

GACTION 7C - Permit Condition #2 (Avoidance)

For Paint and Allied Products Manufacturing facilities, but no target HAP being used for all or portions of their process. The permit engineer can choose a., b., or BOTH depending on the circumstances.

1. 15A NCAC 2D .1111 "MAXIMUM ACHIEVABLE CONTROL TECHNOLOGY" AVOIDANCE – 40 CFR 63, Subpart CCCCCC, "National Emission Standards for Hazardous Air Pollutants for Area Sources: Paints and Allied Products Manufacturing" The Permittee has indicated the paints and allied products manufacturing process does not process, use, or generate materials containing:
 - a. benzene or methylene chloride; OR
 - b. compounds of cadmium, chromium, lead, and nickel in amounts greater than 0.1% by weight for carcinogens or 1.0% by weight for non-carcinogens.

Prior to processing, using, or generating materials containing the above compounds, the Permittee shall comply with all applicable provisions, including the notification, testing, and monitoring requirements contained in Environmental Management Commission Standard 15A NCAC 2D .1111, "Maximum Achievable Control Technology" as promulgated in 40 CFR 63, Subpart CCCCCC, "National Emission Standards for Hazardous Air Pollutants for Area Sources: Paints and Allied Products Manufacturing", including Subpart A "General Provisions."
