2,000,000 for projects finding and replacing lead service lines in areas suspected of having lead service lines. Project must result in service lines within the project area being categorized as "known lead" or "known not lead" using methods approved for completion of the LSL inventory as required in the Lead and Copper Revised Rule. Budget must limit service line material verification to \$1,000,000.
 - \$1,000,000 for projects to conduct a lead service lines inventory.
- 5.4.1.6. The maximum loan amount per applicant can exceed caps listed in 5.4.1.5 if additional funding is available in the funding round as defined in Section 5.2. Maximum loan amounts will be increased by \$500,000 increments (up to the funding amount request by the applicant) in

priority order until all funds available during the funding round in Section 5.2 are awarded.

- 5.4.1.7. Projects receiving project purpose priority points will receive loans with a targeted interest rate of 0%.

5.4.2. Principal Forgiveness

- 5.4.2.1. Communities that are eligible to receive principal forgiveness are defined as “disadvantaged communities”. A total of 49% (see Table Summary of Capitalization Grant for the amount) of the IJA DWSRF-LSLR Capitalization Grant will be used to provide additional subsidization in the form of principal forgiveness to disadvantaged communities.

- 5.4.2.2. The Division will provide additional subsidization to projects in the categories provided in 5.4.2.2.1 – 5.4.2.2.2 in project priority order. The Division will provide principal forgiveness to a project based on only one of the categories provided in 5.4.2.2.1 – 5.4.2.2.2.

- 5.4.2.2.1. Affordability: Projects will receive principal forgiveness, if available, following the affordability criteria grant percentage matrix found in Appendix E when the applicant has:
- less than 20,000 residential water connections;
 - at least three (3) of five (5) LGU economic indicators (“LGU indicators”) worse than the state benchmark;
 - an operating ratio (future) of less than 1.3; and
 - utility rates greater than the state median or a project cost per connection that is projected to increase the utility rates above the 70th percentile of state-wide utility rates.

Projects will receive principal forgiveness, if available, following the affordability criteria grant percentage matrix found in Appendix E when the benefiting system has:

- been designated as distressed per NCGS § 159G-45; and
- utility rates greater than the state median or a project cost per connection that is projected to increase the utility rates above the 70th percentile of state-wide utility rates.

Local government units under the fiscal control of the Local Government Commission on the day of the application deadline qualify for 100% principal forgiveness.

Principal forgiveness will range from 25% to 100% of the award, in increments of 25%, up to \$1,000,000 per project per

round at the targeted interest rate, as described under 5.4.1.7, applied to the remaining portion of the loan.

5.4.2.2.2. Disadvantaged Area: Projects for which at least 50% of the project costs are to benefit disadvantaged areas will receive principal forgiveness for 50% of the award, up to \$1,000,000.

A targeted project area will be considered a “disadvantaged area” based on factors that shall include:

- affordability of water and sewer service rates relative to the income levels of residents of the targeted project area;
- median household income of the targeted project area;
- poverty rates of the targeted project area;
- property values of the targeted project area; and/or
- employment rates of the targeted project area.

Additional factors that may qualify the targeted project area as disadvantaged, such as (but not limited to) demographic, historical, cultural, linguistic, socio-economic stressors, cost-of-living stressors, or existing contamination factors, may also be considered for targeted project areas that meet the size specification above. Additional factors cannot be considered if they contradict federal or state requirements for federal funding.

Applicants must provide a narrative in the application to justify the targeted project area as disadvantaged using the factors above and may use maps or other existing sources to document their justification. For example, applicants can demonstrate a targeted project area as a disadvantaged area if it falls within a Potentially Underserved Block Group or Tribal boundary layer in the North Carolina Department of Environmental Quality’s Community Mapping System.

5.4.2.3. Notwithstanding the above limits in 5.4.2.2.1 and 5.4.2.2.2, if available principal forgiveness funds in a funding round exceed the limits in 5.4.2.2.1 and 5.4.2.2.2, those limits may be exceeded to ensure that available principal forgiveness funds in the funding round are used in the following order:

5.4.2.3.1. Principal Forgiveness limit of \$1,000,000 may be exceeded by \$500,000 (not to exceed the applicant’s grant percentage eligibility) for eligible projects in priority order. If principal forgiveness funds remain for that funding cycle, additional

increments of up to \$500,000 principal forgiveness can be awarded (not to exceed applicants' grant percentage eligibility) for eligible projects in priority order.

5.4.2.3.2. Principal Forgiveness percentages determined in 5.4.2.2.1 and 5.4.2.2.2 may be exceeded by 10% (not to exceed 100%) for eligible projects in priority order. If funds remain after all eligible projects receive the first percentage increase, principal forgiveness percentages can be increased for eligible projects by additional 10-percent increments (not to exceed 100%) until available Principal Forgiveness funds are awarded.

5.4.3. Small System Reserve

5.4.3.1. 40 CFR 35.3525(a)(5) requires that a minimum of 15% of the base DWSRF and the IIJA General Supplemental DWSRF loan assistance be awarded to small systems. This requirement and the Small System Reserve do not apply to the IIJA DWSRF-Lead Service line Replacement Funds.

5.4.4. Capacity Development Reviews

Capacity Development reviews for construction projects that require permitting will be done by the Public Water Supply Section. Inventory projects and 'find and fix' projects are not anticipated to have a Capacity Development review. However, inventory details resulting from the projects will be sent to the Compliance agency (PWS) for review. The Division will work closely with the Public Water Supply Section to develop scope and guidance requirements for LSLR projects.

5.4.5. Miscellaneous Criteria/Provisions:

5.4.5.1. Davis-Bacon prevailing wage rates apply to all State Revolving Fund loans.

5.4.5.2. American Iron and Steel provisions apply to loans as required by federal mandates.

5.4.5.3. Build America, Buy America Act (BABA) requirements apply to loans as required by US EPA and federal mandates.

5.4.5.4. The DWSRF loan interest rate is based on half of The Bond Buyer's 20-Bond Index except as specifically allowed herein. The maximum interest rate for each loan will be set at the time of the application, while a lower interest rate, if available, will be set at the time of the award offer. An interest rate of 0% will be used for all IIJA DWSRF-LSLR loans.

5.4.5.5. Approval of a repayable loan is contingent on approval by the Local

Government Commission (LGC). Applicants receiving 100% principal forgiveness loans must submit their audited financial statement of the latest fiscal year to the Local Government Commission by July 1 of the following calendar year prior to receiving disbursements from the DWSRF principal forgiveness loan.

- 5.4.5.6. DWSRF loan terms are set by the LGC.
- 5.4.5.7. The maximum DWSRF loan term is determined by state statute and federal requirements. The loan term for LSLR inventories-only (with no construction) will be five (5) years, unless the local government unit is designated as distressed per NCGS § 159G-45 and requests a longer term due to debt capacity limitations.
- 5.4.5.8. A 2% loan fee is required. The loan fee cannot be financed by the DWSRF fund.
- 5.4.5.9. Loan repayments are due in May (principal and interest) and November (interest only) of each year.
- 5.4.5.10. Interest begins accruing on the date of completion established in the Notice to Proceed.
- 5.4.5.11. The first loan repayment is due no sooner than six months after the completion date as established in the Notice to Proceed.

6. Programmatic Conditions

6.1. Assurances and Specific Proposals

Pursuant to SDWA, the State of North Carolina certifies that:

- 6.1.1. The State will enter into binding commitments for 100% of the amount of each payment received under the capitalization grant less the set aside allowances within one year after receipt of each payment.
- 6.1.2. The State will expend all funds in the DWSRF in an expeditious and timely manner.

6.2. Federal Requirements

- 6.2.1. The State will ensure that all federal requirements are met as noted in the DWSRF Operating Agreement between the State and US Environmental Protection Agency and the Grant Agreement, including Single Audit, Disadvantaged Business Enterprise compliance, federal environmental crosscutters, and Federal Funding Accountability and Transparency Act (FFATA) reporting requirements.
- 6.2.2. The State will enter all required reporting information at least quarterly into respective federal databases including FFATA and the SRF Data System.

6.2.3. The State will ensure that all applicants to the DWSRF program certify that they meet the fiscal sustainability planning requirements. Such certifications will be received by the time of loan offer.

6.3. Transfer between DWSRF and Clean Water State Revolving Fund

Transfer of funds between the DWSRF and the Clean Water State Revolving Fund are authorized by federal statutes, however no such provisions are applicable to the IJA DWSRF-LSLR funds. This IUP does not propose any such transfer of funds.

7. Program Evaluation Report

DWSRF anticipates receiving and responding to the Program Evaluation Report (PER) for FY2024 funding in calendar year 2025, during and following the Annual Review. The Division participated in the EPA FY2023 Annual Review, which was kicked off on February 27-28, 2024. The State didn't have any audit findings during FY2023.

8. Public Review and Comment

The Intended Use Plan is drafted by the Division, including the Priority Rating System and the funding awards as approved by the State Water Infrastructure Authority, and sent to EPA's Regional Office for review. The draft IUP including the proposed Priority Rating System is published for public review and comment. Links for the documents and notification to the public are done through the Department's website and email notifications sent to various listservs. Once the public review is completed, the Division prepares responses to any comments received and any updates to the IUP, if necessary. If no changes are proposed by the Division, a reason is provided as the response and all of these comments and responses become part of the final IUP, which is submitted to EPA as part of the capitalization grant application.

As funding awards are made by the State Water Infrastructure Authority, the Project Priority List is updated and published for further public review and comment. Links for the documents and notification to the public are done through the Department's website and email notifications sent to various listservs. Once the public review is completed, the Division prepares responses to any comments received, incorporates the revised Project Priority List into the amended IUP and submits the amended IUP to EPA's Regional Office for review and to remove applicable conditions on the capitalization grant award.

The Division conducted a public comment period for the draft IUP including the proposed Priority Rating System (which was established in April 2024 by the State Water Infrastructure Authority; see Appendix D) between February 28 and March 31, 2025. Comments and responses are below.

Comments on Disadvantaged Communities/Affordability Criteria

Comment: We appreciate the Division's approach in section 5.4.2.2.2, which attempts to provide

funding benefits to disadvantaged areas that are within a jurisdiction that itself might not be disadvantaged broadly. We also appreciate the flexibility provided by allowing the consideration of “additional factors” such as “demographic, historical, cultural, linguistic, socio-economic stressors, cost-of-living stressors, or existing contamination factors.” The Division proposes adding the language, “[a]dditional factors cannot be considered if they contradict federal or state requirements for federal funding.” We understand that the agency must ensure funding decisions comply with applicable law and do not object to the proposed language. However, we think it would be helpful for the Division to clarify whether they believe any of the stated additional factors are currently contradictory to any federal or state requirements. This would provide more guidance to applicants who are considering using the disadvantaged area criteria to increase prioritization for their project.

Response: The stated additional factors, which are listed as examples, are general categories that may encompass many more specific metrics that an applicant might choose to use. While we believe the general categories may not necessarily be contradictory to federal and state requirements, some of the specific factors and metrics used by the applicants may. The Division will only be able to assess based on the application’s information. During application training, the Division will answer questions to help advise applicants before they submit applications. As more specific, applicable information is made available to the Division, we will update the application Guidance or application training materials to advise potential applicants. **No change proposed to the IUP.**

Comment: The draft IUP excludes using the Climate and Economic Justice Screening Tool as one of the tools used by applicants to identify a disadvantaged area in their application. This tool was included in the previous IUPs and should likewise be included in this IUP. While this tool is no longer supported by the Council for Environmental Quality, archived versions of the tool are still available, and can be alternative useful indicators of “disadvantaged areas.”

Response: The Division received specific instruction from USEPA to remove the tools that are no longer supported from the IUPs. **No change to the IUP.**

9. Budget and Project Periods

- 9.1. The budget and project period being requested for the capitalization grant is shown in Appendix B and on EPA Form SF 424.
- 9.2. The anticipated cash draw ratio will be 100% federal for disbursements made from the capitalization grant.
- 9.3. No State match is required for the IJJA DWSRF-LSLR Funds.
- 9.4. Loan fees (2% of loan amount) on loans from the grant and fees from loans from repayment funds will be deposited into separate account centers. Fees will be used to administer the DWSRF program. In addition, fees considered non-program income will also be used for other water quality purposes within the Division of Water Infrastructure and Division of Water Resources, including funding for staff positions.
- 9.5. In order to reduce and minimize federal unliquidated obligations and undisbursed non-federal cash balances, the state will draw down on the capitalization grants in the order it was received, fully spending on each year's capitalization grant fund types before drawing down from the next year's capitalization grant.

Appendix A

Set-Aside Activity Description

Unused amounts that are budgeted for set-asides will be used for project loan disbursements prior to closing the capitalization grant.

A. Program Administration

Up to 4% of the capitalization grant (see amount in the Table Summary of Capitalization Grant) will be used for program administration. Administration includes management of the program; financial management; development of yearly comprehensive project priority lists; scope or project engineering document review; construction inspections for funded projects; supporting inventorying lead service lines; data management; data analysis; reporting; records keeping; public engagement; etc. These funds will also be used to procure all equipment and training necessary for the adequate performance of staff on related duties.

B. Technical Assistance to Small Systems

The State will allocate up to 2% of the capitalization grant (see amount in the Table Summary of Capitalization Grant) to provide technical assistance to small water systems. The Division of Water Resources' Public Water Supply (PWS) Section will provide funding support for staff in NC DEQ headquarters and in regional offices. In addition, funds will be used to pay vendors contracted by the Department in a competitive RFP process to conduct inventories, service line verifications, non-routine lead sampling, funding applications, reporting, public engagement, and/or technical assistance to small water systems across the state. Assistance will be provided to small water systems including those that may not be able to access SRF funding effectively. Assistance provided with these funds must be directed to benefit public water supply systems that service a population of less than 10,000.

C. Administration of the Public Water Supply Supervision Program (State Program Management)

The State will allocate up to 10% of the capitalization grant (see amount in the Table Summary of Capitalization Grant) to supplement the Public Water System Supervision Grant from EPA for salary and support for the Lead and Copper Rule program implementation of the SDWA. The set-aside provides funding for staff plus any additional permanent, time-limited, or temporary positions, as resources allow, or contracts, as well as additional staff to cover additional resource needs due to new tasks or reduced state budgets. In addition, funds will be used to pay vendors contracted by the Department in a competitive RFP process to conduct inventories, service line verifications, non-routine lead sampling, funding applications, reporting, public engagement, and/or technical assistance to small water systems across the state.

Assistance will be provided to small water systems including those that may not be able to access SRF funding effectively. Adjustments to the set-asides will be made as the project priority list is fully established for the capitalization grant.

D. Local Assistance and Other State Programs

The State will allocate up to 10% of the capitalization grant (see amount in the Table Summary of Capitalization Grant) for Local Assistance and Other State Programs to support lead service line inventory, replacement, and funding. The set aside funds will be reduced to make funds available for projects to inventory and replace lead service lines as needed. Adjustments to the set-asides will be made as the project priority list is fully established for the capitalization grant.

a. Lead Service Line Inventory/Verification and Funding Application Assistance

Support to water systems will be provided by vendors contracted by the Department under a competitive RFP process. The assistance will help water systems meet requirements established by the Lead and Copper Rule (Revisions and Improvement). Services will include technical support to communities to conduct inventories, verify service line materials, conduct non-routine lead sampling, identify lead service lines in need of replacements to be potentially funded with IIJA DWSRF Lead Service Line Replacement Funds, apply for IIJA DWSRF-LSLR or DWSRF funding to address lead service line inventorying and replacement, report inventories to the Department, engage with the public and/or provide related technical assistance to water systems across the state. Assistance will be provided to small water systems including those that may not be able to access SRF funding effectively.

Appendix B

Revised - Intended Use Plan Project Priority List for IIJA DWSRF-LSLR

The Intended Use Plan Project Priority List will be supplemented or replaced based on applications received as a part of future funding cycles. Funds from this year's capitalization grants may also be disbursed to projects listed on previous **or future** years' Intended Use Plan Project Priority Lists that are active during this year's capitalization grant's performance period.

Funding awards for FY2024 IIJA DWSRF-LSLR funding began in February 2025. Based on the number of water systems applying for IIJA DWSRF-LSLR funds, the Division expects applications for FY2024 IIJA DWSRF-LSLR funds to continue throughout calendar year 2025 **and into 2026**. The Project Priority List will be created and subjected to a public comment period after applications are received and awarded FY2024 IIJA DWSRF-LSLR funds pending receipt from US EPA.

This Project Priority List items the output/outcomes of the policies and procedures outlined in this Intended Use Plan for the FY2024 funds.

All additional subsidy is provided as principal forgiveness. All principal forgiveness listed below are for LGUs that meet the state's affordability criteria or disadvantaged communities as defined in this IUP. All loans are provided as zero-interest loans.

Of the projects selected for funding awards in February 2025, \$5,360,560 of the zero-interest loan assistance (and \$0 of principal forgiveness assistance) will be funded from the FY2024 IIJA DWSRF-LSLR capitalization grant. **Projects awarded funding since April 2025 are to be funded from the FY2024 IIJA DWSRF-LSLR capitalization grant. Remaining funding will be awarded in various SWIA meetings to applications received in 2026.** The Intended Use Plan Project Priority List will be supplemented based on applications received as a part of future funding cycles.

Other Applications and Awards (to be completed in 2026)

The Division continues to solicit applications from eligible drinking water systems for funding inventory and/or replacement of lead service lines. Applications are accepted year-round and will be considered for funding in multiple State Water Infrastructure Authority meetings per year. **Applications will be accepted throughout 2026. As of March 2026, \$50,285,102 has been awarded from the FY2024 IIJA DWSRF-LSLR capitalization grant (including \$35,843,326 in principal forgiveness and \$14,441,776 in zero-interest loans).** An updated Project Priority List will be published after the funding awards to amend the Intended Use Plan.

Applications and Awards – February 2026 Round (new since last public comment period)

Funding tables below this line were previously presented in previous public comment periods. Projects below are anticipated to be funded from the FY2022 and the FY2023 capitalization grants. However, depending on the projects' timelines, IJJA DWSRF-LSLR disbursements to projects below may come from the FY2024 capitalization grant and hence are included in the FY2024 capitalization grant Intended Use Plan's Project Priority List to cover that possibility.

Applications and Awards – December 2024 Round

³ Awards for Inventory projects limited to \$1 million per funding round. Remainder of funding request to be reconsidered in the next funding round.

^x Funding offer was declined by the Applicant.

Summary of LSLR Funding Rounds (updated March 2026)

	Funding Amount Requested (including amounts considered over multiple funding periods)	Principal Forgiveness Awarded	0% Interest Loans Awarded	Total Funding Awarded
September 2023	\$38,119,673	\$21,719,364	\$12,645,059	\$34,364,423
December 2023	\$14,043,850	\$8,247,350	\$4,915,400	\$13,162,750
February 2024	\$15,665,291	\$7,937,912	\$4,838,820	\$12,776,732
April 2024	\$15,005,456	\$7,551,148	\$6,404,308	\$13,955,456
July 2024	\$23,303,284	\$14,994,151	\$6,220,289	\$21,214,440
September 2024	\$12,171,259	\$2,136,259	\$10,035,000	\$12,171,259
December 2024	\$14,686,474	\$9,686,474	\$4,500,000	\$14,186,474
February 2025	\$28,991,954	\$14,486,954	\$7,755,000	\$22,241,954
April 2025	\$14,503,410	\$1,129,110	\$9,000,000	\$10,129,110
July 2025	\$14,374,300	\$12,374,300	\$2,000,000	\$14,374,300
September 2025	\$14,529,100	\$11,186,000	\$3,343,100	\$14,529,100
December 2025	\$9,119,300	\$5,507,500	\$3,611,800	\$9,119,300
February 2026	\$6,309,344	\$6,309,344	\$0	\$6,309,344
Applicant declined funding from Sept. 2023 – Feb. 2026 funding awards		(\$1,990,060)	(\$14,627,140)	(\$16,617,200)
TOTALS (excluding declined awards)	\$220,822,695	\$121,275,806	\$60,641,636	\$181,917,442
Minimum funding available for projects from the: FY2022 IJA DWSRF-LSLR capitalization grant FY2023 IJA DWSRF-LSLR capitalization grant Total FY2022 & FY2023 capitalization grants		\$42,660,380 \$42,772,100 \$85,432,480	\$24,377,360 \$21,822,500 \$46,199,860	\$67,037,740 \$64,594,600 \$131,632,340
Awarded from the FY2024 capitalization grant		\$35,843,326	\$14,441,776	\$50,285,102
Minimum funding available from the FY2024 capitalization grant		\$37,338,490	\$19,050,250	\$56,388,740

Appendix C

2024 IIJA DWSRF-LSLR Proposed Payment Schedule

(Dependent on timing of award of federal grant)

This proposed schedule may be updated in the final Intended Use Plan.

<u>Payment Quarter</u>	<u>2024 IIJA DWSRF- LSLR Payment Amount</u>
October 1, 2025 - December 31, 2025	
January 1, 2026 - March 31, 2026	
April 1, 2026 - June 30, 2026	\$2,000,000
July 1, 2026 - September 30, 2026	
October 1, 2026 - December 31, 2026	
January 1, 2027 - March 31, 2027	
April 1, 2027 - June 30, 2027	\$10,000,000
July 1, 2027 - September 30, 2027	
October 1, 2027 - December 31, 2027	
January 1, 2028 - March 31, 2028	
April 1, 2028 - June 30, 2028	\$22,000,000
July 1, 2028 - September 30, 2028	
October 1, 2028 - December 31, 2028	
January 1, 2029 - March 31, 2029	
April 1, 2029 - June 30, 2029	\$22,000,000
July 1, 2029 - September 30, 2029	
October 1, 2029 - December 31, 2029	
January 1, 2030 - March 31, 2030	
April 1, 2030 - June 30, 2030	\$15,000,000
July 1, 2030 - September 30, 2030	
October 1, 2030 - December 31, 2030	
January 1, 2031 - March 31, 2031	
April 1, 2031 - June 30, 2031	\$3,201,000
July 1, 2031 - September 30, 2031	
October 1, 2031 - December 31, 2031	\$2,000,000
January 1, 2032 - March 31, 2032	
April 1, 2032 - June 30, 2032	
Total	\$76,201,000

Appendix D

PRIORITY RATING SYSTEM for Lead Service Line Replacement Projects

Finalized by the Authority in April 2024 after a public comment period was completed between March 1 – April 1, 2024. No changes are proposed to the Priority Rating System.

The following PRS applies to projects where the entire project scope is eligible for LSLR funds.

2025 PRIORITY RATING SYSTEM for Lead Service Line Replacement Projects Eligible for IJJA DWSRF-LSLR Funds			
<i>Instructions: For each line item, mark "X" to claim the points for that line item. Be sure that your narrative includes justification for every line item claimed. At the end of each Category, provide the total points claimed for each program in the subtotal row for that Category. Then add the subtotals from each category and enter the Total of Points for All Categories in the last line. Note that some Categories have a maximum number of points allowed that may be less than the total sum of individual line items.</i>			
Line Item #	Category 1 – Project Purpose (Points will be awarded for <u>only one</u> Project Purpose)	Claimed Yes/No	Points
1.A	Project eliminates lead service lines (100% of project is to replace known lead service lines) OR		20
1.B	Project establishes and implements a program to find and replace lead service lines in areas suspected to have lead service lines OR		15
1.C	Project inventories lead service lines (no replacement)		10
Maximum points for Category 1 – Project Purpose			20
Subtotal claimed for Category 1 – Project Purpose			
Line Item #	Category 2 – Project Benefits	Claimed Yes/No	Points
2.A	Project addresses/resolves documented Lead Action Level Exceedance OR		5
2.B	Project area has documented Lead Action Level Exceedance		2
Maximum points for Category 2 – Project Benefits			5
Subtotal claimed for Category 2 – Project Benefits			
Line Item #	Category 3 – System Management	Claimed Yes/No	Points
	Reserved for future consideration		
Maximum points for Category 3 – System Management			0
Subtotal claimed for Category 3 – System Management			N/A

2025 PRIORITY RATING SYSTEM for Lead Service Line Replacement Projects Eligible for IJJA DWSRF-LSLR Funds			
Line Item #	Category 4 – Affordability	Claimed Yes/No	Points
4.A	Residential Connections		
4.A.1	Less than 10,000 residential connections OR		2
4.A.2	Less than 5,000 residential connections OR		4
4.A.3	Less than 1,000 residential connections		8
4.B	Current Monthly Combined Utility Rates at 5,000-gallon Usage		
4.B.1	Greater than the 50 th percentile OR		4
4.B.2	Greater than the 70 th percentile OR		6
4.B.3	Greater than the 85 th percentile OR		8
4.B.4	Greater than the 95 th percentile		10
4.C	Local Government Unit (LGU) Indicators		
4.C.1	3 out of 5 LGU indicators worse than state benchmark OR		3
4.C.2	4 out of 5 LGU indicators worse than state benchmark OR		5
4.C.3	5 out of 5 LGU indicators worse than state benchmark OR		7
4.C.4	Project benefits disadvantaged areas		5
Maximum points for Category 4 – Affordability			25
Subtotal claimed for Category 4 – Affordability[‡]			
Total of Points for All Categories			

[‡]Local government units under Local Government Commission’s fiscal control that have received an Emergency Operating Grant under NC GS 159G-34.5 in the current or prior fiscal year qualify for the maximum points for Category 4: Affordability.

Appendix E

Grant Percentage Matrix

Percentile Ranges for grant eligibility categories	Combined Monthly Bills² based on 2024 data (\$/5000 gallons)	% Grant or PF	Combined Monthly Bills + Project cost per customer per month³ based on 2024 data (\$/5000 gallons)	% Grant or PF
> 99 Percentile	> \$166	100%	> \$166	100%
95 - 99 Percentile	\$145 - \$166	100%	\$145 - \$166	75%
85 - 95 Percentile	\$126 - \$145	75%	\$126 - \$145	50%
70 - 85 Percentile	\$107 - \$126	50%	\$107 - \$126	25%
50 - 70 Percentile	\$89 - \$107	25%	\$89 - \$107	0%
0 - 50 Percentile	\$0 - \$89	0%	\$0 - \$89	0%

¹ Local government units under the fiscal control of the Local Government Commission on the day of the application deadline qualify for 100% grant or principal forgiveness.

² Single utility providers may divide by 0.4 for water or 0.6 for sewer applicant for calculating a combined monthly bill.

³ Project cost per customer per month calculated assuming 0% interest financing for 20 years.

Monthly bill data updated May 2024 using January 2024 statewide rates data compiled by the Environmental Finance Center at the University of North Carolina, Chapel Hill.
