

APPENDIX 2-A

USE SUPPORT RATINGS FOR ALL MONITORED WATERBODIES

2010 DRAFT

DRAFT 2010 IR CATEGORY	INTEGRATED REPORTING CATEGORIES FOR INDIVIDUAL ASSESSMENT UNIT/USE SUPPORT CATEGORY/PARAMETER ASSESSMENTS. A SINGLE AU CAN HAVE MULTIPLE ASSESSMENTS DEPENDING ON DATA AVAILABLE AND CLASSIFIED USES.
1	All designated uses are monitored and supporting
1b	Designated use was impaired, other management strategy in place and no standards violations for the parameter of interest (POI)
1nc	DWQ have made field determination that parameter in exceedance is due to natural conditions
1r	Assessed as supporting watershed is in restoration effort status
1t	No criteria exceeded but approved TMDL for parameter of interest
2	Some designated uses are monitored and supporting none are impaired Overall only
2b	Designated use was impaired other management strategy in place and no standards violations Overall only
2r	Assessed as supporting watershed is in restoration effort status overall only
2t	No criteria exceeded but approved TMDL for POI Overall only
3a	Instream/monitoring data are inconclusive (DI)
3b	No Data available for assessment
3c	No data or information to make assessment
3n1	Chlorophyll a exceeds TL value and SAC is met-draft
3n2	Chlorophyll a exceeds EL value and SAC is not met first priority for further monitoring-draft
3n3	Chlorophyll a exceeds threshold value and SAC is not metfirst second priority for further monitoring-draft
3n4	Chlorophyll a not available determine need to collect-draft
3t	No Data available for assessment -AU is in a watershed with an approved TMDL
4b	Designated use impaired other management strategy expected to address impairment
4c	Designated use impaired by something other than pollutant
4cr	Recreation use impaired no instream monitoring data or screening criteria exceeded
4cs	Shellfish harvesting impaired no instream monitoring data- no longer used
4ct	Designated use impaired but water is subject to approved TMDL or under TMDL development
4s	Impaired Aquatic Life with approved TMDL for Aquatic Life POI or category 5 listing
4t	Designated use impaired approved TMDL
5	Designated use impaired because of biological or ambient water quality standards violations and needing a TMDL
5r	Assessed as impaired watershed is in restoration effort status

Catawba River Basin 2010 NC 305(b) Report

All Waters in NC are in Category 5-303(d) List for Mercury due to statewide fish consumption advice for several fish species

AU_Number	AU_Name	AU_Description	LengthArea	AU_Units	Classification
IR Cat	Parameter	Reason for Rating	Use Category	Collection Year	303(d)year
Catawba River Basin		South Fork of the Catawba River Subbasin			03050102
Catawba River Basin			Henry Fork Watershed		0305010201
◎ 11-129-1-(12.5)a	Henry Fork	From Laurel Creek to State Route 1124	10.3 FW Miles	C	
1 Ecological/biological Integrity Benthos	Good Bioclassification	Aquatic Life	2006		
◎ 11-129-1-(12.5)b	Henry Fork	From State Route 1124 to State Route 1143	4.8 FW Miles	C	
1 Ecological/biological Integrity Benthos	Good Bioclassification	Aquatic Life	2006		
1 Fecal Coliform (recreation)	No Criteria Exceeded	Recreation	2008		
5 Low pH	Standard Violation	Aquatic Life	2008	2008	
5 Turbidity	Standard Violation	Aquatic Life	2008	2010	

All Waters in NC are in Category 5-303(d) List for Mercury due to statewide fish consumption advice for several fish species

AU_Number	AU_Name	AU_Description	LengthArea	AU_Units	Classification
IR Cat	Parameter	Reason for Rating	Use Category	Collection Year	303(d)year
◎ 11-129-1-(2)	Henry Fork	From Morganton Water Intake to Laurel Creek	19.5 FW Miles	C;ORW	
1	Ecological/biological Integrity Benthos	Excellent Bioclassification	Aquatic Life	2006	
1	Ecological/biological Integrity FishCom	Excellent Bioclassification	Aquatic Life	2007	
◎ 11-129-1-13	Laurel Creek	From source to Henry Fork	6.6 FW Miles	C	
1	Ecological/biological Integrity Benthos	Not Impaired Bioclassification	Aquatic Life	2005	
Catawba River Basin			Jacob Fork Watershed	0305010202	
◎ 11-129-2-(4)	Jacob Fork	From Little River to Camp Creek	6.8 FW Miles	WS-III;ORW	
1	Ecological/biological Integrity Benthos	Excellent Bioclassification	Aquatic Life	2006	
1	Fecal Coliform (recreation)	No Criteria Exceeded	Recreation	2008	
1	Water Quality Standards Aquatic Life	No Criteria Exceeded	Aquatic Life	2008	
1	Water Quality Standards Water Supply	No Criteria Exceeded	Water Supply		
◎ 11-129-2-(9.5)	Jacob Fork	From Camp Creek to a point 0.6 mile upstream of mouth	40.5 FW Miles	WS-III	
1	Ecological/biological Integrity Benthos	Good Bioclassification	Aquatic Life	2007	
◎ 11-129-2-5	Little River	From source to Jacob Fork	5.2 FW Miles	WS-III;Tr,OR	
1	Ecological/biological Integrity Benthos	Excellent Bioclassification	Aquatic Life	2008	
1	Ecological/biological Integrity FishCom	Good Bioclassification	Aquatic Life	2007	
1	Water Quality Standards Aquatic Life	No Criteria Exceeded	Aquatic Life	2008	
Catawba River Basin			Clark Creek Watershed	0305010203	
◎ 11-129-5-(0.3)b	Clark Creek (Shooks Lake)	From Miller Branch to 0.9 mile upstream of Walker Creek	16.6 FW Miles	C	
5	Ecological/biological Integrity Benthos	Fair Bioclassification	Aquatic Life	2000	1998
◎ 11-129-5-7-2-(1)	Maiden Creek	From source to a point 0.7 mile upstream from backwaters of Maiden Reservoir	4.9 FW Miles	WS-II;HQW	
5	Ecological/biological Integrity Benthos	Fair Bioclassification	Aquatic Life	2002	2006
Catawba River Basin			Upper South Fork Catawba River Watershed	0305010204	
◎ 11-129-1-(12.5)c	Henry Fork	From State Route 1143 to Jacob Fork	8.6 FW Miles	C	
1	Fecal Coliform (recreation)	No Criteria Exceeded	Recreation	2008	
4t	Turbidity	Standard Violation	Aquatic Life	2008	2008
◎ 11-129-4	Howards Creek	From source to South Fork Catawba River	13.8 FW Miles	C	
1	Ecological/biological Integrity Benthos	Good-Fair Bioclassification	Aquatic Life	2008	
1	Ecological/biological Integrity FishCom	Good Bioclassification	Aquatic Life	2007

Most Abundant Species	Central Stoneroller	Exotic Species	Rock Bass and Smallmouth Bass			
Species Change Since Last Cycle	Gains -- Central Stoneroller, White Sucker, and Warpaint Shiner. Losses -- Sandbar Shiner and Creek Chub.					
Data Analysis						
<p>Watershed -- headwaters of the South Fork Catawba River; drains south-central Burke County below Morganton, including a portion of the South Mountain State Park lands. Habitat -- shallow runs with boulder eddies, riffles, chutes, and side snags; low flow; low conductivity; low morning pH from overnight respiration; densely forested riparian zones, with the exception of a hay field above the right bank. 2007 -- an abundant (n = 463) and fairly diverse community of fish including 4 intolerant species were collected, but with few darters; 84% of the sampled fish were minnows, about half of which were Central Stonerollers and Warpaint Shiners. 1998 - 2007 -- this site has maintained very stable NCIBI metrics over a 9 year period. Fifteen species of fish are known from this watershed including 7 species of minnows, 2 species of suckers, and 2 species of darters. This ORW catchment is showing no apparent water quality issues.</p>

08/22/92	6005	74	38	4.55	3.76	Good

Taxonomic Analysis

No major changes in the benthic community were observed. Abundant taxa included *Pseudocloeon propinquum*, *Epeorus rubidus*, *Heptagenia marginalis*, *Isonychia*, *Rhithrogena uhari*, *Maccaffertium modestum*, *Acroneuria abnormis*, *Perlestes*, *Cheumatopsyche*, *Dolophilodes*, *Micrasema wataga*, *Ceratopsyche sparna*, *Dubiraphia*, *Helichus*, *Boyeria vinoso*, *Progomphus obscurus*, *Corydalus cornutus*, *Ablabesmyia parajanta/janta*, *Conchapelopia*, *Parametricnemus lundbecki*, *Tanytarsus*, *Simulium*, *Corbicula fluminea* and *Elimia*.

Data Analysis

This site is located south of the city of Hickory and the town of Icard. Since this location had been sampled in 2006, those data were used for this basinwide cycle. When corrected for seasonality, the 2006 sampled had an EPT richness of 43 and Biotic Index of 4.52 thereby placing it in the Good category. Henry Fork has consistently rated Good since 1992. Based on the benthic data no major changes in water quality have been observed.

08/20/92	6006	106	48	4.36	3.22	Good
Taxonomic Analysis						
With the exception of 2002, no major changes in the benthic community were observed. In 2002, mayfly taxa richness decreased from previous years but had recovered in 2006. Abundant EPT taxa included <i>Drunella cornutella</i> , <i>Epeorus rubidus</i> , <i>Isonychia</i> , <i>Leucrocuta</i> , <i>Rhithrogena uhari</i> , <i>Maccaffertium modestum</i> , <i>Stenacron pallidum</i> , <i>Acroneuria abnormis</i> , <i>Isoperla holochlora</i> , <i>Perlestes</i> , <i>Dolophiloides</i> , <i>Glossosoma</i> , <i>Lepidostoma</i> , <i>Neophylax oligius</i> , <i>Rhyacophila fuscula</i> , <i>R. nigrita</i> and <i>Ceratopsyche sparna</i> .						
Data Analysis						
This site is located downstream of South Mountains State Park and was designated ORW in 1989. With the exception of 2002, a dry year, the water quality appears to be stable. Although the site received a Good rating in 1992, EPT taxa richness and EPT Biotic Index scores are consistent with values recorded in 1997 and 2006 when the site received Excellent ratings suggesting the site was borderline Good/Excellent.

Data Analysis								
<p>Watershed -- tributary to the South Fork Catawba River; drains southern Catawba and northern Lincoln counties; no municipalities in the watershed; two small permitted dischargers within the watershed (combined flow = 0.045 MGD). Habitat -- seemed to be more severely eroded in 2006 than in 2002 as a result of 2004 hurricane flows; eroding banks; only snag and log riffles and one gravel riffle. 2006 -- 18 of 20 species collected in 2002 declined in number (e.g. Rosyside Dace, Bluehead Chub, Sandbar Shiner, and White Sucker) or were not collected in 2006 (Creek Chub); number of fish decreased from 265 to 73, the fewest ever collected at the site and the fewest of any site in the basin 2004 - 2007; only one-third of the species were represented by multiple age groups; sampled as part of a Catawba River Basin Biological TMDL Study (Biological Assessment Unit Memorandum F-20061207). 1997 - 2006 -- conductivity has ranged from 47 to 61 µS/cm; 22 species are known from the site, including the intolerant Santee Chub, Highbank Chub, and Seagreen Darter; no exotic species known from the site until 2006; community affected by flow extremes and by limited avenues for recolonization.</p>

Taxonomic Analysis

When corrected for season, EPT taxa richness increased in 2006 from previous samples. Several EPT taxa either Common or Rare in 2006 were not previously collected from this site: *Plauditus dubius* group, *P. cestus*, *Habrophlebioides*, *Procloeon*, *Ironoquia punctatissima*, *Lepidostoma* and *Rhyacophila fuscula*. Other Abundant EPT taxa at this site were: *Baetis pluto*, *Pseudocloeon propinquum*, *Isonychia*, *Stenacron interpunctatum*, *Perlestes*, *Cheumatopsyche* and *Triaenodes ignitus*.

Data Analysis

Howards Creek drains the northwestern portion of Lincoln County. Since this location had been sampled in 2006, those data corrected for season were used for the 2007 basinwide cycle. The water quality at this site appears to be fairly stable with Good bi classifications in 1992, 1997, and 2006. During the drought of 2002, the bi classification dropped to Good-Fair with only 17 EPT taxa collected.

Data Analysis						
This is the first fish community sample collected at this site. Watershed -- tributary to the South Fork Catawba River; drains northwest Lincoln County and the extreme southwestern portion of Catawba County; no municipalities in the watershed. Habitat -- sandy/gravelly runs; snags; cattle with access to the stream on the left; poor riparian zones, widths were only one-tree wide. 2007 -- conductivity was relatively low; a very diverse community for a stream of its size, including 6 species of sunfish and 3 species of darters, but the percentage of tolerant fish (Creek Chub, White Sucker, Flat Bullhead, Eastern Mosquitofish, Redbreast Sunfish, and Green Sunfish) and the trophic metrics (elevated percentage of omnivores) were indicative of some slight nutrient enrichment; two intolerant species were present, Seagreen Darter and Piedmont Darter.

Data Analysis						
<p>This is the first fish community sample collected at this site. Watershed -- tributary to the South Fork Catawba River; drains portions of the cities of Hickory, Conover, and Newton in central Catawba County; sand dipping operations downstream from the bridge. Habitat -- very shallow sandy runs; stick riffles; side deadfalls, snags, roots, and undercutts; cattle with access to stream; cattle exclusion barrier across the channel; urban debris in the stream.</p> <p>2004 -- conductivity elevated; low diversity and very low fish abundance (n = 75) for a stream of its size; intolerant species were absent; only one species of sucker and darter were collected; percentage of tolerant fish (White Sucker, Flat Bullhead, and Redbreast Sunfish) was high; data were also used as part of a NCSU Urban Fish Study.</p>

08/05/92	5968	48	10	6.42	5.39	Fair
Taxonomic Analysis						
<p>The mayfly taxa richness had significantly decreased from eight taxa in 1997 to two taxa in 2002. In 2007, the mayfly taxa richness increased to four, possibly showing some signs of recovery from the drought. The decrease in the number of mayfly taxa may have been due to drought effects alone or a combination of drought effects and effluent from three dischargers located upstream of this site. Absent in 2002 were the tolerant caddisfly <i>Hydropsyche venularis</i> and the ubiquitous and tolerant mayfly <i>Maccaffertium modestum</i>, which had been Common or Abundant in previous samples. Both taxa were present in 2007. <i>Maccaffertium modestum</i> were Abundant and <i>Hydropsyche venularis</i> were Common.</p>						
Data Analysis						
<p>This site is located downstream of three dischargers, two WWTPs and a textile mill. In 1997 and 2002, it was noted that the water in Clark Creek was red, possibly from dyes used in the textile mill. However, the water was clear in 2007. The Biotic Index and the EPT Biotic Index indicate that water quality has remained fairly constant for the previous 15 years. The Good-Fair rating in 1997 was borderline Fair/Good-Fair.</p>

08/17/92	5978	79	29	5.78	5.18	Good
Taxonomic Analysis						
Taxa observed in the 2006 sample indicated an increase in mayfly and caddisfly taxa which had decreased significantly in 2002 due to drought conditions. Abundant EPT taxa included <i>Baetis intercalaris</i> , <i>Pseudocloeon propinquum</i> , <i>Hexagenia</i> , <i>Maccaffertium modestum</i> , <i>Perlestes</i> , <i>Oecetis persimilis</i> and <i>Triaenodes ignitus</i> .						
Data Analysis						
The Indian Creek watershed includes western Lincoln County and the extreme northwestern corner of Gaston County. In 2002, the site was moved 1.5 miles upstream due to low flows at SR 1252. However, 2002 was a dry year and BAU staff decided not to rate this site in 2002. With the exception of 2002, water quality has remained stable and Indian Creek has consistently rated Good.

Data Analysis						
Watershed -- tributary to the South Fork Catawba River; historically impounded by the Laboratory Mill Dam; watershed includes western Lincoln County and the extreme northwestern corner of Gaston County encompassing the north side of the Town of Cherryville; site is ~ 1.1 miles upstream from the creek's confluence with the river. Habitat -- Carolina Slate Belt type stream; outcrops; riffles with <i>Podostemum</i> . 2006 -- total number of fish declined from 207 to 111 between 2002 and 2006; darters and intolerant species absent; sampled as part of a Catawba River Basin Biological TMDL Study (Biological Assessment Unit Memorandum F-20061207). 1997 - 2006 -- conductivity has ranged from 75 to 86 µS/cm; very low diversity for a stream of its size; only 15 species are known from the site, but no darters or intolerant species have ever been collected; percentage of tolerant fish (Creek Chub, White Sucker, Flat Bullhead, Eastern Mosquitofish, Redbreast Sunfish, and Green Sunfish) has increased from 16% to 29% to 49% since 1997; community affected by extremes in flows and by limited avenues for recolonization.

07/15/04	2004-122	17		54	Excellent			
Most Abundant Species	Redbreast Sunfish	Exotic Species	Redear Sunfish					
Species Change Since Last Cycle	N/A							
Data Analysis								
This is the first fish community sample collected at this site. Watershed -- tributary to the South Fork Catawba River; drains central Gaston County, including portions of the municipal areas of Kings Mountain, Bessemer City, and Gastonia; site is ~ 3.4 miles above the basinwide site monitored in 1993, 1997, and 2002. Habitat -- sandy runs; snags; undercutts; deadfalls; good canopy; below a natural bedrock shelves/waterfall. 2004 -- community was diverse and abundant; percentage of tolerant fish (White Sucker, Flat Bullhead, Eastern Mosquitofish, and Redbreast Sunfish) slightly elevated; percentage of species with multiple age groups slightly lower than expected; intolerant species included Highback Chub and Seagreen Darter; data were also used as part of a NCSU Urban Fish Study.

07/25/90	5395	67	18	6.18	5.22	Good-Fair
Taxonomic Analysis						
No major changes in the benthic community were observed. Abundant taxa included <i>Baetis flavistriga</i> , <i>B. intercalaris</i> , <i>Isonychia</i> , <i>Maccaffertium modestum</i> , <i>Cheumatopsyche</i> , <i>Hydropsyche betteni</i> , <i>Triaenodes ignitus</i> , <i>Ancyronyx variegatus</i> , <i>Dineutus</i> , <i>Macronychus glabrus</i> , <i>Boyeria vinosa</i> , <i>Ophiogomphus</i> , <i>Progomphus obscurus</i> , <i>Tribelos fusiforme</i> and <i>Corbicula fluminea</i> .						
Data Analysis						
Long Creek drains the western portion of Gaston County. This particular location is also an ambient monitoring site. It was not sampled for benthos in 2002 due to low flows. Although EPT taxa richness has gradually increased since 1990, the bioclassification has remained at Good-Fair.

Results not meeting EL: number and percentages of observations not meeting evaluation level

%Conf : States the percent statistical confidence that the actual percentage of exceedances is at least 10% (20% for Fecal Coliform)

Stations with less than 10 results for a given parameter were not evaluated for statistical confidence
